Acid Erosion. A way forward.

Sensodyne Pronamel helps reharden enamel.

From Sensodyne: a toothpaste that helps protect at-risk patients from the damaging effects of erosive tooth wear, an emerging issue, as diets high in acid increase in popularity.

Sensodyne Pronamel helps remineralise and reharden acid-softened enamel, with its high fluoride availability and low abrasivity. Sensodyne Pronamel is also specially formulated for sensitive teeth, while offering effective cleaning and freshening. Use twice a day, every day.

So when you identify the signs of acid erosion, you can recommend Pronamel from Sensodyne.
