**Sealing Is Believing**

The new LED operating light from Takara Belmont provides excellent light output over their projected lifetime, which is a staggering 40,000 hours or around 25 years for the average user. The ten shadow-less beams emit excellent light colour immediately making it ideal for colour matching work as well as reducing eye-fatigue. As individual requirements and preferences vary the light can also be adjusted between 4000K and 5200K LUX.

Environmental considerations concern all, and the LED emulates less heat and consumes less power, offering an estimated 80% power saving over a traditional halogen bulb. Cross infection matters have also been covered; the unit has a touchless sensor to turn the light on/off as well as allowing the user to switch to a comprehensive mode setting so that you can work uninterrupted when you have patients up in the treatment chair.

As the 10 LED lights are encased in a one-piece cover there's no risk of dust or mist build-up and the unit is easily cleaned. The Belmont 500 Series is available in either an upright, ceiling or track mounted option. Having developed operating lights for over 40 years the company is confident in the quality of their equipment and therefore all units carry a 5 year warranty. For more information call 020 7515 0333.

**Prestige Medical announces even smaller cycle and a 96-hour hand piece cycle!**

The popular Optima autoclave is currently available using a 5-hour cycle; however, for those times where it is appropriate to load autoclave cycles in shorter time frames, Prestige Medical has now added a new hand-piece cycle which will sterilize 12 hand pieces in just 13 minutes.

Study shows that the sterilization of hand pieces creates a bottleneck in the practice. Buying additional instruments is expensive and dentists are looking for ways of increasing throughput of their office, while still using one machine as well as the practice will still need a vacuum autoclave in order to sterilize instrument pouches.

Prestige Medical believes they have solved this problem with the launch of the new hand piece cycle on Optima, a 96-hour cycle autoclave that is also able to sterilize a full 4kg vacuum load in just 23 minutes. Optima is a major jump forward in performance compared with other autoclaves because of the introduction of Flash Steam™ technology. Flash Steam™ is a more economical operating cycle compared to traditional heat sterilization cycles which can run over 400-600 hours, and at the same time this cycle is more safe and reliable. **For more information** please call 01480 862868, email info@prestigemedical.co.uk or visit www.prestigemedical.co.uk.

**Hydrim:**

Now’s a great time to get your patients on board with their Oral Hygiene regime. The latest innovations available from Prestige Medical direct by calling 01254 844 103 or email to sales@prestigemedical.co.uk.
Get it right and feel the difference! There was only one decision when Swen Sorensson and Mads Nyborg from The Clinic dental referral implant and cosmetic practice, together with their team, dropped their practice - UNICare or UNIClinic, but ever had it built to Heka Dental

Heka Dental’s bespoke Treatment Centres are available in two options, UNICare and UNIClinic. The UNIC option combines aesthetic beauty with state-of-the-art ergonomic efficiency. Available in a wide range of inspirational colours, it is the ultimate embodiment of feedback from patients, dentists and service engineers, its innovative appearance and layout is achieved through functionality creating the perfect environment for a dental practice.

Heka Dental call it “intuitive design and functionality” because everything is easily where you would expect it to be, making even complex clinical procedures easy, more efficient and comfortable for the patient and dental team.

With their unique bespoke design capability, Heka Dental Treatment Centres can be built to individual specifications with a full 3-year warranty 365 day service.

For further information on the complete range of Heka Dental equipment contact DB Dental on 01484 461015 or visit www.heka-dental.com

Spry Toothgel with xylitol – the perfect way to keep childhood caries at bay

We all know it’s important parents introduce their children to good oral hygiene habits from an early age. To help give children the best start possible, recommend Spry Toothgel with xylitol for the perfect way to keep dental caries at bay.

Xylitol is a naturally occurring sweetener that is proven to be a powerful tool in the fight against tooth decay. Thanks to its unique chemical composition, xylitol is unfavourable to the metabolism of plaque bacteria, reducing their ability to proliferate and adhere. This makes xylitol an excellent tool in the fight against dental caries.

Available in a handy family tube, Spry Toothgel is a great way to introduce children to oral hygiene and comes in a range of children friendly flavours. Make teeth cleaning even more fun.

For more information contact Anyone 4 tea Ltd on 01428 652131, Or visit www.anyonetea.com

End of an era near for historic dental practices

Growing legislative pressure will soon see an end to period houses being used as dental practices. Predicts Roger Gullidge of Roger Gullidge Design.

The demands of legislation including HTM 01-05 and the Disability Discrimination Act are incompatible with the challenges of seeking Listed Building Consent, Conservation Area Consent and Planning Permission, he says.

‘If you apply for Listed Building Consent to divide up rooms in a classic Georgian or Victorian Terrace to fit in a Local Decontamination Unit, you are not likely to succeed,’ says Roger. The whole process becomes unviable and therefore the material is not present.

Anybody holding an obligation to repair or maintain a non-domestic property, starting to work with implants is the fear of the unknown. They don’t know what they don’t know. Therefore, a lot of hand holding is required and that’s just one of the ways in which the Nobel Biocare team offer their support. Dentists have the expertise of a company that implicitly understands the product and offers clinical guidance as a matter of course.

For more information on Nobel Biocare please call 0208 756 3300, or visit www.nobelbiocare.com

Striped and contra-angle handpieces portfolio is now complete – Sirona launches the economy-class T3.

Compact and robust: The high-quality T3 handpieces create a cost-effective world-class.

Continuing success story: The new T3 models are the perfect complement to the Sirona product portfolio.

‘With the T3 we have extended our handpiece portfolio in terms of breadth and depth,’ explains Frank Pacch, Product Manager at Sirona. ‘Regardless of the concept a dentist opts for in his or her practice, we are now positioned to supply the right handpieces. Following the introduction of the T3 alongside the existing T1 and T2 models our portfolio of straight and contra-angle handpieces is now complete.’

Sirona’s outstanding technical know-how manifests itself in the economy-class T3 handpieces.

The T3 Economy instruments from Sirona are of the highest quality and pay for themselves in time and time again. With the ISO interface, this robust range of instruments is compatible with all current micromotors and is therefore absolutely universal.

Nobel Biocare: “take your business forward”

Nobel Biocare is big enough to handle the expectations of the most demanding of customers at different levels,” says Dr. Bhat. “They have a wide spectrum of products that allows them to look after clinicians who have done thousands of implants to people who don’t know what they don’t know. Therefore, a lot of hand holding is required and that’s just one of the ways in which the Nobel Biocare team offer their support. Dentists have the expertise of a company that implicitly understands the product and offers clinical guidance as a matter of course.
