AOG

Oralign course I was very confident in offering this option for my patients. “ - Dr Hap Gill from Smile Studio.

Open to Everyone – the AOG

The AOG was formed 10 years ago by a group of dental students at the London Hospital, Mile End. It is an authorised provider of Bite splints. Dr Anoup Nandra, principal dentist at Edgbaston Dental Centre, has been using the Waterpik® Water Flosser Cordless Plus for three months now.

The Waterpik® Water Flosser Cordless Plus leaves that you gums are pinker and healthier”

The Champions’ Implants: new horizons in dental implantology

The philosophy of Champions-Implants GmbH is to provide dentists and patients with optimal and efficient state-of-the-art solutions. About 2,400 dental offices and clinics successfully placed and restored more than 50,000 Champions® implants in Germany in 2010. The company won the Regio Effekt award (Germany 2011).

The Champions’ implant is not just another implant system. The Champions® implant system stands out for its innovations, beneficial and easy handling properties. Compared to the conventional implant, the “Champions” implant system is itself, the treatment with it, and the prosthetic restorations are more cost-effective and therefore affordable for a higher number of patients. One-piece and two-piece Champions® implants can be used for many indications. They can both be inserted using the MIM® method, the sinus lift, or the implant-in-a-day method of Implantation, which is suitable for 80 to 80 per cent of the cases. The implants are manufactured in Germany of the highest quality.

You can find clinical cases and articles on our website at: www.champions-implants.com. The Champions’ concept sets new standards in Implantology AND/innovation is the key to progress!

308,000 people.

“Having tried other PMS, I find that R4 is much easier to use and more powerful. “R4 integrates well with KDIS and with Microsoft Word. It’s very adaptable.

Dental Unit Water System

Decontamination ALKAZYME-W

“Clean Water in – Clean Water Out”

Alkazyme-W a combined cleaning and disinfecting agent for the thorough cleaning-pre-disinfection of all reusable, immovable dental instruments prior to autoclaving.

“Rapid cleaning action

When used in conjunction with a standard ultrasonic cleaner a maximum freedom from biofilm is achieved in the shortest possible time all this is required to render soiled instruments hygienically clean & strengths.

Disinfected/Continual Decontamination: Alkazyme® continually disinfects the contamination of the water flow as created within the ultrasonic cleaner.

Economical: Just five grams of Alkazyme® with ordinary tap water makes one litre of enzymatic cleaning/disinfecting solution

Choice of user format: Available from all dental sundry suppliers in both 700gm powder tubs and 100 litre easy water soluble sacs

UK’s First elexxion Pico Laser

The UK’s first elexxion Pico Laser has been installed at the Kyazumi Dental Lounge in Beth Street.

The elexxion Pico Laser contains a five Watt Gallium Arsenide (GaAs) diode laser and a small laser spot. The Gallium laser is the appropriate wavelength for soft tissue work and both periodontal work (where it can deactivate the bacterial and endodontic work). This laser is especially suitable for small, highly focused laser energy fibre delivered - the smallest available fibre being 200 microns. The elexxion Pico Laser can also be used for whitening, removing roots and non-vital teeth). Dr Jayabalan, who is no stranger to lasers, said of the Elexxion laser energy is fibre delivered - the smallest available fibre being 200 microns.

The elexxion Pico Laser is easy to operate and is battery powered. The Laser fibre delivery system allows movement of the hand piece without any feedback. Performance is positive. For more information contact Mark Chapman, Anna Sales Manager, Elexxion Laser AG. Tel: 07490 941812. Dr Jayabalan is based at Kyazumi Dental Lounge, 200 Bath Street, Glasgow, G2 4HF.

For maximum comfort and precision, the Waterpik Water Flosser's proven ability to reduce gingivitis makes it a perfect accompaniment to your patients' regular oral hygiene routine. As a dental professional, and will give patients a noticeably whiter smile within two weeks. With just two minutes a day, Phillips has announced the introduction of the latest product to add to its range of teeth whitening innovations – Zoom DayWhite 6 per cent HP with ACP. This is an at-home white teeth whitening formula, designed to be dispensed by a dental professional, in the form of custom fit trays into patients' mouths for even and effective tooth contact. They are worn twice a day for 15 to 30 minutes depending on the advice of the dental professional, and will give patients a noticeably whiter smile within two weeks. Zoom DayWhite 6 per cent contains Amorphous Calcium Phosphate (ACP), which, when combined with petrolatum and paraffin, binds with the enamel to provide enamel protection, improved faster and shine, with reduced sensitivity. The product provides patients with a healthy white smile and patients who have experienced less feedback to their original tooth colour after six months.

An additional benefit for dental professionals is the product's patient's achievement of gel stability through its shelf life without the need for refrigeration.
