Eastman Dental Institute offers dentists the opportunity to gain a new qualification through a part-time dissertation module based around Restorative Dentistry. The UCL Eastman Dental Institute offers dentists the opportunity to gain a new qualification through a part-time dissertation module based around Restorative Dentistry. A compulsory Clinical Research Methodology course will provide practitioners with the opportunity to improve their research skills, and a superior, single use, aspirating syringe system (Ultra Safety Plus 50/50) or with a 

The concentrates are available in either 1-litre or 5-litre containers and can be diluted according to the individual needs of the practice. The concentrate is available in either 1-litre or 5-litre containers and can be diluted according to the individual needs of the practice. Legionella management from CODE Solutions, which is a certified member of the Legionella Risk Control Association. CODE will provide you with: • a comprehensive survey and consultation of your water system • an assessment of your water usage • photographic evidence of any potential risk areas • a comprehensive plan of remedial action • everything you need to create and maintain a log of all future maintenance and health and safety procedures. With help from CODE, you can keep your practice safe and compliant and protect the wellbeing of your staff and patients. Please visit www.CODExx.com, email info@CODExx.com or call 01490 354 354 for more information. 

EndoCare endorses to ease patient pain Dental phobia is common fear experienced by many patients and can lead to an increased perception of pain during treatment. However, with the right care and attention can be avoided and the experience of dental procedures can be made a pleasant one. The highly experienced and empathetic team at EndoCare works hard to prove to your patients that endodontic treatment need not be something to be afraid of. Patients referred to us are fully informed as to how they can expect treatment to be and will be offered a selection of packages that cover the entire process, or can choose to listen to the music of their choice through headphones. In addition, EndoCare uses the latest equipment to make treatment as pain-free as possible and the use of flexible sedation ensures that you can choose your preferred method of delivery, whether it be oral, nasal or transdermal. EndoCare was voted UK’s Best Referral Practice and promises to offer the referral dentist with support during and after the procedure. This includes a free of charge appointment 6 months after treatment. For more information or to register please contact Rohan Goyal, Referral Manager, on 0207 710 1892 or email info@endocare.co.uk

Legionella management from CODE Because the increased risk of Legionella growth in public buildings with air conditioning and ‘cooling’ systems, across areas such as waterside, in line with the Health and Safety at Work Act 1974 as amended and the Fire Precautions Act 2002, dictates that all dental practices must obtain a certificate as evidence of meeting the Legionella Risk Management from an appropriately licensed body. To help improve the situation, CODE offers a comprehensive Legionella Risk assessment in conjunction with Water Hygiene International Ltd with the aim of providing a quality, risk-free, solution. The team at CosTech Elite® consists of specifically selected experienced GDC registered technicians, all treatments are completed within five days. CosTech Elite® believes in keeping appointments to the highest standard and, after the products have been dispensed, it is placed in an attractive presentation box before being sent. The restorative work will arrive at the clinician’s practice by the seventh day, regardless of their location in the UK, via a traceable UPS pick-up and delivery courier service. The All-on-4® technique is a life changing experience

The All-on-4® system from Nobel Biocare is a cost effective implant system that allows practitioners to fix a full bridge on the same day as extraction. The All-on-4® system has been used in over 100,000 cases and is considered to be the ideal choice for patients who desire immediate function and stability.

Dental Stock Change

Selling made easy with the Dental Stock Change

Dental Stock Change is an online marketplace used by dental professionals to buy and sell stock items. However, unlike some online marketplaces, the Dental Stock Change understands the low price consuming it can be to list and sell items, so they do it for you!

Simply contact The Dental Stock X-Change with a list of products and equipment you want to sell and they will contact you as soon as possible to discuss your options.

Items are listed on the website for up to six months, and can be given a set price or made open to offers. The Dental Stock Change takes a percentage of the sale price once the item has sold, which includes PayPal fees, and everything else goes straight to the seller.

Dispensing of unsettable stock can be time consuming, expensive and wasteful but with The Dental Stock X-Change, you can make money, help the environment and even grab yourself a bargain.

For more information about buying and selling online, visit www.dentalstockchange.co.uk or email info@dentalstockchange.co.uk or call 020 83912171
