Decontamination and debris removal for your dental instruments

Dento-Victs SS is a versatile combined range of Dento-Victa autoclaves and ThermoKlenz (automatic washer disinfectors) that disinfect whilst cleansing instruments. Dento-Victs has been designed specifically to remove debris from hand instruments and surgical equipment with the most efficient and gentle decontamination and wetting solutions. It is particularly useful in the removal of blood. It quickly dissolves protein due to its enzymatic action. This bacterial, fungicidal and virucidal product is available from Dental Sky in either 25g or 500g pack sizes of 15g each. Dento-Victs SS dissolves quickly and easily saving time and effort.

Dento-Victs 119 is a competitively priced, highly efficient concentration for cleaning and decontaminating dental instruments. Ideal for use in your ultrasonic bath, this grapefruit fragranced product speeds up the process of debris removal and also bactericidal, fungicidal and virucidal. Both products are available on buy two get one free offers throughout July and August.

Dental Sky exclusively supply a complete range of Dento-Victs disinfecting products developed specifically to meet the demands of modern day practice. For further information or to request your free catalogue please contact Dental Sky on 0800 292 4700.

Sterilization for the future

Sterilin for tooth sterilisation best practice

Sterilin is an inspired solution to the problem that traditional manual sterilisation systems are placing on the practice, helping you to maintain HTM 01-05 standards and requirements for the CQC.

Suitable for all dental practices, Sterilin minimises the processes of handbrushing, pre-sterilisation detergent and centralised sterilisation to create a more stable workflow. Recording information about cycle parameters and the success or failure of a cycle, Sterilin also reminds you when a task is nearing the end of its supply batch. A comprehensive documentation system allows you to generate reports demonstrating the cleaning and sterilisation history of each tray. These can be used to support other evidence of the CQC regulations, which relates to hygiene and infection control for the wellbeing of patients and staff.

For further information, contact Carestream Dental on 0800 169 9652 or visit www.carestreamdental.co.uk

Melag MELAtherm – decontamination made easy

The Melag MELAtherm, available from Henry Schein Minerva, sets a completely new benchmark in the world of dental autoclave technology.

This space-saving compact autoclave can fit almost anywhere in your practice. Some of the standard features include a simple, user-friendly interface, a clear and easy-to-read integrated display, and a comprehensive menu. Optima will feature on the main laboratory set that the lead actor, Leon Schreiber and Elias Koteas, will be using in action as they study mineral and water supply. Available through all dental wholesale systems.

The ThermoKlenz offers guaranteed cleaning consistency and removal of large loads, small space requirement and technical installation. It is therefore well received. The seamless upholstery is therefore well received. The seamless upholstery

The Melag MELAtherm successfully combines a large capacity, small room space requirement and technical installation and back-up from qualified Henry Schein Minerva engineers. Additionally, the Melag MELAtherm’s integrated data logger makes documentation of the entire treatment process simple, as this intuitive unit quickly and easily connects to your computer and conveniently administers all required data.

Melag MELAtherm ticks all the right boxes in terms of quality, reliability and safety standards, and for additional peace of mind is supported by Henry Schein Minerva Care Plans and extended warranty options.

To make sterilisation easier with Melag MELAtherm from Henry Schein Minerva call 0870 10 24 47 41, email sales@henryschein.co.uk or visit www.henryschein.co.uk

More information on Prestige Medical Optima autoclaves travels to Mars!

The Prestige Medical Optima autoclaves is to feature in a new sci-fi movie currently being filmed at Elstree Studios.

Last Days on Mars is set in 2036 where researchers have set up a base and laboratory. They are studying samples of material from the planet where they have discovered fossilised remains of bacteria and proof that life has existed, but the discovery has serious repercussions for the team.

If you would like to see the Cleo II in situ, without any obligation, you can arrange a visit www.carestreamdental.co.uk

Do you know...?

The average brand new dental unit water line contains approximately 50 times as many bacteria as the standard sluice in running water.

Dental water lines provide the optimum concentration of microorganisms to these, in a way that is hard to clean or remove from the water line of Legionella and other dangerous organisms in biofilm accumulation within the tubing.

Leading experts in infection control suppliers have developed a system to combat this. The Dental Water Line Solution clears the water line of 100% of biofilm and other dangerous organisms in biofilm accumulation within the tubing.

With one simple biofilm removal procedure followed by continuous application of a 1% microbactericidal solution of chlorine and water, the Dental Water Line Solution is quick, simple and cost effective compared to other treatments requiring replacement of water pipes. Use schülke Dental Water Line Solution to ensure the safety of your patients and staff.

For more information, call 0144 254 350. Alternatively, visit www.schuelke.com

When products are used exactly as stated in manufacturer’s guidelines.

W&H 24 seven website

W&H are delighted to offer video support for all the working dental team. The W&H 24-seven website is a new website which will be on display at this year’s congress. The website supports customers and serves as an important reference point for all W&H products. In addition to video support, it also gives an insight into W&H’s automated washer disinfectors and steam autoclaves and provides advice on maintenance and compliance testing for the W&H decontamination product range.

The W&H 24seven website offers: Interactive videos supported by downloadable Instructional videos. Useful advice on maintenance and compliance testing for all W&H decontamination products. The W&H 24seven website offers an easy way to access all the relevant information and is intended for both new customers and existing customers.
