Introducing GoodmanGrant Lawyers for Dentists
This July members of the dental press gathered at the St Pancras Renaissance Hotel for the announcement of a new specialist firm of dental lawyers. Goodman Grant is the result of a merger between Ray Goodman of Goodman Legal and John Grant former Head of the Dental Team at Cohen Cramer. Both have an extensive career assisting dental professionals with their legal affairs and the team at Goodman Grant has a combined experience of more than 75 years.

The firm brings together the current Chairman of the NASDL, lawyers group and the immediate past Chairman of 4ADD. Along with dedicated expert solicitors in all practice areas, Goodman Grant is able to provide its clients with extensive legal advice on all aspects of the dental industry.

With offices in London, Liverpool and Leeds, Goodman Grant is able to offer its unique and flexible bespoke and comprehensive advice to clients in all parts of England and Wales.

For more call Ray Goodman on 0151 707 0030 or email mg@goodmanlegal.co.uk or call John Grant on 0113 8457705 or email mg@goodmanlegal.co.uk

Sparkle Dental Labs Ltd is a dental laboratory based in Yorkshire, with the aim of reintroducing the UK’s existing dental technicians trade. Ten years ago there were more than 12,000 dental technicians operating in the UK, today the figure stands at 5,000 technicians and is still declining by more than 200 technicians a year. With this state of the art laboratory in Leeds, Sparkle Dental Labs is hoping that it can attract a new generation of technicians to this declining profession.

With a high frequency of lab work now being referred to overseas laboratories, Sparkle Dental Labs are hoping to regain the interest of dentists in home grown laboratories by ensuring that they are of the highest quality and are reasonably priced.

As one of the only labs to be recognised with MHRA, DMAPA and ISO quality assurance marks, you can be sure that Sparkle Dental Labs are working hard to bring you the very best laboratory services through state of the art equipment.

For more information contact your local dental dealer or DMG Dental Products UK Ltd on 01615 798401, email info@dmg-dental.co.uk or visit www.dmg-dental.com

Topndental Launch Virofex Pro Test – Protein testing kit
Topndental’s new protein testing kit, Virofex Pro Test is a unique and comprehensive disinfectant for the high level surface cleaning and disinfecting of non-invasive medical devices.

Virofex Pro Test has been designed and developed to verify the effectiveness of the market leading medical device disinfectant spray, Virofex. Virofex Pro Test is an indicator, which can be used safely to determine the effectiveness of the surgery’s infection control procedures. Protein residues on medical equipment indicate that bacteria are present and there is a lack of adequate cleaning processes. Protein residues on medical equipment are the sign that the risk of infection is present.

This product is developed using the latest technology to determine residues at low concentrations 1-2µg using Virofex Pro Test, you can easily identify protein residue by visible colour change. This process provides an easy identification of protein residue on equipment.

The Virofex Pro Test kit is an essential cost effective option for all dental surgeries and is available from either Dental Directory on 0800 555 596 or from Topndental Products Ltd on 01535 259 871. Find your surgery demonstrators are available from Dental Directory. www.virofex.co.uk www.topndental.org

Most Effective ADIN Implants now available in the UK
Independently judged one of the most effective implants evaluated in a study by the New York University, ADIN Implants are available in the UK from Trycare.

In their study, NYU measured the quality of new bone formation and bone contact of five different implant systems (ADIN, Astra, Implant Direct and osteoconductive bone graft) over a six week period. It showed that all five produced similar results, though ADIN out-performed the controls, the study confirms that the implants are up to three times more expensive, in various aspects. Therefore Trycare can reasonably claim that ADIN is really the orthodontic implant.

Trycare Closedos implant offers a strong and solid conical-hex connection that is intersealausible with Nobel Active. This Morse Taper connection minimises micro movements, thereby minimising undesirable clinical bone loss.

For further information ask your local Trycare Representative, contact Trycare on 01274 855845, email dental@trycare.co.uk or visit the ADIN.co.uk website

CB12 is a new, patented mouth rinse whose formula is proven to prevent outward mouthwash solutions and deliverde from the embarrissement bad breath for 12 hours. CB12 contains a combination of zinc acetate and chlorohine diacetehate, which work together to neutralise the mouth’s foul breath. CB12 also contains fluoride to help prevent tooth and to help patients maintain a high standard of oral health.

While many fresh breath products simply mask the odor of bad breath, CB12 attacks the problem at its source, neutralising the cause of bad breath and preventing recurrences up to for 12 hours.

For more information on CB12 please visit www.cb12.com
