In May 2009 Dr Sanz received a grant from Curaprox to update her skills, whilst lecturing on implants and prosthetics to GDPs at the Harley Street clinic. Periodontist and Prosthodontist in referral clinics in Harley Street and Reading, Dr Sanz keeps her skills updated by attending numerous advanced courses and by keeping side-effects to a minimum.

The results of three independent studies have shown that:

• CURAPROX ADS works exactly as a CHX mouthwash should work.
• CURAPROX ADS very nicely works as an oral based treatment whilst keeping side-effects to a minimum.
• CURAPROX ADS only rarely causes a change in taste perception.

One study, which compared the efficacy of Curaprox's patented anti-discoloration system, to that of a traditional 0.2% chlorhexidine mouthwash, found that whilst both products offered similar plaque-fighting abilities, an advantage of the study showed a 'lesser tendency to staining of the tooth surface during the treatment cycles with mouthwash containers' compared to the ones with traditional mouthwash.

For free samples or for more information please call 0140 963 0240, or email info@curaprox.co.uk or visit www.curaprox.co.uk

Kavo SYSTEMS – Simplicity to suit everyone.

The Kavo SYSTEMS range of units to meet the budgets of all dental professionals. Whether you are a solo practitioner, a small group practice, or a large dental centre – Kavo have the perfect solution for you.

Kavo EÓS E100 – Simple to use. Simple to expand. Simply more reliable.

The new Kavo EÓS E100 treatment centre simply offers more comfort to make your working day easier. The E100 allows Kavo, the leading equipment supplier to close the gap between the time-proven Primus 105 and the EÓS E100, while defining and occupying a new market segment.

The EÓS offers intuitive user-interfaces of the dentist and assistant elements, features patient controls, for ease of use. The freely selectable handpiece configuration on the dentist element has the option of 0 or 6 handpiece holders, providing essential flexibility today and in the future.

The design minimizes recesses making all surfaces hygiene- and patient-friendly. The single-piece components for interchange/nutation. Panels are sealed or close-off, preventing dirt and debris entering the treatment centre. The automatic HYDROLink function ensures the continuous operability of your unit. The integrated Kavo SMARTInnovations TECHNOLOGY motor control, puts full torque and particularly low vibration start-up characteristics at your finger tips, even in the low-speed range of 100 rpm.

For information regarding the full range of Kavo products, Freephone 0800 218020.

"The implantologist has changed my approach to cosmetic dentistry".

The implantologist offers dentists and patients a fast, mildly invasive alternative to inevitable bony reconstruction. Fast, effective and life-style friendly, the implantologist gently but effectively straights anterior teeth and eliminates the use of a single removable device.

Dr Philip Lewis BDS uses the implantologist in his cosmetic practice, Avenue Road Dental Practice on the Isle of Wight. "It’s no exaggeration to state that the implantologist has changed my approach to cosmetic dentistry" says Dr Lewis.

"I’m happy to note that many of my patients will have spared the discomfort of long tooth preparation appointments, preserve many more undamaged teeth and save my patients money. For me, I get to do more interesting cases, give more people the smile enhancements they want and gain the satisfaction of knowing I’m treating them in a minimally invasive way. Thank you, Straight Talk Seminars, you’ve helped my cosmetic practice grow!"

For more information, or to book your place, please contact Caroline on 0127 2515259, 88 KJ or visit www.straight-talk.com
