Nusonic NAC for CQC-approved independence

Blackwell Supplies is proud to offer dental practitioners an advanced cleaning solution that also assists them in achieving CQC and HTM 01-05 compliance. Nusonic NAC is a general-purpose, ammonia-free, non-foaming, non-toxic cleaning solution designed for use in ultrasonic cleaners for reliable and consistent instrument sterilisation. Safe to use and free of toxic fumes, Nusonic NAC not only cleanses instruments but also decontaminates them to their former shine and actively prevents rust to lengthen their useful life.

The concentrate is available in 1-litre or 5-litre containers and can be diluted according to the individual needs of the practice.

For more information please contact John Jeshop of Blackwell Supplies on: 020 7224 1457, fax: 020 7224 1649 or email john.jeshop@blackwellsupplies.co.uk

Legionella management from CODE

Because of the increased risk of Legionella growth in public buildings with air conditioning and other systems, across across the UK, HM-01-05, in line with the Health and Safety at Work Act 1974 as amended by the Health and Safety at Work Act 2003, makes clear that all dental practices must take all reasonable precautionary measures to ensure the safety of their patients and staff, and which also entails the meeting of the Health and Safety at Work Act regulations.

Nusonic NAC is a general-purpose, ammonia-free, non-foaming, non-toxic cleaning solution designed for use in ultrasonic cleaners for reliable and consistent instrument sterilisation. Safe to use and free of toxic fumes, Nusonic NAC not only cleanses instruments but also decontaminates them to their former shine and actively prevents rust to lengthen their useful life.

The concentrate is available in 1-litre or 5-litre containers and can be diluted according to the individual needs of the practice.

ORTHOPHOS® XG: leading panoramic unit

ORTHOPHOS® XG is a panoramic radiographic system designed to facilitate precise, parallel beam imaging. It incorporates several advanced features and advantages, making it an ideal solution for dental practitioners who require high-quality panoramic images.

The equipment is equipped with a number of features that enable the capture of images of exceptional quality and clarity. This is achieved through the use of advanced technology that ensures a high degree of resolution and accuracy. With its intuitive interface, the ORTHOPHOS® XG is easy to use and requires minimal training, even for those who are new to panoramic imaging.

Moreover, the panoramic unit is designed to be energy-efficient and environmentally friendly, making it an ideal choice for practices that are committed to sustainability. It is also designed to be compact and portable, allowing it to be easily transported to different locations.

For more information, contact Sirona Dental Systems on 0845 071 5040 or visit www.sirona.com.

Dental Stock X-Change

Selling made easy with the Dental Stock X-Change

The Dental Stock X-Change is an online marketplace used by dental professionals to buy and sell stock items. However, unlike some online marketplaces, the Dental Stock X-Change understands the unique low value consuming it can be to list and sell items, so they do it for you! Simply contact The Dental Stock X-Change and they will list a lot of products and equipment you want to sell and they will contact you as soon as possible to discuss your options.

Items are listed on the website for up to six months, and can be given a set price or made open to offers. The Dental Stock X-Change takes a percentage of the sale price once the item has sold, which includes PayPal fees, and everything else is yours to keep.

Disposing of unwanted stock can be time consuming, expensive and wasteful but with The Dental Stock X-Change, you can make money, help the environment and even grab yourself a bargain.

For more information about buying and selling online, visit www.dentalsstockchange.co.uk or email info@dentalsstockchange.co.uk or call 020 83912171

New autoclave validation kit helps dentists meet best practice legislation

Data logging experts, Sigmarit, have launched a quick and easy method of validating your autoclave. Sigmarit’s new autoclave validation kit has been designed to test the temperature inside the autoclave is above 134°C for five minutes and can be used with any type of sterilizer. The kit includes a 310°F data logger, a blue hard anodized aluminium enclosure, a stainless steel support frame, a STERIFrame lead and the validation software. At the end of each cycle the data logger is removed and connected to the PC where the temperature in time record can be immediately displayed both graphically and in tabular format. Readings are stored in encrypted form that can be altered — a permanent record is kept of the start and end of the sterilization temperature (normally 134°C) and the time over which this temperature can easily be read off. The software will automatically indicate if the measured cycle passes or fails the test.

For more information on the HESSA Autoclave Validation Kit or to purchase in one visit www.sigmarit.co.uk

The All-on-4™ technique is a life changing experience

The All-on-4™ system from Nobel Biocare is a cost effective implant system that allows practitioners to fix a fixed bridge on the same day as extraction.

Using Nobel Biocare’s SpeedyGroovy™ implants with the All-on-4™ technique since 2005, Dr Neil Morshower of Oasis Essex Implant Centre, Lymm, Cheshire says: “I have been using Nobel Biocare’s SpeedyGroovy™ implants with the All-on-4™ technique since 2005. The aggressive thread and solid nature of SpeedyGroovy™ implants provides strong and reliable primary stability.

The external hex coupled with a wide variety of gingival heights and angles of multi-unit abutments makes it a new and best system for the All-on-4™ approach.”

“...life changing experience that restores our patients’ confidence, self-esteem and quality of life. I would recommend it to other practitioners without hesitation.”

For more information, contact Nobel Biocare on 0208 795 3300, or visit www.nobelbiocare.com

SIRONA DAC UNIVERSAL - SUPERFAST AND ACCURATE

The Sirona DAC Universal integrated instrument cleaning system offers a range of benefits that make it an ideal solution for dentists. It provides a complete cleaning solution that is fast, accurate, and easy to use.

For further information please contact Biomet 3i on 0800 652 1233.

Nobel Biocare’s SpeedyGroovy™ implants with the All-on-4™ technique since 2005, Dr Neil Morshower of Oasis Essex Implant Centre has given significant input and direction to the global Digital Dentistry strategy as well as achieving significant growth in sales and market share.

Nobel Biocare is the leading dental implant manufacturer in the world and has a long-standing commitment to innovation and excellence in the field of dentistry.

There can be no better way to clean your surgery instruments,– just a fraction of the time spent on performing each process thoroughy clean all your surgery instruments,– just a fraction of the time spent on performing each process.

The All-on-4™ system is a cost effective implant system that allows practitioners to fix a fixed bridge on the same day as extraction.

Water Pik

Water Pik is famous for its brand in America, in both the consumer and professional markets. It has been proven to be twice as effective as traditional string floss in improving periodontal health.

The Water Pik Nano™ Water Flosser is ideal for cleaning hard to reach areas, with its interdental brush head and soft plastic nib. It is perfect for use by children and younger patients.

Controlled pressure and gentle stream of water can be used to reach around and under the gum line, whilst the Nano’s unique design provides even greater comfort and safety.

The WaterFlosser Nano™ is an ideal solution for patients who want to improve their oral hygiene and enjoy the benefits of water flossing without the need for extra handpieces to replace those that are damaged or lost.

For more information on the WaterFlosser Nano™ Water Flosser, please visit www.waterpik.co.uk.
