Steile-on

Steile-on Innovative and Inspirational Education Solutions At The Dental Showcase

Recognising the need across the dental industry for education and training solutions that are flexible, involving and inspirational, Stylist on the course for cutting edge software and training resources. At the 2008 BDTA Dental Showcase delegates are invited to discover the latest approaches at stand V13.

Steile-on provides access to everything the dental teams need to meet their industry obligations and advance their skills, whatever level they are at or their career. Solutions include the Dental Photography Course, bringing dental photography to the next level with the latest proven methods of image capture.

The Steile-on team will be ready to advise on all programmes including the popular:

- DNSTMAT and DNINN it providing vital knowledge for dental nurses, studying for the National Certificate or NVQ level 3 in Oral Health Care and is also used as an update programme for established nurses.
- Clinical Governance: Designed to enable total compliance with Healthcare Commission standards

Stylist Dental Eyewear From Höegh at BDTA 2009

Blackwell Supplies will be exhibiting the new range of Stylist eyewear and exclusively developed infection control products at the BDTA Dental Showcase at the NEC Birmingham (12th-14th November).

At the Blackwell stand visitors will be able to discover the unique quality and magnification capability of Høegh MaxiBlue lenses. The unique MaxiBlue design reduces the weight of the lenses on the nose by 70% for less strain and fatigue. The high quality frames are designed with precision in mind to suit all dental environments from general dentistry to endodontics or surgery.

Blackwell’s team will also be on hand to explain the efficacy of the exclusively developed Blackwell line of alcohol-free disinfectants which offer significant advantages over alcohol-based products while achieving excellent infection control.

For essential items that no surgery should be without, don’t miss the opportunity to visit Blackwell Supplies friendly team at BDTA 2009.

For more information please call Wright on 0800 86 88 99 or visit www.wrightnhealthgroup.com

QED-Endodontic Instruments

One of the most famous names in dentistry, and a leader for excellence throughout the industry, QED Celebrates its Anniversay in 2009.

QED-Endodontic Instruments, during their first century of manufacturing and service have prided themselves on their consistent commitment to supplying the most advanced, high quality products and service. At Dental Showcase they will again be exhibiting a full range of products.

2009 is an exciting year for QED-Endodontic Instruments, as they will be showing a number of new, innovative products, which further enhance their high quality range.

Please take this opportunity to see the exciting and diverse range of dental units, imaging products including innovations in digital technology and dental simulation education.

Far from resting on their laurels, QED opened its Centenary Year by announcing the demo of 100 years of QED’s innovation and quality – 100 reasons for dentists to trust QED for dental treatment for the next 100 years.

To find out more visit the QED stand on stand P08 or contact QED on 01944 733 000, email sales@kowan.co.uk or visit www.kowan.co.uk

Discover your inner Orthodontist at the 2009 BDTA Dental Showcase

Delegates visiting Chautey at BDTA Dental Showcase on the 12th to the 14th of November 2009, NEC Birmingham will learn how they can develop professional knowledge and experience, enriching their skill set and improving their service to patients – and creating a new route to financial success.

Visit Stand T15 and discover what’s new with Chautey.

The Chautey stand will be organised clearly into 3 key elements (Pro-Alignment, Space Closure, Alignment, Finishing and Detailing, Extrait) and incorporates applications and solutions to the OGIS and the Chautey Closing Spring. Enabling dentists to treat every malocclusion that an orthodontist might see in any given day, this solution can also be used to treat children as young as 7 years.

This year, dentists are invited to explore and embrace the art of orthodontic expertise with the Chautey Treatment Planning System. Representing the cutting edge of orthodontics, this solution lets dentists reduce referral, boost income and provide a greater service to patients.

For more information call the CPT Laboratory & Diagnostic Facility on 01342 370170 or email info@ctdentist.co.uk or visit cpdentist.co.uk

Eastman to Present Excellent Education Solutions at BDTA 2009

Delegates to the 2009 Dental Showcase (NEC, Birmingham, 12-14th November) can discover educational courses to take their knowledge and career to the next level with the renowned UCL Eastman Dental Institute.

The Eastman stand, R12, is the ideal setting for expert advice on continuing education through well-established and highly regarded courses.

The Eastman will be unveiling new exciting new initiatives:

- EDC – a range of downloadable podcasts on topical subjects such as 1 hour of verifiable CPD
- For all and members of the dental team – an online package for all CPD providing verifiable CPD
- For all dentists and all members of the dental team to the Dental Showcase to demonstrate how they can provide dental practices with a one stop shop for Integrated Documentation Solutions.

Prestige Medical staff will be on hand to explain how to arrange a free practice survey and the stand will feature a typical leamurization system to demonstrate how they are designed to be fully compliant yet can be tailored made to suit the needs of the individual practice.

The display will include fully compliant equipment including the UltraClean II water distiller dryer, which has an RRD connection as standard, and the high capacity CL2 Advanced X-ray detector.

For more information is available from Prestige Medical directly call 01844 444 103 or email sales@prestigemedical.co.uk

Industry News
**Increased Expectations with Bien-Air**

Bien-Air has not lost momentum over the past 50 years with its range of high-quality, Swiss products.

The implant motor system, Chiro 3, with LED micromotor and 20:1 handpiece features integral iridation and the world’s smallest handpiece head for absolute precision.

New to the range is the Bilia Blackline turbine. Thanks to the carbon fiber build these incredibly light handpieces offer improved resistance to shock, friction, torsion and impacts.

An easy to use, intuitive display the Optima M II INT converts your air-driven system to an upgraded electric operation, allowing for different Ni-Ti endodontics to be covered with a standard 1:1 contra-angle handpiece.

Most other manufacturers are still working with just two contra-angle 1:1 and 1:5, thus replacing several conventional instruments saving time and equipment.

For a limited period Bien-Air is offering triple or quadplex pulp in a variety of options. You can now enjoy using superior, Swiss-quality turbines and contra-angle handpieces at even lower prices.

These products are simply an overview of what Bien-Air has to offer. For further information please contact Bien-Air on 01384 706 303 or visit www.bienair.com.
Laser dentistry – out of the future?
Everyone knew a ‘try before you buy opportunity’, and dentists who were involved.

Cerec – one CADCAM in a new light
CEREC is one of the world’s most popular CADCAM systems, with over 15 million restorations having been placed through Cerec since its launch. This way to do, precise, hi-tech in-surgery systems allow the dentists to access, design and produce highly aesthetic, long-lasting all-ceramic restorations in their surgery, in one single appointment.

The new CEREC AC acquisition centre makes restorations even more friendly, precise and efficient ensuring CEREC’s seamless integration within your normal workflow.

The advent of CEREC Blaivan sets a new standard in measurement accuracy by capturing prep images in highly detailed and digital format using a powerful blue light emitting diode (LED). The resulting optical impression delivers an unprecedented level of precision for either single-tooth or multiple unit restorations.

Henry Schein Minerva is the resourced distributor for CEREC in the UK, so come and see the system in action at Stands 106 and T08 at the BDTS Showcase 2009. If you would like us in surgery demonstration please contact Henry Schein Minerva on 08700 10 24 41 or visit www.henryschein.co.uk

**P&G Professional Oral Health**

P&G will be showcasing their new Professional Only Packs at this year’s BDTA. Exhibiting, P&G knows that professional products sold in practices are often demonstrated to patients to ensure they’re being used correctly. They also know that this makes sense as a great opportunity to raise awareness of their products. The launch of these packs coincides with some upgrades. At the top is a new Triumph SmartGuide which has been re-branded Triumph 5000 SmartGuide! Next is Triumph Care 3000. This model has been streamlined and has the addition of a large sensor on the rear of the handle that will illuminate if too much pressure is applied. Next is Professional Care 5000 which offers more function than ever before.

Oral Health recognises that different individuals have different needs and preferences, hence the diversity of the range. The addition of Professional Only packs is a further benefit to both patient and practitioners.

---

**Become HTM 01-05 compliant with Eschmann at Dental Showcase 2009**

Dentists who pay a visit to Stand N19 will be able to discuss in-depth issues regarding the latest HTM 01-05 guidelines with an expert to a viewing fully compliant with the requirements of this new directive. A team of dedicated Eschmann specialists will demonstrate how to follow ‘Best practice’ solutions programme that facilitates effective, validated instrument decontamination and disinfection, developed to help every practice meet HTM 01-05 Standards in a timely and cost effective manner.

On show will be Eschmann’s new, all encompassing Decosol DecoDent Room Calibration solution, designed to meet HTM 01-05 Best Practice requirements for in-surgery decontamination rooms. This will be further supported with the step by step Decosol 3D Advice & Solutions Guide which provides comprehensive reference information. The team will be on hand to help dentists to comply with Eschmann’s knowledgeable team; starting the process of creating the perfect, purpose-built decontamination room.

Visit the Eschmann stand at N19 to find the simplest and most productive step by step ‘Decon360 ’Advice & Solutions Guide’ which provides comprehensive standards’ in a timely and cost effective manner.

**English Rugby Star Will Greenwood Endorses Infection Protection**

Under Armour Performance Mouthwear™ is extremely excited to have English rugby legend, Will Greenwood, appearing at the Dental Showcase stand on the Friday of the 2009 BD&A Dental Showcase.

Capped 55 times and scoring 11 tries for his country, Will Greenwood will have his World Cup Win Worm Metal, be signing autographs and giving his endorsement to the innovative UA Performance Mouthwear™.

Visitors to the stand will have the chance to win a signed England shirt when they enter the prize draw.

Building on vast experience and knowledge of an impressive range of products, the UA Performance Mouthwear™ helps athletes in any sport unlock their full potential. By preventing or allowing athletes teeth from shifting, the custom-fitted mouthguard relieves pressure on the temporomandibular joints, preventing the excessive production of performance-sapping hormones.

Having placed in the World Cup winning team of 2003, Will Greenwood is familiar with needing to be at the peak of physical fitness for any information on Under Armour Performance Mouthwear™, please visit The Dental Directory Stand or email: sales@tandemx.co.uk.

**TANDEX invite dental professionals to sample ever FLEXI’ at BD&A 2009**

At this years BD&A stand, TANDEX are inviting members of the dental team to sample their leading interdental cleaning brush brand. As the name suggests, FLEXI is much more flexible than a tooth brush, more comfortable to the touch and genuinely more effective than other competitive interdental cleaning products.

Recent neurological research, carried out by TANDEX, has been astonishing, with patients demonstrating that emotion ultimately achieves patient compliance. The more patients perceive the brush and feel of the brush - the more likely they are to use it, meaning more effective cleaning taking place over a prolonged period of time.

Furthermore, the same neurological studies have demonstrated that TANDEX triggers a reaction in the Ventral Striatum, part of the Lymbic system where the brain region is responsible for building up preference to a brand.

Discover why so many practices are turning to TANDEX by visiting Stand D16 and asking to feel the difference by contacting the TANDEX team on info@tandex.co.uk.

**More dental news**

---

**Dental News is the place to go when you have your 3D dental scan done.**

Many dental practices have turned to dental scanning services to improve the accuracy and speed of their services. However, a number of dental practices are still using traditional methods to create dental models, which can be time-consuming and less accurate.

To ensure that patients receive the best possible care, a number of dental practices have turned to dental scanning services to improve the accuracy and speed of their services. However, a number of dental practices are still using traditional methods to create dental models, which can be time-consuming and less accurate.

By using dental scanning services, dental practices can create accurate and detailed models of patients’ teeth, which can be used for a variety of purposes, such as creating custom-made crowns or bridges, planning orthodontic treatments, and even detecting early signs of oral cancer.

Dental scanning services are now available in many locations, and are becoming increasingly popular as the technology becomes more advanced.

**Dental News is the place to go when you have your 3D dental scan done.**

Many dental practices have turned to dental scanning services to improve the accuracy and speed of their services. However, a number of dental practices are still using traditional methods to create dental models, which can be time-consuming and less accurate.

To ensure that patients receive the best possible care, a number of dental practices have turned to dental scanning services to improve the accuracy and speed of their services. However, a number of dental practices are still using traditional methods to create dental models, which can be time-consuming and less accurate.

By using dental scanning services, dental practices can create accurate and detailed models of patients’ teeth, which can be used for a variety of purposes, such as creating custom-made crowns or bridges, planning orthodontic treatments, and even detecting early signs of oral cancer.

Dental scanning services are now available in many locations, and are becoming increasingly popular as the technology becomes more advanced.
