Sirona CEREC® provides the team at Velopex with the highest comprehensive compressive strength in CRA testing and was found to be stronger than some “packable” composites. This innovative composite material delivers reliable, practice-enhancing results with ease.

For further information or to ensure your place on the next advanced course please contact Ceramic Systems Limited on 01932 582505 or email integrity@ceramic.co.uk.
Kenmed products provide effective protection against bacteria and viruses Kenmed Practicaclean Spray and sponges and Kenmed Chlorhexidine foam and sponges, are specifically designed to provide a safe inactivation of influenza A (H1N1) virus (pathogenic strains) in saliva. These products should be used for daily disinfection of surfaces close to the patient, frequently touched surfaces (e.g. dental chair, door handles, dental tools). The disinfection of hands and surfaces and also contaminated instruments play a major role in preventing the human-to-human transmission of the currently circulating seasonal flu virus which belongs to the group of influenza A viruses, type H1N1.

All equipment, medical devices in direct contact to the patient have to be disinfected and sterilised after use and before use on another patient. Kenmed InstrumentSafe is suitable for the safe inactivation of influenza A viruses at the respective concentration rates and exposure times of the product.

Using Kenmed Cross-infection control products will help a Practice maintain its high standards of patient care.

For further information on specific offers or to place orders call Helen on 01793 770056 or visit our website www.kenmed.co.uk.

Genus is renowned for offering extensive design and construction expertise to the dental market, whether for refitting or fitting out a practice. The team at Genus make it their business to know what their clients in order to design projects that are highly effective, fully compliant and closely in line with the dentist’s vision for the project.

Genus oversees the construction phase to maintain close control over the progress of the project and to schedule work effectively. Genus employs its own project managers, trades people and labour teams and, apart from some specialist services, does not use sub-contractors.

Genus is not tied to any particular manufacturer, which means they can choose the best solution for each project. When Genus specifies furniture and equipment for a project, this is based on the client’s requirements and the overall design

Genus delivers effective practice designs and high quality interiors that are

dentists can recommend their services to a large pool of potential patients.

Some of the many benefits Dentists receive from the Munroe Sutton plan are:
• Access to many potential new patients
• Support with marketing their practice through the scheme, which encourages patients to visit the dentist regularly and helps them afford desirable treatments such as aesthetic dentistry
• No long-term commitment. Dentists can cancel their participation with a simple 30-day notice period.

Simple, effective and tried and tested millions of Americans, Munroe Sutton offers increased profitability for UK dentists with no extra outlay.

For more information call 020 7867 8584 or visit www.munroesutton.co.uk/dentist

The Fusion of Style and Function
If you are looking not only to refresh but also to transform your practice, look no further than Tavom.

A company who, for 30 years, has embodied the philosophy of constant improvement in both its service as well as its products. Tavom staff are experts in guiding you through the process from start to finish.

A team comprised in employing CAD technology to transform ideas into tangible results will deal with every detail of your requirements. The innovative design of cabinets such as our new Denti-Brush complete with ‘Pivot Technology’ reduces the pressure and stress on the wire control and access to difficult areas. Unlike other brushes, the tip has been specially designed to motivate patients to brush the way they need to be in order to address their periodontal conditions.

So that they can access FlexiCare+ before recommending it, Philips is offering Dental Professionals an exclusive opportunity to trial the brush with it’s built in UV brushhead Santiser before the dispensing models are available in early 2010. To find out how visit our new Sonicare website www.sonicare.co.uk/dp and fill in a form online or call 0800 0567 222

The British Academy of Cosmetic Dentistry presents the latest in its series of Study Club Lectures, to be held at the British Dental Association, London on Tuesday 26th January 2010.

Entitled Impression Free Dentistry: Are We There Yet? Dr Iain Presci will explain how digital impresions can have a significant impact on the way dentists practice.

The focus is the new 3Shape Chairside Oral Scanner and the lecture will cover:
• An overview of the technology involved
• Clinical tips for capturing data
• Interpretation of data and communication between dentist and lab
• Clinical cases and photos for onlays, veneers and all ceramic crowns

The lecture will also feature a practical element, allowing attendees to use the equipment.

Dr San Prasad is a member of the BSOA, BACD and ADI. Part of the Bow Lane Group.

To book your place contact Dr Prasad on 0113 241 3852 or email s.prasad@bixon.co.uk.
Kavo Everett CAD/CAM

The introduction of CADCAM technology to the Health care market has seen tremendous advances. New technology is being developed and released all the time. The Kavo Everett CAD/CAM system offers you the most up-to-date technology in a single, easy to use system.

Before starting the system set-up process, you first need to make sure you have the following:
- A computer with a high-speed internet connection
- A printer with a high-quality print resolution
- A scanner with at least a 1200 dpi resolution

Once you have all the necessary equipment, you can start setting up the system:

1. Connect your computer to the network
2. Choose the installation language
3. Agree to the software license agreement
4. Register your software
5. Define your printer settings
6. Define your scanner settings

Once you have completed these steps, you can start using the Kavo Everett CAD/CAM system to create digital models and designs for dental restorations.

Kerr/Casteron and their white chili pearls.

The Kerr/Casteron white chili pearls are the perfect choice for creating beautiful, durable restorations. They are made from a combination of lithium disilicate and zirconia, providing exceptional strength and aesthetics. These pearls are available in a wide range of shades and can be customized to match the natural color of your patient’s teeth. The Kerr/Casteron white chili pearls are perfect for creating crowns, bridges, and veneers.

Kerr/Casteron also offers a variety of other products for dental professionals, including composite resins, adhesives, and sealants. These products are designed to help you create beautiful, long-lasting restorations that are easy to use and cost-effective.

In conclusion, the Kerr/Casteron white chili pearls are a great choice for creating beautiful, strong restorations. They are made from high-quality materials and are designed to provide excellent results. With a wide range of shades and customizable options, these pearls can help you create restorations that are both functional and aesthetically pleasing. Try the Kerr/Casteron white chili pearls today and discover the difference they can make in your practice.
