The BACD 2011 Conference – something to smile about!

"The UK dental market will see an increase in demand for cosmetic dentistry." – Dr Shushil Dattani BDS, MFGDP(UK), DipImpDent

The BACD believe that successful smile design and conservative dentistry can be combined to preserve and enhance a patient’s natural dentition in an ethical manner, whilst simultaneously respecting key dental principles.

Bringing together dental professionals with some of the world’s foremost speakers and experts, the Eighth BACD Conference will take place between the 11th – 12th of November at the Hilton London Metropole Hotel, London.

Attendance is limited, so be sure to book your place for this unmissable event. Early bird offers admit to preferential booking rates, as well as the chance to win an all expenses paid trip to the DGM in Hamburg.

For more information about membership entitlements, including access to next year’s conference, please contact Suzy Rowlands on 020 8241 8520. Or email suzy@bacd.com.

Curasept – offering the full benefits of Chlorhexidine without the disadvantage

"Clinical proven to effectively control the bacterial pathogens responsible for gingivitis and periodontal disease, the Curasept ADS system from Curasept offers the full benefits of the tried and tested oral treatment whilst keeping side-effects to a minimum. Thanks to the Curasept ADS, anti-discussion system, and lost alcohol content, patients can enjoy effective antimicrobial and anti-secretory hygiene regime without experiencing irritation of the oral mucosa, brown discoloration of the teeth or impairment of taste sensation.

The results of three independent clinical studies have shown that:

• CURASEPT ADS works exactly as a CHX mouthwash should work.
• CURASEPT ADS only rarely causes a change in taste perception.
• CURASEPT ADS only rarely causes an increase in salivation.

One study, which compared the efficiency of Curasept’s patented anti-discussion system, to that of a traditional 0.2% chlorhexidine mouthwash, found that whilst both products offered similar plaque-fighting abilities, an analysis of the State Index showed a lesser tendency to staining of the tooth surface during the treatment cycles with mouthwash containing Curasept compared to the ones with traditional mouthwash.

For free samples or for more information please call 01480 862084, email info@curasept.co.uk or visit www.curasept.co.uk.

The Dental Directory donates to Children In Need

During the month of November The Dental Directory will donate a £1 donation per Oral Hygiene products bought by customers of Kent Implant Studio.

As the UK’s largest dental supplier, The Dental Directory carries one of the most comprehensive ranges of oral hygiene products available – all ready for next day delivery, and all at fantastically low prices. So remember to order your oral hygiene products from The Dental Directory and support Children In Need.

Big bite is our dedicated oral hygiene mini catalogues containing the very latest products from all the leading manufacturers. Every issue is packed with special offers and promotions designed to offer you the very best in choice and value for money.

To get your free copy of Big Bite and further information on our donation call us today on 0800 585 566.

Kavit® ESTICA ES0: Simple to use. Simple to expand. Simply more reliable.

The new Kavit® ESTICA ES0 treatment centre simply offers more comfort to make your working day easier. The EOS allows Kavit® the leading equipment to close the gap between the time-proven Pictus 1050 and the ESTICA E70, with defining and occupying a new market segment. The EOS offers intuitive user-interfaces of the dentist and assistant element, features like on-board calibrator, for ease of use. The finely-selectable handpiece configuration on the dentist element has the option of 0° to 15° handpiece holders, providing essential flexibility today and in the future.

The design minimizes recooling. Making all surfaces hygienic and easy to clean, with the interdigitated components for easy disassembly/maintenance. Panel are sealed or close-off, preventing dirt and debris entering the treatment centre. The automatic HYDROclean function ensures the continuing operability of your unit. The integrated Kavit® SMARTflow INFOR-MATION TECHNOLOGY motor control, puts full torque and particularly low vibration start-up characteristics at your finger tips, even in the low-speed range of 100 rpm.

For information regarding the full range of Kavit® products, Freephone 0800 218200.

Under Armour Performance Mouthwear™ now once in the news

This summer, Under Armour Performance Mouthwear™ technology, which helps sportsmen to improve their performance through increased strength and endurance and increased anaerobic power, was invited to grill pro, Ross Fisched's decision to give the innovative UA mouthguard a try ahead of his summer PGA tour.

 Fischer is keen to benefit from the patented Armoursuit™ technology, which helps sportsmen to improve their performance through increased strength and endurance and increased anaerobic power. The article also helped to correct the popular misconception that all mouthguards are uncomfortable and affect your speech.

Over in the US, the mouthguards have attracted the attention of Time magazine journalist, Stephen Gandel, who recently spent several weeks training at a US-mouthguard.

Reportedly tested in the USA over fifteen years, Under Armour Performance Mouthwear™ has become increasingly popular with a number of professional sports players and officials, making it the must-have product for dentists wanting to offer their patients the best mouth protection available on the market today. For more information on how your patients can benefit from Under Armour Performance Mouthwear™ call Runners on 01452 872 266 or email info@runnerslive.com or visit www.runnerslive.com.

Nuosse MFD from Blackwell Supplies – a triple enzyme bacteriocin designer clear for use in wards and intensive care units

As one of the country’s leading suppliers of surgical supplies, Blackwell Supplies understands the need for effective solutions to instrument decontamination.

Nuosse MFD has a number of unique selling points, including:

Should I go Limited?
Since July 2006 dentists have been able to become a Limited Company. Many have seized the opportunity, but it is not the right step for everyone. Lansdell & Rose, Chartered Accountants and Independent Business Planners specialise in incorporation and offer bespoke advice to suit your situation. Lansdell & Rose do not simply incorporate companies and instead offer advice for durable and long-term business solutions to make your transition as smooth as possible. Setting up a Limited Company can hold many benefits including:

• Limited Liability - shareholders are limited to the capital they introduce
• Enhanced professional and personal credibility
• Taxation benefits - Taxation can be reduced by 30% or more* Specific to your situation. Lansdell & Rose do not generally endorse ‘tax-schemes’ and prefer to offer you a solution that is right for you and if so you will benefit, instead of offering advice for durable and long-term business solutions to make your transition as smooth as possible.

For further information please contact: www.lansdellrose.co.uk or call Lansdell & Rose on 020 7376 9333

DENTSPLY FatFix!
Your Path to Success
DENTSPLY has launched the new FatFix® range of rotary instruments for the mechanical creation of the glide path and for prefabricating root canals.

Flexible and resistant to cyclic fatigue, 16% alloy FatFix® rotary instruments offer the clinician numerous advantages over their manual counterparts.

FatFix® rotary instruments have been designed to create the glide path rapidly and safely, reducing instrumentation time and offering the patient a more comfortable experience.

A gradual increase in the diameter facilitates the progression of the file without the need for strong axial pressure. This helps to better maintain the original cavity anatomy.

Available in three ISO sizes (2013, 2113 and 2115), practitioners are able to order FatFix® with a choice of six standard handpieces.

For more information, or to book an appointment with your local DENTSPLY Product Specialist, call 0800 072 3313 or visit www.dentsply.co.uk

Implant Dentists race to the front
A clean cut of how was shown by the winning Dental Implant team during the recent Biocomposites “Ready Set Go” track during the novasources 2010 exhibition.

The event was part of an educational day run for dental practitioners by Biocomposites, the specialists in next generation bone grafts and manufacturers of the unique synthetic material, Protoss Vital.

This pre-framed sheets of HandiDam eliminated the need for the shoulder finishing and uncomfortable frame HandiDam is easy to place on the patient and it allows ease from the oral cavity and specific treatment sites during the dental procedure.

It not only saves time in the surgery but it allows the patient to be much more comfortable and relaxed.

It is especially great for endodontics.

It is packed with numerous benefits:
• 2000 x 97 x 97

For more information please call: Viborg Salus 020 865 2193 and ask for product code U MAC93IF, Aseptico HandiDam Pre-Framed Latex Rubber Dam (Blue).

Aseptico products in the UK, supported by Viborg

Grandio®SO - so tooth-like!
Grandio®SO, the new nano-hybrid restorative for all classes of cavity restorations, is designed to offer best in class properties for restorations in anterior and lateral regions. This includes; 1 to V restorations, reconstruction of traumatically injured anterior teeth, simultaneous and splitting of biosensed teeth, correction of shape and colour to enhance aesthetic appearance, core build-up for crown and inlays, and the fabrication of composite repairs.

Grandio®SO stands out due to its superior material properties and is the most tooth like restoration system on the market. Due to its unique formula, it can be used in all regions.
