Nusonic NAC: Effective instrument decontamination for use in ultrasonic baths

In the current climate of MRSA and CDiff scares, it has never been more important for dental professionals to strictly adhere to the HTM 01-05 essential quality guidelines requirements on the decontamination of instruments.

Understanding the pivotal role that decontamination plays in today’s dental world, Blackwell Supplies offers an advanced cleaning solution. Ultrafast-ultrasonic, no-foam, non-ammoniated concentration designed for use in sonic cleaning devices.

The advanced formulation of Nusonic NAC provides dental professionals with an efficient and effective method of not only cleaning instruments, but also degrading and biociding them. Complete with an in-built neutralizer, Nusonic NAC decontaminates, ensuring the longevity of the instruments.

The concentrate is designed to be diluted so to meet the specific cleaning requirements, equipment, economical provision of the highest standards of infection control. Nusonic is available in both 1 and 5 litre bottles. Blackwell Supplies is one of the UK’s leading suppliers of specialist products to the dental hygiene market. Nusonic is the as-effected as possible, and food decontamination for use in ultrasonic baths.

London Centre for Implant and Aesthetic Dentistry

The London Centre for Implant and Aesthetic Dentistry has relocated to newly renovated premises at 28 Wimpole Street. The modern practice now boasts three state-of-the-art operatory rooms, a consultation room, a spacious, airy waiting room, a laboratory in the planning and a growing team of expert dentists. Whether you are a new patient or an established patient, the Centre's highly skilled and experienced team of dentists are always receiving positive feedback from new and existing patients.

Referring practitioners are welcome to attend any stage of their patient's treatment plan and are provided with a free monitoring session as a thank-you gesture for the referral. After treatment, patients are offered long-term support and maintenance for the restorative work undertaken at the centre and close contact is kept regarding any subsequent treatment and aftercare required.

For more information on referring to Dr Feren, call 0207 224 1488 e-mail info@kemdent.co.uk or visit www.kemdent.co.uk.

New Diamond Micro Luting Cement Capsules

The latest edition to Kemdent’s popular Diamond range!

The new Diamond Micro Luting Cement Capsules is the latest addition to the popular Diamond range of GE restoratives. Kemdent clients can benefit from a special introduction of 25 per cent discount on this product if they purchase it during January.

Diamond Micro is a micro-reinforced, chemically-curing, glass ionomer cement for permanent cementation of porcelain and castings, crowns and bridges from aluminium-oxide or Zirconium-only crowns, posts, metal inlays, onlays, crowns, bridges, porcelain fused to metal crowns, bridges on hard dental tissue and composites.

With a working time of 2 - 4 minutes, Diamond Micro is a low temperature and a set-in-the-mouth-time of 3 - 5 minutes, these capsules are easy to handle, have a low viscosity in the mouth and high adhesion. They also have an excellent potential for luting Zirconium-Oxide Crowns.

Kemdent offers these in boxes of 20 x 0.25g capsules and value packs of 60 x 0.25g capsules.

For information on Kemdent's full range of Diamond products or to request your free sample, call Helen or Jackie on 01793 770090 or visit our website, www.kemdent.co.uk and follow us on Twitter @kemdent.

Did you know that...?

"I’Il definitively be attending next year’s event!

Dental professionals who attended the Clinical Innovations Conference 2010 continue to give the event rave reviews. The conference, which was held every two years, is designed to bring together leading minds in restorative and aesthetic dentistry.

Rutha Lynam was present at the original Clinical Innovations Conference, sponsored by Smile-En, after attending one of Smile-En’s courses.

"The event was absolutely brilliant" says Rutha, “The food was superb, the service was great and the dental professionals were excellent. Al of the talks were clear, and especially Dr Ozram’s reenactment course. The conference was both motivating and inspiring – so much so that I implemented what I had learned immediately in the practice when I returned home. It really gave me a new perspective on the practice in the way I do things."
