**WaveOne Rotary Endodontic Files**

WaveOne® rotary endodontic files, achieve the clinician greater control while preparing the canal by respecting its true morphology.

- Addressed by Julian Webster of The Harley Street Centre for Endodontics, WaveOne enablers practitioners to prepare teeth quickly and reliably for the best possible results.
- “WaveOne will appeal to all colleagues,” said Dr Webster, “GDs who are looking for a simplified method of root canal preparation, as well as those with the well-known advantage of CareOne endodontic files. Perfect lateral and vertical files are achieved with just one single file...what more could you want?” Dr Webster said, “The new WaveOne range is a much changed, extended and improved version of DEI, WaveOne files help avoid cyclic fatigue and reduce the chances of file separation. Simple and easy to use, WaveOne rotary files are a highly cost-effective system that has been created by endodontic experts with relevant clinical experience in developing high-quality, long-lasting products.”
