New Alginate Mover from Quident

Quident have introduced a new alginate mover to their product range. The Palar MX100 alginate mover features a modern, button less design with a lightweight mechanism making it more resistant. The powerful motor is capable of creating a maximum of 300rpm and creates a smooth bubble-free mix in under 15 seconds. The MX100’s memory mode times 10 & 12 m/s is easy to use and ensures a good quality mix. The Palar MX100 comes complete with four mixing cups, spout, and magnetic mixing post. The unit is competively priced and is available at 07000 289 676.00. If you require more information on our Alginate means, please contact Quident on 01993 211737, or visit www.quident.co.uk.

Fisodont further improves lives of denture wearers

In 2013, Fisodont launches Dual Protector, it is often seen as an increased quality of life for denture wearers, making it easier for a patient to take care and maintain their dentures. It is formulated using an exclusive build-up of plaque prevents denture soreness and reduces the incidence of oral malodour, keeping breath fresh for up to eight hours. It provides excellent holding for up to 12 hours.

To support the dental profession Fisodont has produced information leaflets to share with the denture wearers, it offers practical advice on concerns such as eating and speaking, as well as tips on how to remove and care for dentures. This information is available to professionals free of charge from your Fisodont representative. If you don’t know who your representative is to obtain the leaflets please call the helpline on 0870-242 2432. Alternatively, you can order them directly from the website www.dentalcare.com.

PHILIPS

GC Announces G-serial Composite

Courses in Belgium

As GC value that so highly, the company has invested heavily and is delighted to announce a series of courses for the remainder of 2012 that will be taking place at the GC Campus – meeting and education centre based at the European headquarters in Leuven, Belgium.

GC has recently launched an improved composite system with G-serial. The hands-on training courses have been designed for dentists to learn how to place the very best composite using a combination of materials. After analysing the structure of the surrounding teeth, simple steps are used to create the perfect restoration using G-serial.

For more advanced users there is an additional course that adopts a theoretical and practical approach to the most sophisticated direct composite system.

Spaces on these 2-day courses are limited for maximum personalisation. To register your interest please contact GC UK Ltd on 01908 218899. Hurry as places are limited!

Hungry for knowledge? Attend a new course this autumn.

Don’t miss your chance to attend one of the courses this autumn. The following courses are being held in London and the Midlands:

- Monday 29th October 2012, London: Enamel and dentine
- Monday 5th November 2012, London: New concept in dental photography, image analysis and virtual planning
- Monday 12th November 2012, London: New concepts in endodontics

Part-funding released for UMD professional dental business management course in London and Leeds

UMD Professional has announced that dentists and senior practice managers can benefit from part-funding towards one of the most comprehensive business management course which starts in London, and, for the first time, Leeds in the early autumn.

This unique course, which leads to the BIM Level 7 Diploma in Executive Management, offers a blend of practical workshops, webinars and one to one management mentoring, and is designed for dentists and senior practice managers.

The part-funding, which is available for a limited period, contributes £1,200 towards the course fees, and a second delegate from the same practice can attend the course for half price.

Fiona Stuart-Wilson, Director of UMD Professional said, “We are very pleased to have secured this funding for what is one of the most comprehensive business management courses available in dentistry, at a time when investment in training is under scrutiny, from the resourcing point of view. In these uncertain times, sound strategic management is crucial for long-term business success, and previous delegates tell us that this course has been of enormous practical help in ensuring that their practices thrive.

New generation of 3D CBCT

The UK R100 was installed at Parkway Dental Clinic in Whitley, West Midlands. Dr Jonathan Pugh enthused: “The ability to undertake 3D scans in-house speeds up the treatment planning process, and avoids the expense and inconvenience of sending patients elsewhere. I believe this investment will more than pay for itself in higher acceptance rates for treatment plans.”

Capable of posterior sections averaging an 80mm diameter field of view (FOV), the R100’s field includes relevant anatomy equivalent to a 100mm cylindrical scan. The Morita Variceanops 3D R100 won the Innovations Award at this year’s Clinical Innovations Conference in London. A panel of eminent dentists and members of journal editorial boards decided that this breakthrough had “potential implications for enhanced patient safety.” Their verdict was that the R100 was “an amazing development.” Jonathan Pugh found the interactive panoramic and bi-directional scout positioning particularly useful when operating the equipment. Morita R100 standard features – High speed, high quality, low dose image – 45mm field of view 40mm diameter up to R1000 – Easy and accurate automatic scout positioning – Whole range of panoramic imaging modes Built in Japan by Morita Corporation. Core beam CT scanners provide world-renowned image quality. For your free demonstration call 0845 386 3385 or email info@morita-uk.com

Kemdent Hat Trick

Craig Mayoh, General Manager at Kemdent beat over 200 golfers to win the BDTA Golf Tournament 2012 at the Friolds Golf Club Surrey.

Craig has competed in this tournament for the last six years but this was his best victory ever. His father Graham Mayoh, had won the BDTA golf tournament in 2010 & 2011. Craig completed a Mayoh hat-trick and collected the prize for longest drive!

Well done to everyone who took part!
