Topdental Launch Viroflex Pro Test – Protein Testing Kit

Viroflex Pro Test is an indication, which can be used safely to determine the effectiveness of the surgery’s infection control procedures. Protein resistant on-medical equipment indicate that bacteria are present and there is a lack of adequate cleaning procedures. In addition, protein resistant on-medical equipment are the sign that the risk of infection is present. This product is developed using the latest technology to determine residues at low concentrations (~1 µg). By using Viroflex Pro Test, you can easily identify protein residue by visible colour change. This process provides an easy identification of protein residues on equipment.

The Viroflex Pro Test is an essential cost effective option for all dental surgeons and is available from either Dental Observatory on 0800 855 596 or from Topdental Products Ltd on 01355 259 871. Please in surgery demonstrations are available from Dental Observatory. www.viroflex.com

CB12 is a new, patented mouth rinse whose formula is proven to outperform other existing mouthwash solutions and deliver superior from the embayment of bad breath for 12 hours. CB12 contains a formulation of zinc acetate and chlorhexidine diacetate, which work together to neutralise the ionic fluoride. CB12 is a site specific fluoride releasing agent that is also contains fluoride to help protect teeth and to help patients maintain a high standard of oral health.
