Fixed denture further improves lives of denture wearers

Quident has introduced a new alginate molar to their product range. The Palmar MX300 alginate molar features a modern, bulbous design with a lightweight material, making it more restorative. The powerful motor creates pressure, resulting in a maximum of 3000rpm and creates a smooth bubble-free mix in under 15 seconds. The MX300's memory retention (10 & 12 ml) makes it easy to use and ensures a good-quality mastic. The Palmar MX300 comes complete with four mixing cups, spatula and magnetic stirrer. The unit is competitively priced and is available at 07900 920439 or email info@quident.co.uk.

To support the dental profession Quident has produced information leaflets to share with the denture wearers, it offers practical advice on concerns such as eating and speaking, as well as tips on how to remove and care for dentures. This information is available to professionals free of charge from your fixed denture representation. If you don’t know who your representative is, obtain the leaflets please call the helpline on 08702 242 150. Alternatively, you can order them directly from the website www.dentalsky.com.

Part-funding released for UMD professional dental business management course in London and Leeds

UMD Professional has announced that dentists and senior practice managers can benefit from part-funding towards the essential practice management course which starts in London, and, for the first time, Leeds in the early autumn.

To meet Zaki Kanaan at the BDTA please visit the Phillips stand K16, if you can’t make your choice from Marks & Spencer, John Lewis (which includes Waitrose), or via their website www.mcrepairs.co.uk. Fiona Stuart-Wilson, Director of UMD Professional said, “We are very pleased to have secured this funding for what is one of the most comprehensive business management courses available in dentistry, at a time when investment in training is under scrutiny like never before. As financial circumstances, times, round strategic management is crucial for long-term business success, and previous delegates tell us that this course has been of enormous practical help in ensuring that their practices thrive.

GC announces G-serial Composite courses in Belgium

As GC value treating so highly, the company has invested heavily and is delighted to announce a series of courses for the remainder of 2012 that will be taking place at the GC Campus – meeting and education centre based at the European headquarters in Leuven, Belgium.

GC has recently launched an improved composite system with G-serial. This hands on training courses have been designed for dentists to learn how to place the very best composites using a combination of materials. After analyzing the structure of the surrounding teeth, simple steps are used to create the perfect restoration using G-serial.

For more advanced users there is an additional course that adopts a theoretical and practical approach to the most sophisticated direct composite system.

Spaces on these 2-day courses are limited for maximum personalisation. To register your interest please contact GC UK Ltd on 01000 218999. Hurry as places are limited!

Makings of Poligrip win the BDTA Golf Tournament

Craig Mayoh, General Manager at Kediment best over 25 golfers to win the BDTA Golf Tournament 2012 at the Frodsham Golf Club. Craig has competed in this tournament for the last six years but has never been lucky enough to win. His father Graham Mayoh, had won the BDTA golf tournament in 2010 & 2011. Craig completed a Mayoh hat-trick and collected the prize for longest drive!

New generation of 3D CBCT

The UK Rivco is now installed at Parkside Dental Clinic in Wotton-under-Edge. Dr Jonathan Pugh enthused: “The ability to undertake 3D scans in house speeds up the treatment planning process, and avoids the expense and inconvenience of sending patients elsewhere. I believe this investment will more than pay for itself in higher acceptance rates for treatment plans.”

Capturing posterior dentistry accurately an 80mm diameter field of view (FOV), the R100 field includes relevant anatomy equivalent to a 100mm cylindrical scan. The Morita Varisensor 3D R100 won the Innovators Award at this year’s Clinical Innovations Conference in London. A panel of eminent dentists and members of journal editorial boards decided that this breakthrough had “potential implications for enhanced patient safety.” Their verdict was that the R100 was “an amazing development”. Jonathan Pugh found the interactive panoramic and bi-directional scout positioning particularly useful when operating the equipment. Morita R100 standard features - High speed, high quality, line draw image - 3D field of view options (10mm diameter up to R100)
