Dramatically less traumatic
for you, your patients and
their dentition

FenderWedge protects and separates
during tooth preparation

FenderWedge protects the tissue and
separates the teeth, simplifying the following
application of a matrix. It can be applied
buccally or lingually for optimal access and
vision. Available in four color coded sizes.

FenderWedge

Luxator Periotomes are specially designed
periosteal ligament knives with fine tapering
blades that compress the alveolar bone, cut
the membrane and gently ease the tooth from
the socket. The whole operation is performed
with a minimum of tissue damage.
