New Picasso laser launched by Velopex

With a growing reputation as the ‘front of knowledge’ in Dental Laser technology, the team at Velopex have launched a super compact benchtop Dental Laser. The unit features: Colour touch screen operation and includes a colormetric beam display. The Velopex Deco Laser is very easy to operate with a user-friendly, menu based, touch screen control system that is easy to navigate – with 8 buttons. The unit itself can fit neatly onto or into standard dental cabinets.

Velopex are very proud of their laser training and product support – which keeps customers coming back for repeat purchases.

With a price of just £4,995 + VAT for the complete package including case, 3 pairs of glasses as well as a 2-year warranty - this is set to become a big seller. Not only that, this price includes an Aquaplast Quattro single channel unit – giving practitioners with both tips and tons of features: Colour touch screen operation and includes a handle as well as fibre tip السود.

The Aquaplast Quattro Single provides all the benefits of its bigger brother – the ability to provide excellent (best in the market) stain removal as well as cavity preparation and composite repair. Use this before any bonding for fantastic results.

Quality not Compromise

Tone Dentarum

Genus is renowned for offering extensive design and construction expertise to the dental market, whether for refurbishing or fitting out a practice. The team at Genus make it their business to know their clients in order to deliver designs that are highly efficient, fully compliant and closely in line with the dentist’s vision for the space.

Genus oversees the construction phase to maintain close control over the progress of the project and to schedule work effectively. Genus employs its own project managers, trades people and labour teams and, apart from some specialist services, does not use sub-contractors.

Genus is not tied to any particular manufacturer, which means they can choose the best solution for each project. When Genus specifies furniture and equipment for a project, it is based on the client’s requirements and the overall design.

Genus delivers effective practice designs and high quality interiors that are completed on time and to budget.

For more information please call Genus on 01582 404044 or email info@genusgroup.co.uk or visit www.genusinteriors.co.uk

DRYBRUSH Intermediate Brushes

The Astera Bio-Technology formula of SensiShield™ Toothpaste mimics the way saliva in the mouth naturally co-aggregates dentine and tooth surface-eroded enamel.

The main benefit is that each brush has a flexible handle and brush to increase control and access to difficult areas. Unlike other brushes, the tip has been specially designed to finish.

The same could apply to Dental Professionals and Philips has launched its latest SensiCare range of PPFs with the latest technology for the mouth.

The brush is enriched with new features specifically designed to motivate patients to brush the way they need to as they address their periodontal conditions.

So that they can access FlexCare™ before recommending it, Philips is offering Dental Professionals an exclusive opportunity to trial the brush with it’s built-in UV brushhead Santiser before the dispensing models are available in early 2010. To find out how to have the new Sensicare website www.sensicare.co.uk/pf and fill in a form or call 0800 0567 222.

For more information call Tavom UK on 0870 752 1121 or visit www.tavom.com

Easypath™ Compact

Vita, the world-leading expert in shade determination brings you the new Easypath™ Compact, a fast and reliable way to take shade at the push of a button. Consistent measuring accuracy due to 3 spectrophotometer measuring components, this cordless, mobile and lightweight unit roads up to a potential work 39 shifts combination, both in Classical and in the 3D systems. User friendly and easy to learn, with Easypath™ Compact, you can read one single shade or 3 different areas in the tooth. You can also monitor your quality control by using the handy restorations’ facility. Up to 25 shades taking results can be stored in memory.

By using LED technology, Vita has ensured that the Easyshade ™ Compact ‘life time’ still in tact. To place an order, receive further information or samples to try please call 01689 88 17 88 for details.

The Fusion of Style and Function

If you are looking not only to refresh but also to transform your practice, look no further than Tavom.

A company who, for 70 years, has embodied the philosophy of constant improvement in both their service as well as their products, Tavom are experts in guiding you through the process from start to finish.

A team committed in employing CAD technology to transform ideas into tangible results will deal with every detail of your requirements. The innovative design of cabinets such as the popular Lava range provides practicality and style and an integrated combination to create surfaces and storage which maximise space, no matter how limited.

There is the option of ultra-refined ‘Y Glass to give an ultra-modern finish to create visually elegant surroundings.

For excellent resistance to corrosion, the Kamal range includes stainless steel units whose hardwearing surfaces offer hygiene functionality with a sleek, contemporary look.

Take a moment to visit the website and you will be amazed by the fusion of style and function to create spectacular results for your surgery.

The British Academy of Cosmetic Dentistry presents the latest in its series of Study Club, Lectures, to be held at the British Dental Association, London on Tuesday 26th January 2010.

Entitled Impression Free Dentistry: Are We There Yet? Dr Ilan Press will explain how digital impressions can have a significant impact on the way dentists practice.

The focus is the new 3M Lava Chairside Oral Scanner and the lecture will cover:

• An overview of the technology involved
• Clinical tips for capturing data
• Interpretation of data post treatment communication between dentist and lab
• Clinical cases and photos for onlay, veneers and all-ceramic crowns

The lecture will also feature a practical element, allowing attendees to use the equipment.

Dr San Prakash is a member of the BCCD, BACD and ADI. Part of the Bros Lane Dental Practice since 2002, San won the 2009 Restorative Smile of the Year Award at the prestigious Smiles Awards.

Places are limited for this event and so booking early is recommended.

Panadent Minamint ZINC - The Next Generation of Mouth Rinse products

Panadent is pleased to announce the next generation of dental mouth rinse is launched with the introduction of Minamint Zinc.

Now all that has changed.

Panadent has managed to engineer a small amount of Zinc into the formulation for Minamint’s Concentrated Mouth Rinse. Zinc in low concentrations is known to reduce levels of Volatile Sulphur Compounds in the mouth.

By mixing with Minamint Zinc, patients not only benefit from the fresh clinical experience and freshness provided from original Minamint’s unique high quality formulation but also will assist to reduce unpleasant odours and taste associated with dental procedures and poor oral hygiene practices, during and post procedure.

Minamint Zinc is recommended for all dental surgeries as a effective mouth rinse with additional benefits, Panadent is offering a special introductory trial offer to let you try the advantages for yourself of buy 2 get 1 free, which brings the unit price per 100ml bottle to 16.35 + vat each. Call Panadent today at 01869 184 966 for details.

The Exclusive knurling pattern goes right to the tip, giving a much firmer grip. The handles are not only the lightest on the market, but are also extremely tactile. The Predator Turbo burrs are manufactured using the latest Swiss made precision and automated processing. The unique sharp blade design and multiple cross cuts provide the ideal combination for quickly and easily removing tooth structure. Its unique sharp blade design and multiple cross cuts provide the ideal combination for quickly and easily removing tooth structure. Its unique sharp blade design and multiple cross cuts provide the ideal combination for quickly and easily removing tooth structure.

Faster Impressions with GC Exafast NDS

GC has produced a range of impression materials that set in super fast time with Exafast NDS.

The Exafast NDS family of addition cure impression materials contain the perfect balance of speed and accuracy. The system is exceptionally easy to use and sets in under twenty seconds at 20°C. The Exafast wash material is available in 5 viscosity types to suit your preferred technique. All supplied in cartridges and speed and ease of application. As the material sets so quickly there is less risk of distortion due to movement during the setting.

For further information please contact GC UK Ltd on 01808 219899 or e-mail gcinfo@dentalmail.co.uk

Faster Cutting with Prima Dental Group

Predator Burset is the original one piece metal cutting carbide, ideal for rapid removal of all dental materials, amalgams, and precious and non-precious metals, tooth structure. Its unique sharp blade design and multiple cross cuts provide the ideal combination for crown removal and endodontic access.

Predator burset technology considered the ultimate in premium rotary endodontic technology, received USA Dentistry Today’s highest accolade of Top 100 products.

The secret of Predator burset’s success lies in its subtle aggressiveness whilst its unique tooth geometry and flute design supply the cutting power necessary for efficient crown access.

Predator burset is manufactured using the latest Swiss made precision machine tools. As a result of their optimal design, quality materials and exacting engineering obvious Predator burset to cut faster than straight bladed burrs and smoother than traditional burs. Predator Burs are the strongest, sharpest, most durable burs of their type.

All shapes are available in a unique Solo Peel blister 10pce pack as well as convenient clinic 100 pack. For further information please contact Prima Dental Group on 01423 701717 www.primadentalgroup.co.uk
