Dental Sky will impress you!

Dental Sky supply an impressive range of leading brand impression materials.

R&S Turbolfex from Dental Sky is the perfect addition cured silicone that provides exceptional detail reproduction. This complete line allows you to use your existing techniques in the wash technique or double-mixing.

The light bodied materials within the range are easy to inject and do not slump even when placed in the upper arches. Exceeding high levels of hydrocompatibility Turbolfex impressions will always provide precise impressions even when in contact with gingival fluid and blood.

With a very good dimensional stability and high elastic memory removal of hydrocompatibility Turbo/flex impressions will always provide precise impressions and good marginal integrity.

London’s first elecсолor Pico Laser

Patrick Gough of elexxion UK will be presenting one of the first laser presentations of the Dental Congress.

The elexsol Laser contains two lasers - a 755nm Gallium Aluminium Arsenate (GaAlAs) diode laser and a small pico laser. The GaAlAs laser is ideal for soft tissue work such as removal of pigmentation and pedunculated or indolent nodules. The laser is fibre delivered - the smallest fibre being 200 microns.

The elexsol laser has a wavelength that is ideal for minor oral surgery. Using this laser, anaesthetics can be kept to a minimum and local anaesthetic can simply not be done due to the cut is also not as long as a scalpel.

The elexsol Laser can also be used for Tooth Whitening (of both vital and non-vital teeth) and for removal of the “pocket line” This is a “soft tissue” compact and easy to use.

The elexsol Laser is very easy to operate and the unit itself is super compact. The Laser fibre delivery system is completely free and movement of the hand-piece and patient feedback continues to be positive.

For more information contact Christine Bowness, Sales & Marketing Manager, tel: 07774 046677.

ChairSafe alcohol free range of disinfectants

Buy a ChairSafe SL alcohol free disinfectant before 31st May and get one free this offer expires soon so if you would like to take advantage of the offer and give a 24 hour ChairSafe Line on 0800 294 4700.

A candle for every 2000

Support Design have introduced a new candle to their range called the Saddle Lite Advanced through Quintet, their official distributors.

The Saddle Lite Advanced features a soft seafoam shade with a sleek cut out at the front end and a deep green back. These features, in combination with a supportive narrow seat, minimize uncomfortable pressure when seated during long hours.

When seated, the saddle receives the natural 5 cm saddle roll which helps to improve comfort for the patient. The Saddle Lite Advanced is an effective adjunct to help reduce plaque bacteria and manage the biofilm in a safe and easy manner.

In addition to the high quality craftsmanship a five year warranty is offered with the product. Custom colours are available if needing to match to an existing patient’s chair.

With special offers available, details on this product and the full range of support design stools are available for viewing on the Quintet website www.quintet.co.uk or for further literature, please contact our sales office 01100 211737.

Carvemos Dental and CIC - 2012 unveiling clinicians at the forefront of dentistry

Dental Care was a proud sponsor of the ninth annual Clinical Innovation Solutions Conference (CIC) on 16th – 19th May 2012. Held at the Manchester Central Conference Centre in London’s Kensington, the dynamic event celebrated all that is progressive and pioneering, and Carvemos Dental was a fitting participant with a broad portfolio of products and services to helpose exceptional patient care, the Carvemos Dental stand was a popular destination for delegates. Solutions on display included CIC’s 54 Coffee System, which was developed with Montefiore Health System in New York, which behaves as the hub of the practice, simplifying and speeding routine tasks and communication throughout the organization. Effective for innovative imaging systems, delegates discovered the CS 9390 all-in-one extracorporeal imaging system, which offers the widest range of clinical applications on the market. Also on display was the Optiviewating plate system with its fully automated and secure x-ray workflow.

A leading conference is 2012 unveiling clinicians at the forefront of dentistry. For more information about the CIC 2012 unveiling clinicians at the forefront of dentistry. To celebrate its 31st birthday, the London Tooth Wear Centre invites referrals. The London Tooth Wear Centre offers a comprehensive treatment of their tooth wear. An increasingly common dental problem, tooth wear can result in sharp edges and loss of tooth substance. For under 16’s, £3 for children under 16, while special members’ rates are £5 per adult and £1 for under 16. With increasing pressures in India and Asia, the ACO’s work has helped to improve the lives of people less fortunate, offering them a sustainable, independent and hopeful future.

Help the ACO raise awareness and donations to continue their work ‘Towards the Greater Good’, and enjoy the fun at this year’s Family BBQ from 12 noon on Sunday 8th July!

For further details on forthcoming events or tickets, or to join, visit www.acog.org.
