GSK to sponsor Chris Deery’s lecture entitled “What’s new in Paediatric dentistry?” - Visit Stand 25/26 at BSDHT.  

**NEW Optra-Stick**

It can be very difficult to pick up, position and precisely place small and fiddly indirect restorations. New OptraStick, from Ivoclar Vivadent, enables dentists to easily handle indirect restorations and other small items.

**Great opportunity available on Kemdent InstrumentSafe**

InstrumentSafe is one product within the new, high quality range of Kemdent Cross Infection control products. It is available in 1 litre dispensing unit and 5 litre and 10 litre refills. InstrumentSafe is a pre-sterilisation preparation which is effective against a greater variety of microorganisms than any other chemical disinfectant. It provides fully compliant water continuously, eliminating the need to buy expensive bottled purified water.

The Biopure has a unique wrap around space saving reservoir from which the water is continuously recirculated through the purification system to ensure that the treated water is always of the required purity. Maintenance, including changing the treatment cartridge, is minimal and can be easily undertaken by practice staff.

Practices can purchase Biopure outright or take advantage of ELGA Process Water’s “All-in-Pack” rental agreement. The Practice simply pays a fixed quarterly payment by direct debit and ELGA Process Water provides the water treatment plant and services it.

For complete confidence in your infection control process, invite Eschmann’s Little Sister into your practice today.

**An Introduction to CEREC® - Evening Courses with 3 hours CPD for the Dentist and Practice Members**

It is important for a practice, in these times and age to promote financial stability and raise their revenue whilst trading in difficult times. This is achievable with the CEREC® CAD/CAM System.

Now is the perfect time to begin your CEREC® experience with 'An Introduction to CEREC® Evening Seminar, where you will be able to see for yourself how this well-established and scientifically proven clinical procedure can offer your patients accurate and quick chairside restorations in a single visit and reduce your lab fees dramatically.

Sponsored by Henry Schein Minerva, these practice-building seminars will be led by Dr Julian Caplan in Cardiff on 4th December and Dr Jamie Newlands in Glasgow on 9th December. Costing only £35 per dentist, you can also bring along 2 practice members FREE of charge, combine this with 5 hours verifiable CPD and ‘An Introduction to CEREC®’ for any dentist looking to use tomorrow’s technology, today!

To book your place today or for more information, please call Sue O’Bourke on 029 204 2018.

**An Introduction to CEREC® - Evening Courses with 3 hours CPD for the Dentist and Practice Members**

**Put Your Confidence in Little Sister**

Little Sister Self-Checking autoclaves let you benefit from reproducible and reliable results, with dual independent processors executing and monitoring every cycle to ensure that the equipment is functioning perfectly every cycle.

Other features include intuitive One-Touch Operation to reduce user error and the Advanced User Option which lets the practice manager limit the cycle options to prevent misuse. With this secure and verifiable sterilisation process, you can safeguard the wellbeing of patients and staff.

The last word in maintenance, EschmannCare is yet another reason why Eschmann outstrips the competition. Autoclaves and Washer Disinfectors are supported by CarePlan cover with annual visits from qualified engineers trained in the expert use of the equipment. CarePlan cover includes a full service schedule, preventative maintenance, unlimited breakdown visits, certification and training updates.

**800th Aquael Quattro**

Fulham, in London, is now firmly on the map as the latest abrasion is concerned! The new 800th Velopex Aquael Quattro has been installed at Dr Mawani’s busy Fulham Dental Care Practice in Fulham Road. This light and airy building provides a superb backdrop for this busy dental practice – which offers full and partial dentures, as well as ability of fluid abrasion. Cleaning and Treating, in a calm soothing environment. Dr Mawani commented: ‘I’ve been thinking about it for a while and now I’ve got it on a trolley with the Velopex Colour Laser. It’s an essential part of modern technology in a modern practice’.

The Velopex Aquael Quattro contains two chambers, which can accommodate any combination of the 5 Cleaning and Treating media available. The 55g Treating powder allows the clinician to ablate hard tissue (Composite, enamel and dentine) creating a relatively rough surface – which is ideal for the latest bonding and restorative systems. The high Temperature powder gives the clinician a much smoother cut for finer work. For Cleaning, the Bioclean agent offers smooth surfaces and can be removed by simple irrigation or air/ water spray.

The Velopex Aquael Quattro is easy to operate with a simple digital control system to navigate the unit. The self clinching design is easy to navigate. The unit itself can be fitted neatly onto standard dental cabinets or a trolley. The delivery system allows complete and free movement of the handpiece in Dr Mawani’s hand – allowing his patient’s to settle back without the noise and vibration of conventional drills.

**Biopure 7/15**

Many dentists are starting to prepare for possible change in regulations that will require their local disinfection units (LDU), to be supplied with water that meets standards such as HTM 2050. ELGA Process Water has introduced the BioPure 7/15, a bench-top version of its award winning BioPure water purification units. The compact unit simply connects on to a mains water supply and provides...
