**The All-on-4™ technique is a life changing experience.**

The All-on-4™ system from Nobel Biocare is a cost effective implant system which allows the UK dentist to offer a fixed bridge on the day of surgery. The All-on-4™ system offers the added advantage of using existing anterior and posterior implants to hold a full arch restoration, meaning that in many cases patients leave the surgery with a fully functional prosthesis after just one treatment visit. Dr John Moshosche of Oasis Embroider implant dentistry services has been so impressed with Nobel Biocare’s SpeedyGroovy™ implants with the All-on-4™ technique that the oral hygiene department at Oasis Embroider have selected SpeedyGroovy™ implants providing strong and reliable primary stability. The external hex of the implant is surrounded by a variable combination of clinical_Nottingham

**The Sirona DAC Universal - Superfast and Reliable.**

The Sirona DAC Universal instrument is a key piece of equipment for today’s dental team. The DAC Universal has been designed to allow the operator to perform a multitude of functions from removeable implant and prosthodontics to bone scraping and implant removal. Readers enjoy the convenience of the publication, meaning they can study for CPD in their own time and at their own pace rather than travelling to a lecture, meeting or course. For those that do enjoy more interactive learning Oral-B run a series of seminars throughout the year.

**Recommended Tandies to your patients to maintain the health of their teeth and gums.**

All dentists are aware that good dental hygiene starts in the home, but with an estimated 85 per cent of the British population suffering from gingivitis, the difficulties in patient compliance are evident.

The interdental space is the most vulnerable to the build-up of food particles and bacteria. However, the British Dental Foundation has shown that only a minimum percentage of patients take the time to perform effective home dental flow.

Patients therefore need to be advised to use alternative methods, such as interdental brushes, Crest 3D White Strips and Tandex Gel.

**Biomet 3i Restructures Key Personnel**

Biomet 3i has announced the appointment of a new group of key personnel. The restructuring of the Biomet 3i business is part of the company’s ongoing commitment to world-leading care for patients, clinicians and the dental industry.

**Water Pik® offers the highest quality water flossing technology for patients.**

Water Pik® is famous both in America and the UK, for its top quality oral hygiene products, and the Water Pik® Water Flosser enjoys a reputation for excellence, having been proven to be twice as effective as traditional string floss at improving periodontal health. New patients for the Water Pik® Water Flosser are gaining satisfaction from the performance of the Water Pik® Water Flosser in a new, compact design. The Water Pik® Water Flosser is available in two models, small and compact than the original Water Pik®. The Water Pik® Water Flosser is available in both blue and pink. It is compact and easy to use, it works interdentally, subgingivally and gingivally, and is packed with time saving and user-friendly features such as The space saving design allows for easy storage.

**Three pressure settings, so that patients can adjust it to suit their level of sensitivity.**

Two different tips, the Classic Jet Tip and the Plaque Seeker® Tip for those who want effective plaque removal and reduced gingival bleeding, but are keen on space, the Water Pik® Nano™ Water Flosser is the ideal solution.

**For more information on Water Pik® Water Flossers speak to your wholesaler or visit www.waterpik.co.uk. WaterFloss products are widely available in Boots stores and selected Lloyds Pharmacies.**
