DMG

DMG’s NEW self-etching and adhesive flowable composite is ideal for MID.

DMG’s new Constic self-etching and adhesive flowable composite eliminates both the etching and bonding steps and saves valuable time too. Post-operative sensitivity is also markedly reduced. Constic is easy to use and much more gentle andatraumatic to the enamel compared to treatment with traditional etching and bonding steps, as well as being MID resistant.

DMG’s NEW self-etching and adhesive flowable composite is a 3-in-1 flowable composite which combines etching gel, bonding agent and flowable composite in one product. Constic is easy to use and much more gentler andatraumatic to the enamel compared to treatment with traditional etching and bonding steps, as well as being MID resistant. The 3-in-1 flowable composite combines etching gel, bonding agent and flowable composite in one product. Constic is easy to use and much more gentler andtraumatic to the enamel compared to treatment with traditional etching and bonding steps, as well as being MID resistant.

Oral hygiene solutions

Carestream Dental – Here to Help You

Zesty is an online booking service that makes finding new patients simple. The service allows patients looking for cosmetic services to find your practice and book appointments with you without ever leaving the comfort of their home.

The company’s unique “touch 2 teach” philosophy is based on offering one-to-one, interactive, hands-on training sessions with individualized coaching. Zesty’s training sessions are delivered in the comfort of the patient’s own home and are designed to help patients to practice their cosmetic treatments in a safe and effective manner.
