Bold new approach puts the worker at the heart of quality dentistry

Match and Smirk versus The Laughing Tramps in their surgeries to fast-track in an existing series of CPD events created by Baci Partnership Healthcare. These insightful workshops will focus on offering dental professionals new ideas to help tackle the challenges of practice ownership, including the latest guidance on dental law and regulations. Attendees at Baci Dental Recruitment’s recent CPD course held at 151 Great John Street, Dentists. In associated with Kent, Surrey and Sussex Deanery and UCL Eastman, are proud to present the following Schedule of Workshops, offering specially designed courses for dental professionals on the go.

COPD is an essential part of the career of any dental professional but fitting career development around a busy treatment schedule can be extremely difficult for the best of times. Add to the time it takes to travel to and from lectures and workshops and learning becomes a real headache. This is why the BACD has, in association with Kent, Surrey and Sussex Deanery and UCL Eastman, is proud to present the following Schedule of Workshops, offering specially designed courses for dental professionals on the go.

There is no time to be spent flying to the next big course in the city. Composite hardness testing and the introduction of non-metallic restorative systems are required to carry out highly topical practice-based research on a subject related to restorative dentistry and they have the convenience and the flexibility of undertaking this within their own dental practice. Support is available from a comprehensive 11-day course that will leave you confident to manage, as more frightening than snakes. The UCL Eastman Dental Institute offers.

The 2011 BACD Conference: not to be missed!

For the past seven years the British Academy of Cosmetic Dentistry has organised an annual conference of cosmetic dentistry, providing dental professionals with a way of meeting colleagues and exchanging ideas. This year, the BACD Conference is held in association with the British Academy of Cosmetic Dentistry, Metroplis in London’s Edgware Road from the 10th – 12th November. The theme of this year’s conference reflects the recent trend towards more natural looking smiles.

The BACD conference is the perfect opportunity for dental professionals to network and advance their knowledge, whilst earning CPD.

You can register for the BACD conference at www.bacd.co.uk and priority will be given to those who register before the end of September. Register online before the end of September and you will receive a 10% discount per person. In addition, this is the first opportunity to register for the Zoom whitening sessions to take place in Manchester (4th Oct), Birmingham (28th October), Heckmondwike in Yorkshire (4th November), December (18th November), Oxford (5th December) and Hartlepool (16th December).

Please are strictly limited so to book your place contact General Medical on 01813 736000, visit www.generationmedical.co.uk or email info@generationmedical.co.uk

For more information on any aspect of the BACD email suzy@bcd.com

Don’t be a Jack of all trades, be a master of one

The need to support oneself financially means many dental health professionals have to forgo further training and professional development, and despite additional qualification by studying in their spare time. UCL Eastman Dental Institute experts will provide supervision and support. Attendees at a Dental Recruitment’s recently launched CPD programme will be given the chance to undertake further learning at their own pace. The Zoom whitening sessions will be performed twice daily at stands D07 & D08 between 20 – 22 October where trade show delegates will be invited to try the whitening process. To enter, potential candidates are being asked to upload a copy of their smile and email it to the company at info@generalmedical.co.uk. Each delegate who enters will review their teeth. Those judged to be most in need of whitening will have the opportunity to walk away from the exhibition with a bright, white smile on their face. UCL Eastman Dental Institute offers.

Tavom Furniture: innovative, practical and stylish, ‘live and in person’, the dramatic whitening results.

The message of the course was clear: every dentist has the capability to offer cosmetic dentistry to their patients. Accessible Aesthetics was created by Next Step Seminars, the expert team who have made it easier than ever before for busy, working dentists to undertake new training.

What’s Missing?

Three global titles from the Dental Tribune International portfolio are coming to the UK. Published quarterly, each of these glossy, clinically-focused titles aims to bring you the latest developments in the fields of implantology, endodontics and cosmetic dentistry in a clear, easy to read format.

What’s missing?

implants

Fill the gaps... implants, the international magazine of oral implantology, delivers the latest thinking in this fast-moving area of the dental profession. User-oriented case studies, scientific reports, meetings, news and reports, as well as summarised product information, make up an informative read.

You got the look...

cosmetic dentistry

You got the look... cosmetic dentistry - beauty & science presents the most significant international developments in the world of cosmetic and restorative dentistry. With an editorial mix of speciality articles, clinical studies, case reports, industry reports, reviews, news, and lifestyle articles, cosmetic dentistry leads the way.

Enjoy Endodontics?

roots

Down your canal... roots is the place to keep up with the latest developments in the endodontic arena. A combination of comment, studies, case reports, industry news, reviews, and news, those professionals with an interest in endodontics will find roots invaluable.

be to open a new facility for disabled people, who would otherwise find receiving dental care extremely difficult, in Musoma, Tanzania. Group members along with their travelling companions will fly out in February 2012. The endeavour will also incorporate visits to the Rift Valley and the Masai Mara National Reserve and finish with affiliates being honoured guests at the Clinical Innovations Conference in South Africa’s Cape Town, which is jointly supported by the AOG and the dental education group Smile On and is being held between the 25th and 25th February 2012.

The organisation’s benevolent works do not just extend to its own projects, however. The catastrophic tsunami that hit south Asia in 2004 resulted in £100,000 being donated for relief projects by AOG members in one night. It is hoped that the 2011 Annual Ball will see a similar level of generosity on display.

As well as being an opportunity to contribute to worthy causes, the Annual Ball guarantees an extremely pleasant and enjoyable evening for those attending. Starting at 6.30pm, the guests (dressed in their finest evening wear of black tie or traditional dress) can mingle with friends old and new before sitting down to a sumptuous three-course meal of high-quality food from the Indian subcontinent. The charity raffle generates revenue for the group’s philanthropic ventures, whilst at the same time offering the possibility for guests to win some of the excellent prizes on offer. Professional photographers will also be at work during the night, ensuring that one’s presence at such a prestigious event does not go unrecorded.

Following the dinner, guests can relax in the opulent surroundings of the Millennium Hotel. An open bar, serving alcoholic and non-alcoholic drinks, is available all night to serve refreshments to thirsty visitors. The celebrations will last until late, hopefully making for an unforgettable 30th anniversary to mark the group’s creation.

The AOG is proud of its 50 years of providing numerous forms of help to both dentists and their patients in the UK and abroad. Members can benefit from a wide range of programmes, including a special deal with the Dental Directory allowing them a 16.5 per cent discount on dental materials, sundries and consumer products. This deal alone makes a strong case for dental health professionals to join the group. The AOG’s charity work and the events they hold for members throughout the year (the grandest of all being the Annual Ball) are also great perks of joining one of the leading dental community organisations in Britain. Details on the event and how to book a place can be found on the group’s website.

To join the AOG, or for further information, visit www.aoguk.org
