Dental unit water system decontamination

Alkazyme-W: A combined cleaning and disinfecting agent for the weekly decontamination of the integral dental chair-side water supply.

Simple to use. A 15 minute weekly routine service with Alkazyme-W. All that is required to ensure the dental unit water supply remains free of bactericidal contamination thus ensuring 'clean water in – clean water out'.

Microbial Activity: Unique combined enzyme based detergent/disinfectant system rapidly combines action from all internal surface thoroughly and dissolved.

Highly Economical: Each 500gm tub of Alkazyme-W allows for up to 100 service applications.

Safe to use: Nontoxic and fully biodegradable.

Economical: Just five grams of Alkazyme® with ordinary tap water makes one litre of efficient cleaning/disinfecting solution.

Choice of user format: Available from all dental sundry suppliers in both 500gm loose powder tub and tubs of 100 very-dose water soluable sachets.

For comprehensive product information visit www.alkazyme.co.uk.

Ultrasound instrument cleaning

Alkazyme-W: a combined cleaning and disinfecting agent for thorough cleaning pre-disinfection of all reusable, immovable components to be autoclaved.

Rapid cleaning action: When used in conjunction with a standard ultrasound cleaner a maximum five minute immersion is required to render soiled instruments thoroughly clean and shining bright.

Continual disinfection: Alkazyme® continually disinfects the contaminated 'wash water' as created within the ultrasonic cleaner.

Service from Dental Surgery

EndoCare and its sister companies have now hit its eleventh Pico Laser.

The elexxion Pico Laser treatment centre offers patients a 10W Gallium Aluminium Arsenate (GaAl) diode laser and a small laser pointer. The GaAl laser is ideal for soft tissue work and is highly suitable for removal of soft periodontal and endodontic work where it can steriley the root canal. The laser energy is fibre delivered. The GaAl laser has a wavelength ideal for removal of all hard tissues, an area can be cut with localised haemostasis. The laser also steriley the tissues, making for good post-operative results. All this is done silently and in a tactile manner the elexxion Pico Laser can also be used for Food Whitening (of both vital and non-vital teeth). Dr Powell said of the elexxion Pico Laser: “This is a super system, most competent and effective.”

Dental Practice, Station Road, Bourne, Lincolnshire, UK the conference attracts six hours of verifiable CPD.
