BioHorizons announces dates for the 2011 calendar
Following a busy and exciting 2010 for BioHorizons and on the back of their highly successful congresses in Colombia and Turkey, BioHorizons is pleased to announce the 2011 dates for the Global Symposium and Ultimate Implant Year Course.

In Phoenix, Arizona on April 28 – May 1, 2011 BioHorizons Global Symposium will be held at the gorgeous Arizona Biltmore Hotel with topics that include immediate loading, aesthetics, tissue regeneration and implant complications. Addressing a wide range of implant dentistry challenges, it’s the perfect opportunity to stay ahead of the latest treatment options while enjoying time with colleagues in the unique landscape of the Sonoran desert.
In 2010 was an exciting year for BioHorizons with the launch of Lck 3.3mm, (the first 3mm implant to incorporate Laser-Lock technology to create a biologic seal and maintain connection on the implant collar) followed by the introduction of a 600 delegate attendance at the Symposium in Turkey in September.

For more information on BioHorizons implants, Biologic range, courses and Symposium or to arrange a meeting with your local product support contact contact the UK office now on 01344 752560, email suzy@bacd.com or visit the website at www.biohorizons.com.

The Dental Directory: Maximum Benefits from DENTSPLY products
For now until the 24th December, dental professionals can enjoy exclusive and competitive offers on a range of DENTSPLY products they buy from the Dental Directory.
Many of The Dental Directory’s DENTSPLY promotional prices are an unbeatable 60% lower than the manufacturer’s own, and with such a wide variety of DENTSPLY products to choose from, why purchase your dental supplies from anywhere else?
Excellent discounts are available on products including:
• Air-Foars – Thymozym-Instrument – Arch Polysyn® – Sanifill® – Dispersalloy® – And much more!
As the UK’s leading distributor of DENTSPLY’s leading aesthetic products, Citerals® and X-filane®, The Dental Directory is truly the perfect opportunity to stay abreast of the latest treatment options while enjoying time with colleagues in the unique landscape of the Sonoran desert.

Smartseal is a simple two part endodontic root filling system using radiopaque hydrophilic polymers. The hydrophilic obturant points expand with the natural root canal walls to create the glide path and fill the voids.
Smartseal has gained approval for its innovative endodontic root filling systems from the United States regulatory body, the Food and Drugs Administration (FDA).
The FDA, which is part of the US Department of Health and Human Services, is responsible for protecting public health by assuring the safety, efficacy and security of drugs, biological products and medical devices.

For more information about membership entitlements, including access to the Pre-registration Compliance calendar, the BDA plans recently held their first ever Dental Forum.

Ten dentists from across the UK ranging from Cardiff, London, Worcester and Derby, ventured to Nottingham, where they were joined by President of the BDA, Dr Andrew Edwards, National Clinical Director from Practice Plan and BDA President, Amarjit Gill who shared the forum.

The forum was organised to provide an invaluable opportunity for a range of dentists to exchange views on the current challenges facing dentistry. Topics that were discussed included the impact of the future regulation regime (COQC/HTM0 105), to marketing dentistry, with particular focus on the use of social media and the impact of new advertising technology, where consideration was given to the use of the forum as a future testing ground for such developments.

Following the success of this initial gathering, Practice Plan is now intending to hold at least two forums a year onwards.
If you would like any further information on Practice Plan, please visit www.practicoplan.co.uk or call 01631 684635.
