**ORAL HELATH**

**Intercuspal brushing key to maintaining healthy gums and heart**

With proof mounting about the link between gum disease, cognitive decline, and periodontal disease, interproximal cleaning as an effective prophylactic against poor health has never been more important. However, encouraging patients to maintain a routine is frequently undermined by the British Dental Health Foundation found that less than 7% of the British population actually cleans along the gumline. However, we use inter-dental brushes. Designed to fit into each interdental space, these simple tools help patients to effectively remove plaque without damaging gums. Curaprox Interdental Brushes are the result of 30 years of research and refinement. Made of six-faceted CURAL, Curaprox Interdental Brushes are five times stronger than other brushes, providing durability and value for money. Curaprox interdental brushes also boast several other defining features, including:

- Comprising soft filaments for thorough but gentle cleaning
- The access radius to get into even the smallest of spaces
- ‘Totally interchangable with a wide range of handles’

Curaprox offers the most comprehensive range of brushes on the market to help ensure maximum cleanliness for gums and teeth, and better overall bodily health for patients. For more information please call 01404 832064, email info@curaprox.co.uk or visit www.curaprox.co.uk

**Decapinol® Mouthwash - The safe and simple approach to periodontal hygiene**

Dental professionals can now enjoy a completely new and effective solution to the management of gingivitis and the prevention of periodontal disease, focused on a key approach behind the gum inflammation condition. Decapinol® Mouthwash contains an innovative antiplaque-free formula that maintains a healthy balanced oral microflora, whilst inhibiting the build-up of the plaque forming bacteria associated with periodontal disease. This maintenance provides a protective protection against pathogenic invaders. To combat the build-up of plaque, Decapinol® Mouthwash creates an invisible protective layer over the tooth surfaces, delivering an antiseptic and antifouling action. It is a novel and innovative product designed to help prevent the build-up of plaque and reduce gums inflammation. The active ingredients also fight infection in mouth ulcers caused by braces and other fixed appliances. The Gel is pleasant tasting as well as being mild when applied to the oral mucosa. Properties also fight infection in mouth ulcers caused by braces and other fixed appliances. The Gel is pleasant tasting as well as being mild when applied to the oral mucosa. **EndCare**

**Making Endodontic referrals a thing of the past**

Winner of the 2009 Private Dentistry Award for the EndCare referral service, the EndCare chain of dental practices prides itself on its ability to provide all patients with the very best care and attention. The knowledgeable, knowledgeable teamgenerally excellent service will enable our excellent service to refer clinicians and patients, with each and every member continuously improving their skills through relevant courses. Managed by clinical director Dr. Michael Sullivan, EndCare makes referrals simple with its online referral system. The referring dentist is kept in the loop throughout their patient’s treatment plan and procedures are clearly communicated. At the end of each month, all patients and their referring clinicians share in a follow-up meeting with the referring dentist to share results and assess the success of their referral. Genus – Making a dream a reality
By starting up your own squint practice, you have an incredible ‘black canvas’ opportunity: a chance to leave your own unique stamp.
It’s vital that the practice you create truly reflects you and should not just be a copy of the exclusive services you provide, the type of patients you want to attract. Genus has a team of specialists that have enabled dentists for far and wide to achieve the practice of their dreams. Real design philosophers, dentists appreciate these differences and attract patients. With the ability to identify the potential in even the smallest of premises, Genus can renovate a previously run-down building into a chic, fully functioning practice. Intelligent design plays an integral role in Genus’ approach.
Genus also offers advice on creating a practical yet comfortable surgery by choosing cleverly designed equipment and furniture within a small space. By not overlooking the manufacturers, practice owners with Genus have free sourcing access to the best suited fixtures, furniture and fittings for their practice.
For more information, please call Genus on 01582 840846 or email chris.davies@genusgroup.co.uk www.genusinteriors.co.uk

Kemdent\’s CharaSafe Diodontic Range 
Earns the CE Mark with Pridal
Kemdent is proud to announce that our range of CharaSafe dentists comply with the newly核查ed European directives regarding the disinfection of medical devices, and carry the CE mark with pride! This is good news for all Kemdent customers as we can continue to use our Kemdent products with safety and confidence.
To celebrate this, when you buy a 200ml CharaSafe disinfectant spray with a £1 CharaSafe refill, we will give you a 20% discount. Also, during October, CharaSafe is an alcohol-free disinfectant foam cleanser which has been specially formulated to be effective against a wide range of materials such as rubber, acrylic and glass and also soft surfaces and equipment. It is economical and easy to use, as the foam is non-drip and remains exactly where you apply it. CharaSafe is highly effective against H1N1, H5N1, MRSA, HIV and Clostridium botulinum, and Bacillus subtilis. It is also a valuable tool against waste and waste. To take advantage of this excellent special offer contact Jackie or Helen on 0173 717026 or visit our website kemdent.co.uk.

West London’s First Velpeau

The West London’s First Velpeau offers aesthetic and functional restoration options as well as the highest quality dentistry permanently.
West London is now well and truly on the map! The first Velpeau Picasso Laser has been installed at the Dental Practice in West Road; which can now offer all patients the availability of a particular laser as well as the latest in implantology and restoration CAD-CAM technology, thanks to Medivance Instruments Ltd
For more information or to ask any questions, please contact Mark Chapman.
Medivance Instruments Ltd
Barretts Green Road
LONDON
NW9 1SP Tel 07734 044477 Fax 020 8951 1270

Velopex Picasso Laser
The Velopex Picasso Laser has been installed as a 2.0 Watt Aluminium Arsenate (GaAlAs) diode laser and a small laser pointer. The GaAlAs laser is ideal for soft tissue (gum) work as it does not penetrate soft tissue or bone. It is particularly indicated for both periodontal work – where it can sterilise the pocket killing the bacteria. The GaAlAs laser has a wavelength that makes it an ideal tool to do minor oral surgery. Using this laser, an area can be cut with localised haemostasis. Not only does the laser cut but it also sterilises the tissues as well making for good results. Patients continue to be very positive with many patients commenting positively on the no or minimal pain.

NobelProcera™ for General Dental Practitioners!
NobelProcera™ offers the latest in technology for General Dental Practitioners!
NobelProcera™ is an easy-to-use CAD/CAM technology for General Dental Practitioners.
• Precise impression capturing capabilities, supported by delivery of the restoration on an accurately modelled model
• Fully automated milling
• Full assortment of shaded zirconia products from (crown to screw retained restorations)
• Launch of new materials for cost effective solutions - such as zirkon ceramic and acrylics for different indications
• Intruments, light and chair system and screw retained bar solutions – on Nobel Biocare and continuously updated competitor implant platforms

NobelProcera™ is the result of over 10 years of research and development, and is the only CAD/CAM system to provide the complete package of software and hardware.
It is essential to those who want to achieve the highest standard in quality and patient care. It is easy to use, and delivers consistent results, every time.

Prämint® Surgical Instruments is a collection of surgical instruments that is based in the United Kingdom. Charlton Dental: Providing outstanding surgery day after day
Charlton Dental

Everyone offers a new surgery says something about you as a dental professional, and the service that you provide your patients. From the style, quality and equipment used, to the thought, time and effort put into an individual case. The type of patients you attract is a given immediate impression of your professionalism, and if you are not able to transform your vision into a stunning reality, Charlton Dental will assist you in every aspect of the work; including the design of the dental websites. To talk to a dedicated team member about setting up a bespoke plan for your surgery, call Chuck on a free phone to plan your business forward, visit www.thefreshuk.com

Kerr is proud to announce a new product inspired by you: Compothixo!
While most dental practitioners are familiar with the benefits of composite resin, they may not be aware of its versatility in general dentistry. Compothixo is a new product that offers practitioners the ability to use their existing composite resin in a variety of ways, allowing them to expand their treatment options and reach a wider range of patients.
Reduced stickiness
Improved sculptability
Layer thickness control
Precise application
Reduction of air bubbles
Better wettability
Material. Compothixo unique benefits:
