IPS e.max Bleach Shades for all-ceramic perfection

The IPS e.max system from Ivoclar Vivadent enables the Laboratory provision of beautiful all-ceramic restorations in an extensive range of indications, including crowns, bridges and veneers. This unique & simple system allows the restoration to be made using CAD/CAM technology or press technology. Which ever option is chosen, they offer enhanced aesthetics and biocompatibility compared with metal-ceramic restorations, and may be suitable as the best restorative solution for strength, aesthetics and minimally invasive preparation.

Sirona SIROLaser

The Sirona SIROLaser is a new dental technology which means that the treatment parameters.

For further information contact Sirona Dental Systems on 0116 284 7880. For further information please contact info@uk.gceu-dentoid.co.uk

The IPS e.max system offers a choice of either lithium disilicate glass ceramic and fluorapatite glass ceramic blocks for pressing or zirconium oxide and lithium disilicate glass ceramic for CAD/CAM technology.

SIBO Laser

The latest “Practice Building” technology for Cosmetic Dentists

Possessing the latest technology is the ideal way to promote your Practice. That is why Sident Dental Systems, the UK’s leading provider of Sirona equipment, believe there has been such a tremendous response to their Sirona SIBO Laser.

SIBO Laser can be used for soft tissue surgery in a variety of cosmetic dentistry applications as well as for disinf ection in endodontics. It is used to remove carious tissue, and surrounding soft tissue localising bio-available calcium and phosphate.

The Dental Directory is also a major sponsor of the British Dental Bleaching Society, which was launched at the World Aesthetic Congress in June.

If you would like to experience Wy10 for yourself contact The Dental Directory 0800 5855856.

Learn More from Sirona!

With the huge success of CEREC CAD/CAM, Sirona Dental Systems place a greater emphasis on training. With over 22,000 systems worldwide, Sirona has been able to produce an even higher level of training, which is unrivalled by any other manufacturer. Sirona now has a blueprint of over 20 years in training CEREC users of all levels whether you are an experienced CEREC user or someone who has just taken delivery of their CEREC for the first time. Our training is designed to ensure new users gain confidence quickly whilst those more experienced users look to carry out more complicated cases.

Banish Tooth Whitening Sensitivity

Sensitivity is often an issue associated with Tooth Whitening, which applies to both home and power (surgery) whitening procedures.

GC has introduced Tooth Mousse that is the perfect addition to your usual tooth whitening treatments. Apply immediately after tooth whitening to relieve sensitivity caused by dehydroxylation of the tooth structure or provide your patients with a tube to take home with their home whitening kit.

GC Tooth Mousse is water based, sugar free topical cream that contains Recaldent® CPP-ACP (Garnier Phosphopetide – Amorphous Calcium Phosphate). This topical paste will provide extra protection for the patients’ teeth. It has been shown that the twice daily use of 1% CPP-ACP solution produced a 19% reduction in enamel demineralisation (Reynolds, 1988).

When CPP-ACP is applied to the tooth surfaces, it binds to biofilms, plaque, bacteria, hydroxyapatite and surrounding soft tissue localising bio-available calcium and phosphate. Saliva also enhances the effectiveness of CPP-ACP and the

flavour of the tooth mousse helps to stimulate saliva flow. The longer CPP-ACP is maintained in the mouth, the more effective the result.

There is a wide range of benefits for GC Tooth Mousse. It can be used to protect restoration for teeth and to help neutralise an acidic oral environment. Additional professional applications of the mousse will be immediately following bleaching, after ultrasonic, hand scaling or root planing, after removal of orthodontic brackets, following professional tooth cleaning, after apicectomies for the treatment of post-operative pain. Weighing 450gm, it features the very latest diode technology which means that the unit size is kept to a minimum. The control unit has a clear menu of easy to select functions, while its LED display shows all the treatment parameters.

Dentist Tooth whitening Systems

Dentist stocks a range of reasonably priced tooth whitening products for in surgery or at home use.

Blue lightening 40 is an in surgery premixed gel system with an orange tint to aid placement. The hydrogen peroxide gel is only activated when expressed from the tube. It also contains gingival barrier and silky touch lip cream.

Blue lightening Home is an at home kit containing high stability gel, that is only activated by saliva. The peroxide therefore does not break down before use, as it is passive. It does not contain carbomy or phenol based irritation, pH neutral. Each kit contains neutral, antiallergenic, odorless vacuum sheet not a vinyl-acetate based vacuum sheet.

Cool Kiss 50 in surgery kits. For professionals who prefer to mix the whitening paste how they prefer. These are bulk treatment kits for 15 or 50 applications, that includes a silicone self curing gingival protection.

Mini cool blue system light is face mounted, Ultra light weight weighing only 75g. It clips onto the cheek retractor, is comfortable for patient, effective, easy to use, and features a time totaliser, and key lock to prevent unauthorised use.

For further information please contact Wy10 Widens Its Range

Many practitioners will now be familiar with Wy10, the exciting rapid whitening treatment, which uses a purer form of peroxide with few additives to achieve a remarkable chairside contact time of just 10 minutes per pass. The range, exclusive to The Dental Directory, has been expanded to include INNER-White, an internal bleaching kit containing all the materials required to carry out an internal teeth whitening procedure.

Numbers on these CPD Accredited courses are re

stricted so please book early to avoid disappointment. To re

serve your place or further information please contact Sirona UK directly on 0845 071 5040 or e-mail mark.buck

Utising carbamide peroxide oxygen releasing agents the Vi

vaStyle range has a gentle, but eff

active function on tooth structure. It is available in various concen

trations of two basic representa

tions – VivaStyle and VivaStyle Paint On Plus - each designed with a different application in mind.

VivaStyle gel is applied (according to a Dentist’s instructions) by the patient at home, for an hour or longer per day, using an individually customised tray. It is available with either 10% or 16% carbamide peroxide content.

VivaStyle Paint On Plus is recommended for patients if they don’t want or can’t afford fitted trays. Applied by brush, the varnish remains on the teeth for 10 minutes before being removed with a toothbrush. This procedure is normally performed twice daily for 7 days. It can be used to whiten the complete den
