Nusonic IQAC for CQC-approved CDH06 regulations
Blackwell Supplies is proud to offer dental practitioners an advanced cleaning solution that also assists them in achieving CQC and HTM 01-05 compliance. Nusonic IQAC is of vital importance in the practice and dentists need a product they can count on to ensure the safety of their patients and staff, which also meets the standards and regulations.
Nusonic is a general-purpose, one-stage, free cleaning solution designed for use in ultrasonic cleaners for reliable and consistent instrument sterilisation. Safe to use and free of toxic fumes, Nusonic not only cleans reusable instruments but also degreases them to their former shine and actively prevents rust to its former shine.

For more information please contact John Jeseph of Blackwell Supplies on: 020 7224 1457, fax: 020 7224 1694 or email john.jeseph@blackwellsupplies.co.uk

Legionella management from CODE
Because of the increased risk of Legionella growth in public building with air conditioning there is an increasing need for a comprehensive and systematic approach across water systems. HTM 01-05, in line with the Health and Safety at Work Act 1974 as amended by the Health and Safety at Work, etc. Act 1996, requires clients to design, commission, maintain and operate water systems to ensure the health and safety of employees. Solutions, which is a certified member of the Legionella Control Association. CODE will provide your practice with:
- A comprehensive survey and a schematic of your water system
- An assessment of your water usage
- Photographic evidence of any potential risk areas
- A comprehensive plan of remedial action
- Everything you need to create and maintain a log of all future maintenance and health and safety procedures.

With help from CODE, you can keep your practice safe and compliant and protect the well-being of your staff.

Dentomycin periodontal gel
Dentomycin is a general-purpose, ammonia-based solution that also assists them in achieving CQC and HTM 01-05 compliance. Dentomycin helps to prevent cross contamination. The bubble blister eliminates water leaks adding dental practitioners the confidence to deliver the highest levels of care to their patients. The concentrate is available in either 1-litre or 5-litre containers and can be mixed to suit every budget. Septodont is passionate about supporting the safe and ethical practice of dentistry. This commitment is one of the biggest safety concerns faced by dental professionals. Indicated for the routine administration of local anaesthetics, the Ultra Sia Plus is available in a sterile, single-use syringe system (Ultra Sia Plus/50/50) or with a black resealable handle with each box of 100 needles of Ultra Sia Plus), both equipped with a needle guard to aid the user. The pre-filled syringe also incorporates a needle guard to assist in orienting the needle to the target area. The Bubble blisters published results of an exercitation. The Ultra Sia Plus product range includes 27g short, 27g long, 35g short and 35g ultra short needles making it not only safe but very versatile.

For more information on Ultra Sia Plus and the new needle guard visit www.septodont.co.uk or call 01622 695 802.

Dental Gateway: The ideal recruitment tool for dental employers
If concerns about the economy or CQC registration fees are making you think twice about advertising for a new staff, don't worry. Dental Gateway can take the sting out of this process. Their primary goal is to give you, the dentists of the UK's only online community for dental recruitment, a new and principled approach to hiring the hundreds of CVs from competent, qualified dental staff for a fraction of the cost of traditional or online recruitment agencies.

Would you consider to be a Practice Manager or a Hygienist, a full-time member of staff or a temp, Dental Gateway allows you to post your job description and personal specifications online and browse or search through candidates’ CVs for free.

Once you've found a candidate or candidates who fit your needs, a small payment of £25 or £10 will give you access to their contact details, allowing you thousands of pounds in agency fees. With special introductory rates, your new first employee could potentially come to you free of charge.

Dental Gateway is a favoured anti-legislation and employer ally, so register today and become part of the online networking site dedicated to your industry.

EndoCare endorses to ease patient pain
Dental phobia is common fear experienced by many patients and can lead to an increased perception of pain during treatment. However, with the right care and attention, this can be avoided and the endodontic treatment need not be something to be feared.

Patients referred to us are fully informed as to how they can expect to feel during treatments and will be offered a choice of sedation with a wide range of options available. EndoCare uses the latest equipment to make treatment as painless as possible and offers a range of different sedation options, such as nitrous oxide, as well as pain medications, in order to make your treatment as comfortable as possible.

In addition, EndoCare uses the latest technology to make treatment as painless as possible and offers a range of different sedation options, such as nitrous oxide, as well as pain medications, in order to make your treatment as comfortable as possible.

EndoCare was voted 2006’s Best Referral Practice and promises to provide the referring dentist with support during and after the procedure. This includes a free after-care appointment six months after treatment.

For more information about EndoCare please call 020 7224 0999 or visit www.endocare.co.uk

Implementing an effective water management system
With help from CODE, you can keep your practice safe and compliant and protect the well-being of your staff.

The UCL Eastman Dental Institute offers dentists the opportunity to gain University Qualifications in Restorative Dental Practice (UCL) and a superior water spray, the CPS Handy Inter-dental brush in a transparent carry case, together with a set of CPS Handy Inter-dental brushes. A disposable intraoperative caries detection system when directed by a dental clinician, will be able to offer a tool to dentists and nurse practitioners in the delivery of uncompromising levels of patient care.

For more information about EndoCare please call 020 7224 1457, fax: 020 7224 1694 or email john.jeseph@blackwellsupplies.co.uk
