Digital Dental
New high-resolution 3D endodontic imaging from Digital Dental

Digital Dental now offers the complete ProfiLine®

This includes a new imaging mode specifically designed for endodontic diagnosis, which further extends your capability with the latest advance in cone beam technology. Not limited to implant planning, assessment of endodontic treatment complications, diagnosis of perinatal pathology, root canal system anomalies, root curvature, true measurements and the determination of exact root apex location in pre-surgical planning are just some of the more complex cases where viewing the anatomical features in 3 Dimensions is a real advantage.

The Plasmacer ProfiLine 3D family deliver highly focused, non-free, high-resolution 3D volumes for endodontic and periapical imaging; new ultra-low-dose modes for orthodontic, surgical and post-treatment planning, and new, multiple small volume imaging for implant planning. So cost effective they are ideal for any specialist or multi-disciplinary practice. See more on Stand J35 at the Dentist Show or visit www.digitaldental.co.uk

New online store makes implant orders easy

Leading the way at the forefront of dental technology and innovation, Nobel Biocare has launched its brand new online store found at store.nobelbiocare.co.uk. The new online store has been designed to provide a quick and simple online shopping experience, with over 1,700 products available at the click of a button. Simply complete the short registration process and within a matter of moments you will be able to order all of your Nobel Biocare products whenever and wherever you want.

Key features of the online store include:
• Intuitive navigation, including a quick buy function
• Personalized product recommendation based on your purchase history
• Convenient product filtering
• Free access to customer support
• Limited time money-back guarantee for components purchased online

With Nobel Biocare’s new online store, ordering products is quicker and easier than ever before. With your dedicated customer support team always available during regular office hours, the online store provides a suitable extra option for even greater flexibility, so you can spend less time ordering, and more time working on the things that really matter.

For more information contact Nobel Biocare on 0208 716 5100 or visit www.nobelbiocare.com To register for the Nobel Biocare Online Store go to store.nobelbiocare.co.uk

Platinum has become even more precious

The Philips Sonicare FlexiPlaque Platinum is the latest in the brand’s award-winning sonic toothbrushes to win an accolade. It has just been lauded as the “Dental Hygiene Product of the Year” at the FyliFacialBody Awards.

A number of dental professionals have also given the new brush the thumbs up. Internals results of a recent user trial have revealed unequivocal respect for the brush and the full results will be revealed in the New Year at the conclusion of the survey.

Launched in April this year, the Philips Sonicare FlexiPlaque Platinum is an advanced sonic toothbrush which was designed to give patients an even deeper interproximal clean and remove up to seven times more plaque from between teeth than a manual toothbrush. It offers the user new different brushing modes and intensity settings.

For more information about the award winning Philips Sonicare FlexiPlaque please telephone 0800 055 312.

Sparkle Dental Labs – “Good workmanship and service at a competitive price”

Sparkle Dental Labs is a Yorkshire-based dental laboratory that complements terrific products with outstanding customer care. Its aim is to make high quality dental products that are affordable for all. Every product it makes, from crowns to implants, is skillfully crafted by one of Sparkle Dental Labs trained technicians at its laboratories in Leeds. Sparkle Dental Labs operates a quick turnaround procedure which means that its clients don’t have to wait long for their products. This means they can treat their patients more efficiently and raise the standard of their own-patient care.

Dr. Nevin Vettsanur, Practice Principal at Wellington Dental Care in Leeds, Yorkshire says: “Sparkle Dental Labs has a proven track record with good workmanship and service at a competitive price, enabling our practice to provide the quality work and service to our patients. Their quick turn over means that for most stages of work including construction of metal dentures has enabled our practice to provide a very efficient service to our patients without compromising standards. It is well worth giving them a try.”

For any additional information please call 0800 138 6255 or email customercare@sparkledentallabs.com or visit www.sparkledentallabs.com
"I am over the moon with the results." - Orthodontic Referrals at the London Smile Clinic

According to a recent UK survey, nearly two thirds of respondents would rely on a word of mouth to choose a dentist. Would your patients recommend you to their loved ones?

Help your patients to feel valued by referring their orthodontic treatment to the London Smile Clinic. The team is headed up by Specialist Orthodontist Dr Preet Bhoogal and supported by state-of-the-art facilities and equipment. Referring dentists are consulted at every stage of the referred treatment and receive before and after photographs as standard.

"I am over the moon with the results! I can totally relax in front of others and can laugh as much as I like without covering my mouth with my hands." - patient. Referring ensures patients’ care and wellbeing for specific treatment outside of your skill set. It's an excellent way to build trust and loyalty to your patients. Patients will return to you with a spring in their step and greater interest in maintaining their beautiful new smiles.

For more information, please contact 020 7235 2559 or visit www.londonlsmile.co.uk

Compliance for digital imaging equipment

Dentists need to ensure their digital equipment is regularly maintained, to fulﬁl their legal obligations. A comprehensive Service and Support Plan from The Dental Imaging Company enables practices to comply with all Department of Health safety regulations. Any employer who has control of equipment used in connection with medical equipment to ensure that the maximum possible degree of compliance is maintained. The Health and Safety Executive’s Guidance on medical exposure to ionising radiation has a legal responsibility for ensuring that the law is complied with.

Futurabond® U

Dual-curing universal adhesive

Futurabond U is the market’s only true dual-curing universal adhesive offering usage in a disposable applicator. Besides the incredibly high performance, the ease of use of the new Futurabond U offers practitioners an outstanding range of options for application, as much with regard to indications as to selection of the stitching technique (self-etch, selective etch or total etch) or the curing mode. This makes the new Futurabond U an excellent choice for different applications. It is highly compatible with all light-curing, dual-curing and self-curing methacrylate-based composites and is suitable for both direct and indirect restorations. Applied in a single layer, Futurabond U creates a strong bond to enamel and dentin, thus ensuring a durable, gap-free bond between the dental hard tissue and the restorative material. At the same time it offers firm adhesion to different materials such as metal, acrylic/aminoplast and silicone cements without any additional primer.
