**BISCO** extends its product range by a high-viscous flow composite -

**MICRO ESTHETIC** flow-viscous

Products are being increasingly criticised for their toxic substances by specialist circles. One of the issues that made headlines in the trade press because of its carcinogenic effects.

**BISICO** experience.

The introduction of a Rosable IVS-BGA-free composite.

During development of this product, a number of important criteria had to be met:

- **Free of IVS-BGA** to increase the biocompatibility and to minimize health risks
- **High viscosity**
- **Extended indication, suitable for fillings of classes I V**
- **Excellent flow properties**
- **High radiopacity to ensure that it can be better identified on X-rays**
- **MICRO ESTHETIC** flow-viscous is slightly light curing, ensuring the highest possible strength possible.

**MICRO ESTHETIC** flow-viscous is available in a 2 syringe in the three most popular shades A1, A2 and A3. **MICRO ESTHETIC** flow-viscous can be used with any standard bonding system.

Excellent physical properties such as low polymerisation shrinkage, extremely high flexural strength are a matter of course. In short – it is a flowable composite for nearly all cases.

Visit us on stand U12 – **BDTA** Birmingham and benefit from our special offer: order two and get one free of charge.

**Interested in ergonomics? Hear Harri Skovgard thoughts on Stand F10**

Visiters to DB Dental’s Stand F10 will have the opportunity to hear Harri Skovgard present his thoughts on ergonomics in the care of Heka Dental. Harri is a world renowned expert in ergonomics, working methods and organisation within Dental Practices. This is an opportunity not to be missed. Presentations will run throughout the day on Stand F10.

There will also be an opportunity to see some of Heka Dental’s bespoke Treatment Centres, which combine aesthetic beauty with state-of-the-art ergonomics and efficiency. The centre is the ideal solution for those looking to install a centre which encapsulates all of the above. The centre is the ultimate embodiment of feedback from patients, dentists and service engineers, its meeting appearance and carefully thought through functionality creating the perfect environment for a pleasant dental visit.

**UNC** is the epitome of ergonomic design. Everything – instruments, tray, light, s, – is carefully thought through. Heka Dental call it intuitive design and functionality – everything is exactly where you would expect it to be, making even complex clinical procedures easier, more efficient and comfortable for the patient and dental team.

For further information on the complete range of Heka Dental equipment visit Stand F10, contact DB Dental on 01484 401015 or visit www.heka-dental.com.

**Philips Discus Dental is offering Zoom Professional Whitening Treatments at the BDTA!**

Philips Discus Dental is running a contest at the BDTA which will award free Zoom teeth whitening treatments to six dental professionals. The Zoom whitening sessions will be performed twice daily at stands D07 & D08 between 20 – 22 October where trade show delegates will be invited to witness, try and in person, the dramatic whitening results.

To enter, potential candidates will be asked to upload a copy of their smile and email it to the company where a Philips Discus Dental expert will review their teeth and dental history to determine if they are suitable for a Zoom treatment. Those judged to be the most in need of whitening will have the opportunity to walk away from the exhibition with a brighter, whiter smile on their face. The best six candidates will be selected and notified by email. Contestants simply need to email a picture of themselves, showing their smile before and after whitening. The email address of the closing date for the competition is 1 October 2011 at 5:00pm - winners will be notified by email.

For more information please contact Philips Discus Dental on www.discusdental.com/uk

**DMG**

Visit Stand 8006 and see the NEW**

**Ceramco® Vita Veneer**

**DMG** invites you to visit its stand 8006 where you will be able to see and select from the widest range of Ceramco® Vita Veneer. Start Himang Porcelain’s most dramatic innovation is its ability to attain true in two contrasting parameters – translucency and opaqueness. Each and every 5 mm wafer contains a patented ingredient which ensures that Porcelain is reliable when used as a veneer. Either on these wafers, so there is no need to worry about incorrect shading. At high shear stress the viscosity characteristics come into effect and it flows virtually into every small spaces, so that precise detail reproduction is achieved. This unification of apparently contradictory characteristics – extreme stability and fluidity – is unparalleled.

Furthermore, Snap-On Technology ensures a previously unmatched combination of convenient working time and short setting time. This means less stress for the Dentist and greater comfort for the patient. Finally, it features enhanced hydrophobicity and toughness.

Whilst with NEW LooDent® Star DRMG the best just gets better!

For further information visit Stand M06, contact your local dental dealer or DMG Dental Products (UK) Ltd on 01932 363000, email info@dmg-dental.co.uk or visit www.dmgs.dk
Please visit CODE's team of representatives will be on hand at the BDTA Dental Showcase to advise them on how the CODE Buying Group can help them raise the standard of their work to new heights at the 2011 BDTA Dental Showcase at Birmingham NEC on 20th-22nd October.

CODE offers Care Quality Commission advice and practice management guidance to members the CODE Buying Group is the latest addition to an association dedicated to helping dental professionals meet the requirements of the Care Quality Commission.

CODE's team of representatives will be on hand at the BDTA Dental Showcase to advise them on how the CODE Buying Group can help them raise the standard of their work to new heights at the 2011 BDTA Dental Showcase at Birmingham NEC on 20th-22nd October.

Dürr Dental will also be exhibiting their leading compressors, suction systems for air and water, and intra-oral cameras. Their latest addition to their range of imaging systems is VistaProof a fluorescence camera capable of detecting caries quickly and accurately. Caries is shown even in fissures and on occlusal surfaces where to the naked eye or x-ray photomicrograph it may be hard or impossible to detect. The high-performance software and user-friendly interface of the VistaProof makes it ideal for use in clinical practice.

Dürr Dental’s huge international presence is evident once again with the introduction of their latest products such as the new Acquita Max, a Quattro Fluid Abraction patient treatment unit, the upgraded Mark 6 x-ray processors and the Velopex Aquacut Quattro Digital system, along with an extended range of the equipment for Aseptico portable dental surgeries.

Velopex/Owandy’s digital panoramic x-ray unit, the new Owandy I-Max Touch digital panoramic x-ray unit, the Velopex/Owandy Digital system, along with an extended range of the equipment for Aseptico portable dental surgeries.

As well as showcasing Biodentine, Septodont will showcase the highly innovative Septoject Evolution, designed to provide greater control for practitioners and less discomfort for patients.

Septodont brings magic to BDTRA Dental Showcase 2011 Septodont will be exhibiting at BDTRA Dental Showcase at stand D09 following a highly successful launch of Biodentine, Septodont is inviting dentists to visit its stand to find out how this fast and low-cost biocompatible and bioactive material can be used wherever dentine is damaged.

As well as showcasing Bodiente, Septodont will showcase the highly innovative Septoject Evolution needle, designed to provide greater control for practitioners and less discomfort for patients.

Septodont Evolution is engineered for smoother penetration with less displacement, meaning less discomfort for patients even when used for multiple injections. Septodent are now providing suitable level for easier insertion and reduced deflection, around 29 per cent less force is required while control and accuracy are improved.

Other Septodont products on display at BDTRA Dental Showcase 2011 will include Rapide® a gel specifically designed to make gapfill preparation procedures easier and more comfortable for patients, and Ultra Safety Plus – a syringe, syringe system equipped with a needle-stick injury prevention device.

While continuing to lead the way in the manufacture and supply of 100 per cent latex-free anesthetics, Septodont, through new product innovations, has also proved to the market that it is committed to pioneering research and development in all aspects of dentistry.
