Industry News

The AOG – Do Dentistry: Do Good

The UK’s first exclusively laser clinic

Detron® – Do Dentistry: Do Good

Ultrasonic Instrument cleaning

Alkazyme-W is a combined cleaning and disinfecting agent for the thorough cleaning-pre-dish sterilisation of all available, irreparable dental instruments prior to autoclaving.

Rapid cleaning action

When used in conjunction with a standard ultrasonic cleaner a maximum five 14-15/16 minutes is all that is required to render soiled instruments clean & shiny!

Continual Disinfection

Alkazyme® continually disinfects the contaminated ‘wash water’ as created within the ultrasonic cleaner.

Economical

Just five grams of Alkazyme® with ordinary tap water makes one litre of enzymatic cleaning/disinfecting solution

Choice of user format: Available from all dental sundry suppliers in both 700gm powder tub and tubs of 100 easy dose water soluble sachets

For comprehensive product information visit www.alkzyme.com

The Dental Directory – great products for dental professionals

Lounge, 200 Bath Street, Glasgow, G2 4HG is positive. For more information contact Mark Chapman, Area Sales Manager.

Together, that’s what Velopex is all about.

Pico Laser: “This is a super unit, neat compact and easy to use."

Aluminium Arsenate contains a five Watt Gallium (GaAlAs) diode laser and

orthodontic treatment, and interdental cleaning

I feel that my gums are pinker and healthier. I after I use the “Water floss” I can feel that debris

Dr Anoup Nandra, principal dentist at Edgbaston Dental Practice in Birmingham, said: "The Waterpik® Water Flosser is lightweight, easy to use and makes it simple to maintain daily dental hygiene. Its unique tips reach an altitude of 360 degrees allowing it to reach all areas of the mouth."

Open to Everyone – the AOG

The AOG was formed 30 years ago by a group of dental students at the London Hospital, Mile End, who all shared similar backgrounds with financial hardships. It began as a social network and every event that was organised led to charitable contributions due to previous habits. Today, the AOG welcomes everyone to join and support their work for the ‘greater good’. Dr Sangeeta Lakhaniap is the practice owner of Park Avenue Dental Care in London, with her husband. Below, she outlines some of the advantages of being involved with the AOG: “When I first became involved with the AOG, I felt very much like the founder by the social network. There is a huge charitable element, and there are many occasions to volunteer to help the less fortunate, and you can personal services to those who need them around the world... “For those of us who attend the events regularly, we are either old as well as some new people. And there is always someone to offer fresh answers and" ideal." Great some new people and gain access to a pool of knowledge with the AOG. The AOG – Do Dentistry: Do Good

R4 Clinical - Practice Management Software

Dr Clive Schmulian is the principal dentist at Clyde Dental Practice in Glasgow and has been with the practice for 27 years.

Our clinic is a part of a group of dental practices, all of which run R4 Clinical, says Dr Schmulian. "The software supports clinical governance in terms of record keeping. We perform both clinical and non-clinical audits, which are important to document for all stages of monitoring and implant treatment."

*R integrates well with EHRs and with Microsoft Word. It’s very adaptable. "A great tool for all dentists."

For more information on R4 from Carestream Dental please call 0800 169 9602 or visit www.carestreamdental.co.uk

UK’s first exclusively Pico Laser

The UK’s first exclusively Pico Laser has been installed at the Kajary Dental Lounge in Bat's. The Kajary Dental Lounge contains a five Watt Gallium Alumnium Phosphate (GaAlAs) diode laser and a small laser pointer. The Kajary Laser is now available in two different forms – disabling and non-disabling.

The Laser has been installed for the treatment of patients suffering from a wide range of conditions, including dental decay, gum disease, and to treat a variety of medical conditions, including gout, diabetes, and cancer.

The Laser can also be used for tissue work and both periodical (where it can be done without a needle), and for local anaesthesia work (where it can be done without a needle). The Laser can also be used for tattoo removal, and for the treatment of skin conditions, including psoriasis, acne, and eczema.

For more information contact mark Chapman, Area Sales Manager, tel. 07754 946396 or email mark Chapman at Kajary Dental Lounge, 200 Bath Street, Glasgow, G2 4HG

The new Implantmed from W&H gives you the most effective tools for oral surgical procedures in the fields of implantology, microsurgery and small-bone surgery with maximum precision. The unit is easy to operate and guarantees long-standing working without fatigue, thanks to the ergonomic design and the ergonomically shaped control-angles handpiece. The simple, openly designed control panel allows for improved infection control whilst housing up, both, newly designed LED light and the automatic side button helps you especially when inserting implants into hard bone. This function allows you for thread tapping therefore minimizing compression of the bone and promoting stress-free healing. The implant is easy to use and its large display makes values clearly legible. With a motor torque of 3.5 Nm and a motor speed of 100,000 rpm, the Implantmed offers impressive performance. The automatic torque control can be set between 0.5 and 700Ncm, including instrument safety. In line with current disinfection guidelines, the motor and cable are thermo washer disinfectable and can be sterilised. When used alongside W&H’s range of surgical LED light and contra-angle handpieces, the Implantmed is the first choice for professional dental implantologists.

For further information regarding the full W&H Surgical Range contact W&H Directories on 01622 29 68 90.
