Dental Carve is manufactured in Swindon by Kentmed. This Glass Ionomer is unique because it is based on a distinct ingredient, a specialist glass polyphosphate cement.

This ingredient contributes to the many advantages of Dental Carve, including versatility and strength, saliva resistance, excellent finishing qualities and wear resistance properties. There is no need to worry about dimensional change or post-operative sensitivity when you use Dental Carve.

Dental Carve is designed for Class 1 and Class 2 restorations together with class V abra- sion cavities. It is also used for restorations in deciduous teeth, core build up, amalgam repair and the cementing of posts in root canal treatments. It is available in 7 shades.

Dental Carve has a pack- age consistency which is chemically cured and rapid snap set into position. The restoration is waterproof once the chemical snap set is complete. The consistency of the mix of Dental Carve, its dura- bility and ease of use will help a dentist perform restorations accurately and quickly.

DIAMOND CARVE Autumn SPECIAL OFFER - Buy any 2 Dental GIC products and receive the lowest priced item for £10.00

SmartCem™2 Self Adhesive Resin Cement

SmartCem™2 is a self-adhesive cement from DENTSPLY, indicated for the cementation of composite, ceramic and metal-based inlays, onlays, crowns, bridges and posts.

The real benefit of SmartCem is the application and handling compared to the other self-adhesive cements on the market. Because it uses an automix delivery system, it means you have the hassle associated with hand mixing and ensures you always have enough material to hand (unlike capsules where you can easily use up your material mid-way through the procedure).

The “gel-phase” of SmartCem 2 ensures easy clean-up of mate- rial and can be initiated quickly within a few seconds of a curing light, reducing the waiting time and ensuring a quicker total pro- cedure.

SmartCem 2 is available in five shades (light, medium, dark, translucent and opaque) to ensure an aesthetic result.

For more information on SmartCem 2 or to arrange a free on-site demonstration, please contact DENTSPLY on +44 (0)800 072 3315.

NEW Velopex E/F Speed Dental X-Ray Film

Velopex is proud to announce the latest addition to the range of high quality imaging products for Dentistry.

Velopex E/F Speed Adult Den- tal X-ray film is available in pack- ets of 150. This speed of film re- duces the amount of radiation needed to produce exceptional quality images – compared to E or D speed Dental X-ray films.

Packed in soft and gentle plastic, coloured pink, the film packs are patient friendly whilst retaining the solidity required to avoid retakes due to bending.

The packs are tightly sealed to allow the use of cold sterilising solutions – post exposure – with- out leaking.

This new film complements the Velopex D speed and Velopex E speed film ranges as well as the Velopex Digital x-ray systems to give a unique and comprehen- sive ability to take Dental Radi- ograms in what every way you choose – time after time.

For more information please call Velopex Sales on 020 8065 2915, or your normal Dealer.

InstrumentSafe is one prod- uct within the new, high quality range of Kentmed Cross Infec- tion control products. It is avail- able in a 1 litre dispensing unit and 5 litre and 10 litre refills. In- strumentSafe is a 9% sterilisation concentra- tion which contains 60% alde- hyde and phenol-free. It is an easy to dispense concentrate that is suitable for both thermo-labile and thermo-stable instruments.

InstrumentSafe can be di- luted to different concentrations depending on the time available. 40 ml of InstrumentSafe makes 1 litre, 4% concentration soak. This concentration kills harmful bacteria including HIV/FV/IV, vaccinia are Tuber- culous and Hospitalism pro- phyaxis after 15 minutes of soak- ing. InstrumentSafe kills MRSA.

Kentmed customers require high quality, value for money products. Kentmed pride them- selves on a range of cross infec- tion control products which have no overpowering odour, are safe and pleasant to use, are gentle on the user but above all powerful against harmful bacteria.

For further information on special offers or to place or- ders call Helen on 01793 779250 or visit our website www.kemdent.co.uk.

Achieve Results With Artio™

Artio™ has arrived at DENTSPLY. The new range of instruments has been devel- oped to accompany the cli- nician with its ergonomically de- signed handle with excellent grip.

The super-lightweight in- struments have tips made from Ash CryoSteel, a cryogenically treated metal that is highly re- sistant to wear, for extra dura- bility.

All of the instruments are colour-coded for specific uses, such as Burnishers and Plug- gers in Aqua and Carvers in Or- ange Cadet.

Mr. Bill Sharpling of Kings College London Dental Insti- tute has sampled the new Artio range and was impressed with the results. He said, “After trying the Artio instruments I found them to be very easy to work with. They are lightweight and comfortable to use with a superior level of grip due to the nature of the handle design. In practice the other advantages were that the colour and style made it quicker and easier to identify when sorting, cleaning and repackaging as part of the decontamination and infection control process.”

50p from the sale of all Artio instruments will be donated to the Mouth Cancer Foundation. Visit www.mouthcancerfounda- tion.org for more information.

For more information about the DENTSPLY range of super- ior dental products, call Freephone 0800 072 3315.

Staying Ahead Of The Game

BioHorizons has relocated to Wellington Business Park in Crowthorne, Berkshire!

Leading manufacturer of the revolutionary Laser-Lok® im- plant system, BioHorizons, has moved to bigger and better of- fices due to its significant market growth. The new, bigger offices are the optimum solution that will enable BioHorizons to satisfy the growing customer and clini- cian demand. The large amount of storage space allows for even more innovative products to be stocked on the premises permitting the company to provide complete customer satisfaction with next-day delivery achieved for over 90% of orders received.

The core values of BioHorizons are Science, Innovation and Service. The benefits of the new premises, coupled with the re- cent expansion of its sales team is allowing BioHorizons to reach out to a much larger client base.

Chris Netherclift, the General Manager said, “these new offices allow us to take the next step forwards in establishing BioHorizons as one of the leading implant companies in the U.K.”

For further information, please call BioHorizons on 01544 752 560, email: infouk@biohorizons.com or visit www.biohorizons.com.
