Using InstrumentSafe to demonstrate a commitment to providing quality dental care

The KentAMED is a market leader in PractiSafe, iSafe and iSafe+ instrumentation. Continu disinfectants comply with HTM01-05 regulations regarding the disinfection of medical devices and carry the CE mark with pride. This is excellent news for surgeries wanting to comply with the latest requirements with regard to patient safety.

Therapeutically designed practisafe, iSafe and iSafe+ disinfectants can provide customers with a high-quality, value for money product. They are all effective against a wide range of micro-organisms including antibiotic, fungal, virus, mrsa, influenza (H1N1) and vaccines. iSafe+ offers the largest range of micro-organisms to make sure your practice is maintained.

iSafe+’s Continu disinfectants are a HTM 01-05 compliant solution. Achieving a 99.998 per cent kill rate within only 30 seconds of application, Continu disinfectants are a HTM 01-05 compliant solution. Achieving a 99.998 per cent kill rate within only 30 seconds of application, Continu disinfectants are a HTM 01-05 compliant solution.
