**FenderWedge**
protects and separates
during tooth preparation

FenderWedge protects the tissue and separates the teeth, simplifying the following application of a matrix. It can be applied buccally or lingually for optimal access and vision. Available in four color coded sizes.

---

Dramatically less traumatic
for you, your patients and
their dentition

**Luxator**
Extraction Instruments

Luxator Periotomes are specially designed periodontal ligament knives with fine tapering blades that compress the alveolar bone, cut the membrane and gently ease the tooth from the socket. The whole operation is performed with a minimum of tissue damage.
