The new Sirona XIOS intraoral sensors are “keep it simple sensors” that deliver fast, flexible and simple x-ray imaging.

Designed for patient comfort and superior image quality, they have a slim design with rounded edges for improved patient comfort; cable attachments located on the back for protection and where they require least space, and featuring Sensor Cable Sine Rail Reduction to reduce connection failure due to strain; finally thin, disposable, self adhesive holders which are smaller than the sensors themselves.

They employ the latest technology to produce excellent image quality. These include Ac-tive Pixel Sensor technology delivering the ideal combination of low noise with optimized high resolution images; automatic image pre-processing which produces perfect images; a high-speed USB 2.0 interface which allows simultaneous data transmission; and easy image import and export.

For further information call Sirona Dental Systems on 01952 582900 or email sales@sident.co.uk.

Learn More from Sirona!

With the huge success of CEREC CAD/CAM, Sirona Den-tal Systems place a greater emphasis on training. With over 22,000 systems worldwide, Sirona has been able to produce an even higher level of training, which is unrivalled by any other manufacturer. Sirona now has a blueprint of over 20 years in training CEREC users of all levels whether you are an experienced CEREC user or someone who has just taken delivery of their CEREC for the first time. Our training is designed to ensure new users gain confidence quickly whilst those more experienced users look to carry out more complicated cases.

To find out and understand the CEREC CAD/CAM technology why not contact a member of our team and book your place on the next available date to see how this easy CEREC really is to use.
