BACD protocols: improving patient treatment

In order to assimilate, prevailing protection against gum problems, plaque, plays, calculus formation, erosion and dental hyperplasmy, but also because it has been shown to be particularly effective in the inhibition of antibacterial activity and capture of bacterial molarceous.

One year restorative dentistry course
Tipton Training, private dentistry practice with academies in Manchester, London, Leeds, Edinburgh and Dublin, has over 22 years of experience in dental education.

Acclaimed restorative dentist, Dr Tim Panton, specialist in Prosthodontics and a team of highly knowledgeable lecturers deliver a restorative dentistry course in Private Dentistry. Delegates also benefit from the wealth of experience of the lecturers, one-year practical experience and tours of other restorative courses in Private Dentistry.

The course has a number of sessions, including lectures, hands-on workshops, group discussions, and case studies. It is designed to help dentists acquire new skills, confidence, and knowledge and to look towards the future of dental care.

The course is delivered over one year. It follows a step-by-step programme in the form of lectures, practical training sessions, give you the confidence to take on more complex restorations and play a key role in your professional development.

For more information contact Dr Tim Panton at timber@admor.co.uk or call 0121 248 4700.

DentalEZ product release

DentalEZ have been named as the Official Supplier of lighting systems for the world’s largest dental trade show, which is taking place in London on 27th September and 1st October.

DentalEZ have been named as the Official Supplier of lighting systems for the world’s largest dental trade show, which is taking place in London on 27th September and 1st October.

Dr Ken Harris at the 2011 BACD Conference
The BACD conference 2011 will take place at the Hilton London Metropole Hotel in Edgware Road from 10th-12th November.

Dr. Ken Harris is a specialist in periodontal disease and the choice of restorative material becomes less important, which will consider applying the occlusal philosophy of Dr John Keas to everyday dental practice.

Delegates will learn to: Grasp the five occlusal conditions.

Describe the fabrication protocols for the occlusal materials that are used.

Discuss and practice the step-by-step occlusal design principles.

Examine the occlusal design principles and techniques.

Register online before the end of September and receive a 10% discount.

In addition to this, the first 25 people to register online will be entered into a prize draw to win a full course digital X-ray machine.

For more information please contact Dr Harris at support@admor.co.uk or by calling 0121 248 4700.

Dental patient care

The Dental Patient Care Blog provides all dental patient care from Dental EZ provides clear, accurate, unbiased and objective information, especially when combined with the importance of ensuring that the restorative process is performed in the correct order, ensuring maximum benefit to the patient.

The exclusion of fillers on the upper lip area can help maintain proper spatial adjustment to reduce stress on the temporomandibular joint (TMJ) and the muscles guarding the patients’ spaces, helping maintain the ethics of utilised and well-sealed, around which the products are conceived.

DentalEZ also produce treatment centres, lights, stools, suction and hand pieces for the dental surgery.

The Dental EZ Company of companies also includes Star Dental, Custom Vac, Nevin Labs and Columbia Dentistry.

Curaprox interdental brushes - an effective adjunct to maintaining optimal oral hygiene

Curaprox has developed a range of ultrafine interdental brushes that fit into each interproximal space between the teeth, effectively removing plaque without damaging the gums. Good periodontal health appears to play an increasingly important role in the fight against diabetes and heart disease.

Curaprox brushes are designed using CURAFIL, a novel fibre that offers excellent durability without compromising on core width, and is able to withstand the wear and tear of frequent use up to five times longer than other brushes. The soft and flexible filaments of Curaprox interdental brushes also provide effective cleaning power whilst remaining gum-friendly.

With thirty years of experience in dental care, Curaprox offers an impressive range of products designed to assist with every aspect of oral health. For more information please call 01400 883 303 or email info@curaprox.co.uk or visit www.curaprox.co.uk

Trust... the Dental Directory

The Dental Directory is the UK’s largest Dental Product Supplier stocking over 25,000 product lines, so if you can’t find it here, you probably won’t find it anywhere. Which is why we have one of the most comprehensive ranges of general hygiene products available.

All with free next day delivery our general hygiene range consists of everything you need to prevent cross infection and comply with the latest decontamination guidelines. Our general hygiene range includes all the well-known brands of disinfectants, cleansers, detergents and soaps as well as your favourite products from the Dental Directory exclusive brands, UniDent and Class D.

The Dental Directory also has a vast equipment division, stocking all the latest decontamination equipment, including autoclaves, handpiece cleaners, system washers, decontamination systems and thermosealing systems.

For your infection prevention and practice hygiene needs, call The Dental Directory on 0800 585 586 or email info@thedentaldirectory.co.uk or visit www.dentaldirectory.co.uk

Cabinet built to work around you

Cabinetry is a crucial part of your Dental Surgery. The decontamination room, Clark Dental offers complete installation of cabinets and units that works around you and your practice.

Fully compliant with regulatory standards, there is a wide range of styles to suit any practice and Clark Dental will work with you to maximise space and efficiency.

The ‘Elite’ and ‘Ultimate’ wall and base units range from Apex are ideal for a more traditional practice and are available in two finish options: The Elite range, offering an impressive, resilient, high-gloss laminate finish; and the Ultimate range, with solid acrylic doors.

Apex cabinets are custom-made and hand finished to your precise requirements and, in keeping with the ethos on ergonomics, every drawer and down in the Apex range have ‘soft close’ features fitted as standard.

For more information contact Clark Dental on 01268 733 146 or email enquiries@clarkdental.co.uk

Taking the stress out of surgery design

Clark Dental is a family run company supporting the dental profession for over 37 years. Experience speaks volumes in fact. Many new customers come to Clark Dental through recommendations and existing clients turn to Clark Dental at time after time when they need to refit or redecorate their surgery. Clark Dental understand that surgery is a stressed and time consuming process. That is why Clark Dental uses computer aided design to produce the perfect finish for any Surgery. You can then take a virtual tour, making changes easily and quickly on the computer, trying changes, and finalising the layout you believe will be the best possible use of space. Once you’ve made your decision, the Clark Dental team will manage the project right through to completion and beyond, including supply to installation, training and advice throughout the whole process.

Your surgery is more than your workplace; it should create an impression to prospective patients and create the right atmosphere for existing patients. Clark Dental will help create a welcoming environment, where patients will feel confident and comfortable.

You can feel equally confident and comfortable with Clark Dental as an integral part of your design team.

For more information contact Clark Dental on 01268 733 146 or email enquiries@clarkdental.co.uk or visit www.clarkdental.co.uk

“Nobel Biocare provides an excellent level of continuing care.

Nobel Biocare has over 40 years’ experience in the design and manufacture of dental technologies, and has a global reputation for creating reliable, restorative and aesthetic dental solutions. Dr Ry Valland of Leading Dental Implant Specialists in London said: “we use NobelBiocare® implants in day-to-day implant practice and are extremely happy with the results”, which is particularly suitable for immediate extraction cases.”

I need an implant that is strong and bone born while providing excellent primary stability - a must for immediate loading. NobelBiocare® implants fit all my oral AB-implant cases.”

To help me plan cases well in advance I use NobelProcera™ for most of my implant work. I also use NobelGuide™ as it helps me to place implants with greater accuracy, makes my team feel more secure and saves me a lot of time.”

*Nobel Biocare provides an excellent level of customer support and the company’s prosthetic product range is impressive. In comparison to many others on the market, the company is forward thinking and are backed by strong scientific evidence.”With its wide range of innovative products for all indications and the support of knowledgeable representatives, Nobel Biocare enables practitioners to make a real difference to their patients’ lives.

For more information contact Nobel Biocare on 0208 756 3305 or visit www.nobelbiocare.com

Infection control – taken care of

Dentists’ growing need for infection control products is the ideal solution to the requirements of HTM01-05. Biocleanse is a wide spectrum, alcohol-free microbicidal that cuts through cross contamination and leaching and leaves a clean and decontaminated surface. A video showing the effectiveness of Biocleanse alcohol free sops is now available to view at www.dentisan.co.uk

HTM01-05 guidelines recognise the benefits of pre-soaking surgical instruments as an aid to decontamination processes, and highlight the importance of decontamination and disinfection as a necessary practice. Caparol Biocleanse is a non-hazardous, water based liquid that prevents blood and tissue from becoming ‘sickied-over’. Supplied in a trigger spray, Dentisan helps dental professionals and dental surgeons to reduce the risk of cross contamination and the disease burden.

Biocleanse has been developed in association with the University of Nottingham and has proven efficacy against the bacteria that make up biofilm, inhibiting re-growth of the film enabling a system to maintain water quality of <200 cfu when treated weekly. Biocleanse is water-based, alcohol free and pigmented and is available as a ready-to-use liquid. When used once a week it is both curing and preventative.

For full details on Dentisan’s full range of HTM01-05 compliant products visit www.dentisan.co.uk

Manchester Dental Practice leads the way with Cone Beam 3D Imaging System

Dental health care professionals and specialists attended Manchester’s Mall Advanced Dental Practice to see for themselves the first NewTom VGI 3D Imaging System, those attending the in-depth evening’s presentation were given a full demonstration of the NewTom VGI and shown a detailed case study. Until recently, implant specialists have used CT scanning (Computerised Tomography or CT) (computed axial tomography) scanning. Traditional CT uses a narrow fan beam that rotates around the patient acquiring thin axial slices with each revolution. The NewTom offers a 360° degree rotation in the patient position in the scan area. This X-ray tube revolves around the patient’s head emitting a cone-shaped beam to acquire the entire patient in a single rotation, creating a series of 360 flat plan images, one for each of the 360 degrees it rotates. A very short scan time of 2-3 minutes and the patient to two minutes of radiation; a NewTom scan takes just 18 seconds and because it uses Saldibar’s technology and pulse delayed x-ray exposure the patient’s 360 degrees of view with an additional 30 seconds using the NewTom Cone Beam 3D Imaging Systems gives more information than conventional CT scans meaning greater accuracy in detection and diagnosis.

For more information contact PNN Dental on 08000 839375 or visit www.dental-equipment.co.uk/telemetry

Use the Waterpik® Nano Water Flosser for a more reliable, comfortable flossing experience. The Waterpik Nano Water Flosser is the smallest and most lightweight Waterpik® flosser available, making it easy to take with you. With just a few seconds of brushing and flossing, you can achieve a beautiful smile than any cosmetic can deliver. Many patients often forget that a good oral hygiene regimen is needed to maintain a healthy smile. In a world obsessed with aesthetics, patients often forget that a good oral hygiene regimen is needed to maintain a healthy smile.

Under Armour Performance Mouthwear®:

"Serious Mouthwear For Serious Athletes"

Many dentists will be familiar with the demands of intense physical training, either through treating athletic patients or through taking part in the sport themselves. Whether you are interested in sport as a dentist, an athlete or both, you will be intrigued and amazed by UAPM from Under Armour Tech. UAPM is designed to relax the jaw during periods of intense physical activity, allowing the user to train longer and with more quality. “When I’m running it keeps me relaxed, which is vital for the long distances involved in Ironman,” I now perform at a higher level for longer. With my UAPM to help me I am chasing a world championship qualification this year. Unlike Nike’s Kawhi Leonard and his Under Armour performance mouthguards, I was immediately interested in Under Armour Performance Mouthwear®.

DENTSPLOY Rewards

Quality rewarded.

In the current financial climate, dental practices need to keep an eye on costs and product quality. The DENTSPLOY Rewards scheme is designed to simplify this. DENTSPLOY is a well-established and well-known brand such as Spectrum ® and Prime and Bond NT ™. Available in an easy to use capsule, ChemFil Rock is an adhesive glass ionomer cement for cavity conditioning or final coating. ChemFil Rock has a non-sticky packable consistency that provides the practitioner with confidence in the longevity of the restoration and the patient superior wear.

Tavom Combining form and function:

Tavom is renowned for its high quality practice furnishing that can be easily adapted to suit each individual practice’s needs. Some of the components are easy-to-clean vertical edges and a wide choice of worktops and workstations. Free-standing and fixed modules are available. The modular design of Tavom’s range provides a high level of advice and bespoke solutions for every situation, whether you are installing a new practice or transforming an existing one. The modular design and components are designed to interlock, allowing maximum flexibility and a high level of comfort and practicality. Clutter-free, hygiene working environment Tavom can be trusted to incorporate into any practitioner’s lifestyle.
