Drill-free dentistry introduced in Colchester
National firm Dentist Direct has launched its first new style practice which aims to stamp out fear of drilling and infections among dental patients.

Dentist Direct’s first practice has now officially opened in Colchester, with Principal Dr Neel Sanghavi, allowing patients to be treated with revolutionary technology which can be used instead of drills and needles for almost any dental procedure and which – in most cases – is completely painless.

Principal dentist Dr Neel Sanghavi said: “It’s a brilliant concept for dentists like myself who want to grow their clinical skills and concentrate on caring after their patients rather than spending time worrying about the business and compliance side of things.”

For more information please call Robin Shipton or Emily Parker at Harris & Hugs on 01325 486666 or email ray@harrisandhugs.co.uk / emily@harrisandhugs.co.uk

Castellini Dental Units – Quality, Ergonomics and Standard
Castellini understands that the key to the success of any dental unit design is the fundamental design to the anatomy of the dental unit, and the patient’s workflow.

For this reason all of Castellini’s unit designs are created with ergonomics at their heart in order to give practices freedom to work, with patients working area, unscarred by the restrictions their dental unit may impose upon them.

Conceived not just with the patient in mind, all models in the Castellini range are designed to maximise the space within your practice, and be obtainable by all Dental Practices nationwide.

Wow, it’s here!Quicklase have launched their new Recession-Free Laser & Whitening products from Quicklase

CS Back Office System: It’s The Business
CS Back Office software from Carestream Dental is a must-have suite of business tools for intelligent practice management to maximise your income and potential. Delivering all business related information to your fingertips, CS Back Office puts you in the driving seat.

The software comprises all the key elements needed to run your dental practice, including, but not limited to:
• Practice management – clinical and key business and administrative support that practices are likely to need, including – Accounting for payroll, creditors, vendors, bank accounts, and bank transactions and payments.
• Reporting – constantly updated to keep track of your business performance.
• Dental software needs – perfectly geared to the dental industry’s leading cloud-based compliance system.

For more information call 020 7400 8989 or email info@smile-on.com

Sensor supports the examination and treatment of diffuse and location specific problems. It has a significantly improved image evaluation and is less radiation dose sensitive. As a result of this the sensor is designed to be used as part of a complete system.

Whether you are completely repositioning the appearance of your practice, or simply updating and improving it, Veolia can provide furniture and fixtures of the highest quality.

Veolia is a major international facility services group, with a proven track record of delivering high quality projects in a cost effective manner.

UCU Eastman Training in Restorative Dental Practice

“Remarkably changed my ability”

Dr Alistair Bunting is an associate dentist at Balmoral Lodge in Dorset. He completed his MSc in Restorative Dental Practice at the UCU Eastman Dental Institute in December 2011.

“I decided to undertake the Restorative Dental Practice programme at the Eastman to improve my clinical practice, theory and learn the latest techniques,” says Dr Bunting. The support he received at the Eastman gave us everything we needed. I now look forward to giving a good broad base of knowledge, both practical and theoretical. The second and third years were measurably more in-depth. The final year required a dissertation, which fundamentally changed my ability to critically appraise published material. As a result, my patients receive a better service. The quality of my work is of a much higher standard and I have greater confidence in providing predictable, comprehensive treatment plans.”

For further information, please contact Victoria Banks, Programme Administrator, on 020 7585 5215, email vbanks@ucu.org.uk or visit www.ucu.org.uk/rest/estam.

Waterpik

Waterpik Water Flosser ‘easier and quicker than flossing’

Cristina De Rosen, manager of a busy Dental Practice in Central London, has had a very positive experience using the Waterpik Cordless Plus Water Flosser.

“I have found it quite easy to floss next to my incisors in the way I can’t do with normal floss”. She says, “but the Waterpik Cordless Plus helps to reach difficult areas and clean around implants, which helps when you want to keep your teeth tight together and there seems to be no space left for normal flossing.”

Mr De Rosen has also found that the Cordless Plus saves her a lot of time and effort compared to manual flossing. “It’s very well.”

After normal flossing you always have to rinse to remove the plaque and debris dislodged but with the Waterpik® Cordless Plus you do both in one go.

All in all, I have found it easier and quicker than flossing.”

For more information on Waterpik® Water Flossers please speak to your wholesaler or visit www.waterpik.co.uk. Waterpik® products are widely available in Boots stores across the UK.

NobelActiveTM from Nobel Biocare: “Versatility in all types of bone”

Dr Alistair S Irvine BDS, FDS, RCS (Eng) is an Associate Dentist at Pendragon Heath, a highly respected dental and medical practice in Central London.

“After placing implants for 12 years, I have recently placed the NobelActiveTM implants,” says Dr Irvine. “It is a unique implant that performs very well in different bone types and offers a vast range of solutions for a variety of applications, making it the implant of choice.”

EndoCare – committed to Endodontics, dedicated to care

At EndoCare we particularly excel in treating dental pain in all its forms. Our team of Specialist Endodontists are all experts in their field and we are fully committed to providing outstanding levels of care and very positive outcomes.

At EndoCare we particularly excel in treating anxious or nervous patients, and will seek to understand your patients every step of the way.

We have a team of experts in the field of root canal treatment and dental pain, as we are more than happy to take referrals for challenging issues such as hot pulp, re-treatment, and remedial surgery. In all cases, referring practices can be assured our primary considerations are always for patient’s well-being, and whenever possible, the preservation of the original tooth.

To learn more about how we can become an important extra member of your dental team, contact EndoCare today!

For further information please call EndoCare on 0203 722 0099 or visit www.endocare.co.uk

Powerfloss inventor Dr Roy Sennett, who jointly developed the product with engineer Bernard Sinclair, “It gets into areas where normal floss and dental pick can’t!” The Powerfloss directs water at high pressure in single spouts, giving excellent control to users who find it easy to clean under bridges, braces and other devices they could not reach with conventional flossing.

Powered by a pump that is primed manually, the Powerfloss requires no battery or other power source. It consists of a removable reservoir component and a nozzle that can be stored inside the reservoir to make it easier to carry or pack.

The Powerfloss is available now with a recommended retail price of £14.99.

NobelActiveTM is a highly effective dentifrice for caries prevention

“It is an implant that I can see myself growing with.”

Powerfloss

Spry Toothpaste with xylitol – for excellent caries prevention

Help keep dental caries at bay with Spry Toothpaste – a highly effective dentifrice rich in all-natural xylitol.

xylitol is a naturally occurring sweetness that is proven to be a powerful tool in the fight against tooth decay. Thanks to its unique chemical composition, xylitol is unfavourable to the metabolism of plaque bacteria, reducing their ability to proliferate and cause tooth decay.
