BISICO extends its product range by a high-viscous flow composite - MICRO ESTHETIC flow-viscous
Products are being increasingly criticised for their toxic substances by specialist circles. One of them is Bisphenol A that made headlines in the trade press because of its carcinogenic effects.

BISICO responds...

The introduction of a floaible BIS-GMA-free composite. During development of this product, a number of important criteria had to be met:

- Free of BIS-GMA to increase the biocompatibility and to minimize health risks
- High viscosity
- Extended indication, suitable for fillings of classes I V
- Excellent flow properties
- High radiopacity to ensure that it can be better identified on X-ray images
- MICRO ESTHETIC flow-viscous is solely light curing, ensuring the highest flexibility possible.
- MICRO ESTHETIC flow-viscous is available in 2 a syringe in the three most popular shades A2, A3.5 and A3.
- MICRO ESTHETIC flow-viscous can be used with any standard binding systems.

Excellent physical properties such as low polymerisation shrinkage, extremely high physical and chemical strength are a matter of course. In short – it is a floaible composite for nearly all cases.

Save This Date – January 13th 2012
rBDM® is delighted to announce the 1st BDTIOM European Symposium to be held on January 13th and 14th 2012 in the wonderful city of Madrid.

The 1st BDTIOM European Symposium is to be held in conjunction with the 11th Iberic Symposium, 2nd Northern Area Symposium, 2nd Central Area Symposium and the 1st BIOMET 3i European Symposium will be held on January 13th and 14th 2012 in the wonderful city of Madrid.

And finally… there are going to be some pretty special, ‘for the show only’, items they offer DURR Suction and Dental auxiliary items including SiroLaser and the DAC digital imaging unit available on the market. They will also be able to compare their new Flex3D which is the most cost effective, adaptable and feature-rich digital imaging unit available on the market. They will be also able to compare intraoral digital x-rays and image plate scanners from Dent, Digna, Sirona and Shofu, however they appreciate that every practice is different and has individual requirements. That every practice is different and has individual requirements.

For further information call 0800 169 9692 or visit www.corentin.co.uk
Tel: 0844 247 3527 0044 1902 Email: website, quote ‘1 hour’ at the checkout and receive £200.00 off your starter cement and finishing burs. Individual refill kits are also available.

Each kit contains 80 veneers in a range of sizes from small to extra-large and size guides along with materials for placement including etch, bonding, placement can usually be completed in just one appointment in about one hour. Unlike composite bonding there is no need for ‘free hand’ and no lab work is required.

GC UK launches two new products – GC will be demonstrating the NDE additions to their prestigious range with a new product, gallipoli LT. Gallipoli LT is the first glass ionomer provisional luting cement that provides versatility, reliability, durability and ease of use. GC Gallipoli LT offers the benefits of glass ionomer technology, with significantly greater fluoride release and unsurpassed protection.

GC will be showing you the benefits of EXA/Sercise®. EXA/sercise® represents the next generation impression material - Vinyl PolyEther Silicone - predictable in an unpredictable environment. Thanks to the Extrude-Flow® technology - Dental allows you to create beautifully invisible restorations with one shade. These inside shades are available for more complex restorations, allowing you to create an invisible true to life restoration. Incorporating the best of industrial monomer innovation from DuPont®, EXA/sercise® features an exclusive low shrink technology. On a microscopic level, the unique microstructure of the adhesive, adhesion between the filler and the resin matrix is maintained. With minimal shrinkage stress, the intensity of the restoration especially at the margins is ensured. On the laboratory side of the business, GC will be showing brand new (b)laying over Zirconia and Light Reflective Liners – the latest addition to the original K3 range.

For further information please contact GC UK on 01908 218 999

When things go wrong - Dr Cro בדיom Dr Cro will be hosting a stimulating and insightful event at the Royal College of Surgeons and Physicians of Glasgow on Saturday 5th November 2011. Dr Robert London will be presenting at this one day event.

This event will discuss problems in the planning, execution and resolution of imaging surgery. Dr London will review the appropriate use of imaging, treatment planning principles, the necessary detailed knowledge of surgical anatomy and management of temporary prostheses to prevent surgical problems.

Situations to be discussed will include Sinus Grafting complications; problems arising from incorrect implant placement; managing patient problems with membranes and managing Peri-implants.

Participation will include open discussion and questions. A survey in advance of the course will have these reviewed and guidance given as part of the round table discussion. There will also be an opportunity to join Dr London for an evening networking event. The event will be held in the Grand Foyer of the Royal College of Surgeons and Physicians of Glasgow on Saturday 5th November 2011. The event will be held in the Grand Foyer of the Royal College of Surgeons and Physicians of Glasgow.

For further information please contact Dr Cro on 0121 248 1562 or email drcro@dentalsky.com

Dental Trade Association's Dental Showcase at Birmingham’s NEC Centre.

As well as all of this you will also have the chance to enter a competition to win £2000.00 off your holiday of a lifetime. Don’t miss out.
