BioHorizons presents its European Symposium

BioHorizons invites you to join an international group of well respected speakers for its European Symposium in Rome between 18 and 20 October 2012.

Addressing a wide range of dental implant topics including implant aesthetics, implant complications and tissue regeneration, the symposium presents the perfect opportunity to stay on top of the latest treatment options and remain aware of what techniques and products are supported by peer-reviewed research.

The event will include presentations from Carl Mitch, Michael Pikos, Jack Ricci, Sonia Laup and Brath Miller.

Also, expanding on previous year offerings, the 2012 schedule incorporates a biologic forum on the Thursday afternoon (18 October).

To find out more about this exciting event, including details of the topics to be covered, please visit www.biohorizons.com/symposium-series-Rome-2012.aspx.

For further details about BioHorizons, a company dedicated to developing evidence-based and scientifically proven products, visit www.biohorizons.com, call 01344 752560 or email info@biohorizons.com.

The Hydrosonic Electric Toothbrush gives a full-mouth clean

42,000 sonic waves per minute make the Hydrosonic Electric Toothbrush one of the fastest sonic brushes available on the market in the UK. Combined with an innovative brush tip technology and timed adversary systems, the Hydrosonic gives an immediate clean. It features a controlled brushing technique which ensures that all teeth, gums and outside of the mouth are thoroughly cleansed, and orthodontic care is left behind.

The Hydrosonic brush head features CUREXP® technology, so even when brushing in between the teeth, or hard-to-reach areas, the brush gives a highly effective yet gentle clean. It is easy to hold the brush at the correct angle for 45 degrees, thanks to the ergonomic handle, which also helps to clean between the teeth, or hard-to-reach areas.

Exclusively available from CoTech Elite, Thankyou Impression Trays present an exceptional reduction in materials and equipment costs, enabling practitioners to offer patients the smile they want without compromising safety, at a price that can’t be beaten.

For more information on how CoTech Elite can help you, call 01474 320 076 or email info@costech.co.uk.

Gengigel – Keep that perfect smile

Gengigel is a natural mouth and gum care product with hyaluronic acid as the principal ingredient. Hyaluronic acid exists naturally in the human body and assists with tissue regeneration and promotes natural healing.

In cases of mouth sores, inflamed or bleeding gums or following surgery or other trauma, Gengigel has been clinically proven to soothe and restore gums and tissues.

Gengigel is completely natural, with no side effects or contraindications, and is available from all good pharmacy wholesalers in a 155ml mouth rinse or a 20gel tube.

“ANY” Intraoral Camera lets patients monitor their oral health on their television set

A powerful new tool for helping patients to learn about their oral health is now available exclusively from The Dental Directory.

The “ANY” intraoral camera, from Gendex Dr, is a multipurpose device that can be linked to a standard television set, allowing patients to monitor their oral health from the comfort of their own homes.

Similar to a toothbrush in size and shape, the camera is simple to use for almost all patients, and can be deployed with disposable covers to prevent cross-infection between users.

Showing patients detailed images of the inside of their mouth, the ANY intraoral camera allows them to learn more about their oral health and monitor any existing conditions. It is not suitable for patient self-diagnosis.

The ANY intraoral camera is available exclusively from The Dental Directory, in display boxes of five. For more information on ANY and how it can benefit your practice, contact The Dental Directory today by calling 0030 585 510 or visiting www.dentaldirectory.co.uk.

Carl Zeiss Dental Loupes from Navone – “absolutely flawless”

Carl Zeiss dental loupe combines high-quality optics with an ergonomic design, and establishes new standards in precision vision.

Dr. Sharen B. Mehta is a Deputy Director (Clinical) of the UCLA Aesthetic Dentistry course at Kings College, London, and is principal & partner at Axl Dental Surgery, Harrow.

“I recently acquired a pair of Carl Zeiss Eyemag® dental loupes. One of the features that I was impressed by is the magnification feature. I always use a magnifying light. Being an user of magnification for the past 14 years, I can say without doubt that this has been my finest purchase ever. The magnification offered by this set is superior to any other magnification-illumination system I have used in the past, and has many enthusiastic and quality of precision dentistry to another level. The system definitely lives up to the reputation of the world class Carl Zeiss brand. My experience of these products has been further enhanced by the excellent sales advice and after sales care provided by Navone. – absolutely flawless”

For more information please call Navone on 01453 872 826, email info@navone-ltd.com or visit www.navone-ltd.com.

Sucess with the Inman Aligner

The Inman Aligner is a revolutionary appliance that uses innovative technology to straighten anterior teeth. The technique involves a lingual coil spring and a labial bar putting equal pressure on either side of the teeth, repositioning and straightening them quickly but gently.

To official trainees, Straight Talk Seminar offer both online and hands-on courses for dental professionals to gain certification, and provide the Inman Aligner as part of their treatment options.

Dr Grant McVitie, owner of the Wrecking Ball Dental Practice in Tottonham, Devon, has now been offering the Inman Aligner for over a year, and is enthusiastic about the benefits that it offers.

“The Inman Aligner has been a key addition to my treatment range and has reduced the amount of time I spend on traditional orthodontics.

The Inman Aligner improves patient choice, often providing an alternative to or reducing the need for veneers and crowns, which I think has helped save me a reputation among patients for adopting a more conservative approach.

I would certainly recommend the Inman Aligner to other dental professionals, as I’ve had so many success stories, with some patients seeing a noticeable improvement in just two weeks!”

For more information on Straight Talk Seminar visit www.straight-talks.com or phone 0458 366 5477.

Carl Zeiss OPMI Pico “sets new high standards”

Dr. Sharen B. Mehta from Kings College, London, has recently invested in a Carl Zeiss dental microscope from Navone.

“The field of endodontics has changed dramatically since the introduction of the dental microscope in the early 1990s (Kim et al. 2004) – so much so that the microscope is now an essential part of any endodontic treatment. This is because the dental microscope brings minute detail into view (Vertucci, 2005) and aids greatly in diagnosis, in the location, evacuation and treatment of canals.

For many years, the only best equipment will do. Precision engineering to produce crisp, clear images of quality, Carl Zeiss dental microscopes are recognized for their magnification and illumination systems. “The OPMI Pico dental microscope sets new high standards. What amazed me about the OPMI Pico is the technology – the quality optics and operating field illumination makes it an excellent surgical microscope. This purchase has made huge improvements in the quality and ease of endodontic treatment. Indeed, the improved gas flow and hand-piece of magnification improves all aspects of general dentistry, not just endodontics.

It can be recommended without hesitation.”

For more information please call Navone on 01453 872 266, email info@navone-ltd.com or visit www.navone-ltd.com.

EndoCare for stress-free referrals and exceptional patient care

EndoCare is one of the UK’s leading Endodontic referral centres, and prides itself on its caring, patient-centred approach. Thankyou Impression Trays – a popular new addition from CoTech Elite

Exost Elite™ has launched its new and exclusive range of Thankyou Impression Trays, using a novel approach that ensures the ring is in immediate use with dentists.

As some dentists have been found to be receiving impression trays, at considerable risk to their patients, CoTech Elite is providing the trays to all of its loyal customers for free, setting a new benchmark for value.

The rationale aims to remove the financial burden of replacing disposable tray-to-dentists, and to ensure that they dispose of impression trays after using them. Reusing the trays carries a significant risk of cross-contamination patient.

Available exclusively from CoTech Elite, Thankyou Impression Trays present an exceptional reduction in materials and equipment costs, enabling practitioners to offer patients the smile they want without compromising safety, at a price that can’t be beaten.

For more information on how CoTech Elite can help you, call 01474 320 076 or email info@costech.co.uk.
