BioHorizons presents its European Symposium

BioHorizons invites you to join an international group of well-respected speakers for its European Symposium in Rome between 18 and 20 October 2012.

Addressing a wide range of dental implant topics including implant aesthetics, implant complications and tissue regeneration, the symposium presents the perfect opportunity to stay on top of the latest treatment options and remain aware of what techniques and products are supported by peer-reviewed research.

The event will include presentations from Carl Misch, Michael Pikos, Jack Ricci, Sonia Leziy and Brath Miller.

Also, expanding on previous year offerings, the 2012 schedule incorporates a biologics forum on the Thursday afternoon (18 October).

To find out more about this exciting event, including details of the topics to be covered, please visit www.biohorizons.com/symposium-serie-italy-2012.aspx.

For further details about BioHorizons, a company dedicated to developing evidence-based and scientifically proven products, visit www.biohorizons.com, call 01344 73536 or email info@biohorizons.com.

ThankYou Impressions – a popular new addition from CosTech Elite®

CosTech Elite® has launched its new and exclusive range of ThankYou Impressions Trays, using a novel approach that ensures the range is in immediate high demand.

As some dentists have been finding recently, impressing patients at considerable risk to their patients, CosTech Elite® has provided the trays to all of its loyal customers for free, setting a new benchmark for value.

The initiative aims to remove the financial burden of replacing disposable-day-to-day equipment from dentists, and to ensure that they dispose of impression trays after using them. Reusing the trays carries a significant risk of cross-contamination.

Available exclusively from CosTech Elite®, ThankYou Impressions Trays prevent an exceptional reduction in materials and equipment costs, enabling practitioners to offer patients the smile they want without compromising safety, at a price that can’t be beat.

For more information on how CosTechElite® can help you, call 01474 320 076 or email info@costech.co.uk.

Hydrosonic Electric Toothbrush gives a full-mouth clean

42,000 sonic waves per minute make the Hydrosonic Electric Toothbrush one of the fastest sonic brushes on the market in the UK. Combined with an innovative brush head, three cleaning modules and timer, the Hydrosonic gives an immaculate clean.

The ‘hydro’ in the title comes from CosTech’s specialist Curaprox, the all-new Hydrosonic cleans the teeth, gums and rest of the mouth with minimal effort. Hydrosonic toothbrushes are thoroughly cleansed, and orthodontic braces are left spotless.

The Hydrosonic brush head features CURE® technology, an advanced, two-part, cylindrical brush head that doesn’t wear out with age. On the sonic, soft-to-touch, the brush gives a highly effective yet gentle clean. It is easy to hold the brush at the correct angle. With 45 degrees, thanks to the ergonomic handle, which also helps to clean between the teeth, or in hard-to-reach areas.

Brushing every thirty seconds for two minutes, the Hydrosonic ensures a full mouth clean of all four quadrants. There are even three cleaning modules to select: intensive, to remove stains; soft, for sensitive areas; and massage, for the gums.

Suitable for all patients, even those with implants, the Hydrosonic Electric Toothbrush from Curaprox is class in its class for maximising a healthy smile.

For more information please call 01480 862084, email info@curaprox.co.uk or visit www.curaprox.co.uk

EndoCare – for stress-free referrals and exceptional patient care

EndoCare is one of the UK’s leading Endodontic referral centres, and prides itself on its caring, patient-centric approach. For the dedicated EndoCare Team, the health and satisfaction of the patient is a priority, alongside maintaining excellent relationships with all referring practices.

This outstanding service is available in its main locations: Harley Street, London and Richmond, Surrey. Each practice features state-of-the-art equipment and facilities, and EndoCare will pay a team dedicated to providing superior treatments to all patient referrals.

As part of its mission to provide exceptional levels of care EndoCare will schedule a free appointment for all patients to return in 6 months to ensure the team can work using the latest equipment and facilities, and is staffed by a team dedicated to providing superior treatments to all patient referrals.

For further information please call EndoCare on 020 7224 0999 or visit www.endocare.co.uk

Exquisite “ANY” Introral Camera lets patients monitor their oral health on their own television

A powerful new tool for helping patients to learn about their oral health is now available exclusively from The Dental Directory.

The “ANY” introral camera, from Vidoco, is a multipurpose device that can be linked to a standard television set, allowing patients to monitor their oral health from the comfort of their own homes.

Similar to a toothbrush in size and shape, the camera is simple to use for almost all patients, and can be deployed with disposables to prevent cross-contamination between uses.

Showing patients detailed images of the inside of their mouth, the ANY introral camera allows them to learn more about their oral health and monitor any existing conditions. It is not suitable for patient self-diagnosis.

The ANY introral camera is available exclusively from The Dental Directory, in display boxes of five. For more information on ANY and how it can benefit your practice, contact The Dental Directory today by calling 0800 585 586 or visiting www.dental-directory.co.uk.

Carl Zeiss ODM: Loupes from Nu vene – absolutely flawless

Carl Zeiss dental loupes combine high-quality optics with ergonomic design, and establish new standards in precise vision.

Dr. Sharen B. Mehta is Deputy Director (Clinical) of the UK’s Aesthetic Dentistry course at Kings’ College, London, and is principal/partner at DF Dental Surgery, Harrow.

“I recently acquired a pair of Carl Zeiss Eyemag Loupes and was delighted!

Light. Being an unaided magnification for the past 14 years, I can say without doubt that this has been my finest purchase ever. The quality of vision offered by this set is superior to any other magnification-illumination system I have used in the past, and has made my examination and quality of precision dentistry to another level. The system definitively lies up to the reputation of the world class Carl Zeiss brand.

I am not familiar with this particular system. However, I have seen it in practice and have been impressed by the excellent image quality and the ability to perform fine work. The Carl Zeiss ODM Loupes are an excellent investment.

For more information please call Nu vene on 01453 872646, email info@nu-vene.com or visit www.nu-vene.com

Gengigel – Keep that perfect smile

Gengigel is a natural mouth and gum care product with hyaluronic as the principal ingredient. Hyaluronic exists naturally in the human body and acts in tissue regeneration and promotes natural healing.

In cases of mouth ulcers, inflamed or bleeding gums or following surgical or orthodontic procedures, Gengigel has been clinically proven to soothe and restore gums and tissues.

Gengigel is completely natural, with no side effects or contraindications, and is available from all good pharmacy wholesalers in a 155ml mouth rinse or a 20g gel.

For more information, contact Meiler Ltd on 01934 710022.

Success with the Inman Aligner

The Inman Aligner is a revolutionary appliance that uses innovative technology to straighten anterior teeth. The technique involves a lingual coil spring and a labial bar putting equal pressure on either side of the teeth, repositioning and straightening them quickly but gently.

To show to some of its special offers, The Dental Directory has launched a discount code for publications catalogue from 1st July. The discount will be on a selection of well-known products to bring savings to practices around the UK.

To learn more about Pricewatch and The Dental Directory’s fantastic range of infection control products, speak to your Dental Directory Representative, call 0800 585 586 or visit www.dental-directory.co.uk.

BKH Healthcare by your side. For more information about BKH please call 0161 820 5466 or email Al Kwong Hing at al@bkh.co.uk, Chris Barrow at chris@bkh.co.uk or visit: www.bkh.co.uk or visit www.cla rke@bkhgroup.com; YouTube: www.youtube.com/BKHelthcare

Carl Zeiss OPMI Pico: “Sets high standards”

Carl Zeiss OPMI Pico (Carl Zeiss OPMI Pico Surgical) has recently invested in a Carl Zeiss dental microscope from Nu vene.

Carl Zeiss dental microscopes have changed dramatically since the introduction of the dental microscope in the 1990s (Klein et al 2004) – so much so that the microscope is now an essential part of any endodontic treatment. It is because the dental microscope brings minute detail into view (Vermeulen, 2002) and aids greatly in diagnosis, the location, evacuation and treatment of canals.

For more information on the best equipment we do. Precision engineering to produce crop, clear images of fabulous quality, Carl Zeiss dental microscopes are renowned for their magnification and illumination systems. “The OPMI Pico dental microscope sets new standards. What amazed me about the OPMI Pico is the quality optics and operating field illumination makes it an excellent surgical microscope. This purchase has made huge improvements in the quality and ease of endodontic treatment. Indeed the improvement gained from the use of magnification improves all aspects of general dentistry, not just endodontics.

For more information please call Nu vene on 01463 872266, email info@nu-vene.com or visit www.nu-vene.com.

To take advantage of Syntol’s unique properties, leading producer of natural products Syntol manufactures a range of natural-based oral hygiene products including Spry Dental Floss and Syntol Toothpaste both syntol.

Each tube of Syntol Toothpaste is made with all-natural sytrol and is designed to leave teeth feeling clean, smooth and extra fresh. With a variety of flavours including Spearmint, Peppermint and now also Cinnamon, Syntol Toothpaste gives you the feel of a new weapon on the war on dental plaque and is available both with and without fluoride.

For further information contact Anyon 4 Tea Ltd on 01482 652 131 or visit www.anyon4tea.com

Brush to success with Syntol Toothpaste
Since it was first introduced as a key ingredient in toothpaste in the mid-1970s, Barista has been one of the most important weapons in the fight against plaque formation. But while Barista has long signified supreme in preventive dentistry, there is another name gaining support from dentists across the world.

Syntol is a white crystalline sugar alcohol sweetener that looks and tastes just like the sugar we use in our everyday life. Thanks to its unique composition, Syntol is unavailable in the metabolism of bacteria – the bacteria most closely associated with dental plaque.

The Waterpik Water Flosser – A breakthrough in dental care

With a reputation for innovation for the dental profession, Carestream Dental has been instrumental in advancing technology to the next level.

A lightweight, ergonomically designed instrument utilising the latest H4 technology for improved freedom of movement around the chair, it is also allows for ease of sharing with other clinicians possessing efficient workflows. The information can be directly transferred and displayed on either a computer or video monitor, making patient interaction more dynamic. For more information please call Carestream Dental on 0800 169 902 or visit www.practiceworks.co.uk

Focusing like the human eye, the Kodak Ektalogic digital camera captures high resolution images and video with undetected light reflection eliminated by the automatic adjustment to lighting conditions. The user can take still portraits, full, intraoral and macro views with LEDs for optimal illumination of even the hardest to see areas. The Kodak 1500 camera also utilises the latest H4 technology to completely transform patients’ smiles with the Unique “Permanent Dental Implant”. This method also reduces the need for bone grafting and promotes far shorter recovery times.

The procedure takes advantage of the dense bone that remains in the front part of the jaw, placing implants at an angle for additional strength and support. This method also reduces the need for bone grafting and promotes far shorter recovery times.

The current legal issues regarding the sale of a leasehold practice

The practice is becoming increasingly discerning when it comes to lending for the purchase of dental practices. Nowadays the terms on which they will lend are increasingly strict. Fortunately though, the window of opportunity has not entirely closed but what we are seeing now is that the banks are still prepared to lend, but are seeking greater security.

In cases with a shorter period before the lease expires, it is necessary to negotiate a new longer lease with the landlord. This may be more difficult if the landlord has a tenant in place for a longer period of time, so they will usually cooperate as long as you agree to pay any legal costs.

So if you are thinking of selling your practice in the near future, it may be worth starting the procedure to extent your lease as soon as possible, so that the practice is saleable when the lease expires.

Make dentures a thing of the past at United Smile Centres

At United Smile Centres we specialise in offering a highly effective alternative to dentures, and a powerful solution for patients with failing teeth.

Our revolutionary approach to dental implants utilises the very latest in implant technology to completely transform patients’ smiles with the Unique “Permanent Dental Implant”. This method also reduces the need for bone grafting and promotes far shorter recovery times.

By referring your patients to United Smile Centres you can be sure your patients will be in good hands with our highly experienced, dedicated team of dentists and technicians.

Clinical Innovations Award ceremony

This year’s Clinical Innovations Awards (CIA) were a tremendous success, confirming yet again that the event is one of the leading aesthetic and restorative dentistry awards in the UK. In the build up to the success on previous years, the 2013 CIA featured a long line-up of world class speakers from around the world, featuring a range of lectures and live workshops. This year, Spry and the AGD, launched the Clinical Innovators Award – a unique award designed to showcase the best, most innovative products on the market today. The judging panel consisted of a number of esteemed dental professionals, as well as members of a number of key journal editorial boards. After much careful deliberation by the panel, Chair of the London Deanery Miss Elizabeth Jones announced the winners:

Winner: Monica – Spearmint 10135 94t – Highly Commended WPi – Porcelain light probe - Commanded: NIS 5 MAX PRO HARDBUFFER
The AGD hosted its third annual Clinical Innovators Charity Ball. With hundreds of delegates taking the opportunity to enjoy exquisite food and brilliant entertainment, the evening was thoroughly enjoyed by all.

Dental Show 2013

The Dentistry Show 2013: New Chair for the Dental Nursing Conference announced

The Dentistry Show is proud to announce the new Chair for the Dental Nursing Conference 2013 is Laura Horton, from Laura Horton Consulting. Laura works with dental teams across the country. Examinations Director of The Dentistry Show, Chris Brown, is highly enthusiastic about the event:

“Having Laura host the Dental Nurses’ Theatre at Dentistry Show 2013 is a huge coup for us.”

Her career began as a dental nurse in 1996 –

– this has led her to become one of the most passionate ADO advocates around and her enthusiasm for helping DNs is infectious! I’m no doubt that the two days of presentations, as well as introducing some hugely inspirational case studies will mean, along with the theatre, the show is a theatre room only.

The programme for the Dentistry Show 2013 will be announced in the coming months, but the dates in your diary now and make sure the dental nurses in your team don’t miss Laura and a host of inspirational speakers covering all dental topics. Next year, the event takes place on 1st and 2nd March, NECC Birmingham. For further information visit www.thedentistshow.co.uk. For any other queries please call 020 7434 5269 or email info@thedentistshow.co.uk.

Smile-on: delivering quality education

Smile-on and the University of Manchester now provide an MSc in Restorative and Aesthetic Dentistry.

If you are a busy practitioner looking for a platform to enhance your current clinical practice this MSc is the ideal course for you. A combination of theory and practical e-learning modules and instructor-led learning ensures that all of the resources needed to expand your practice are included. Leading international experts are on hand to discuss current issues, and the two-course structured is so that you can learn at the pace that suits you best.

Both Smile-on and the University of Manchester have outstanding reputations for a range of dental courses and we can’t wait to see what the student cohorts of this innovative new course will achieve. For further information visit www.unimanchester.ac.uk or call 0161 275 8999

The Current Dental Show 2013 will be announced in the coming months, but the dates in your diary now and make sure the dental nurses in your team don’t miss Laura and a host of inspirational speakers covering all dental topics.
