**Seeing’s Believing**

The New LED operating light from Takara Belmont provides excellent light output over their projected lifetime, which is 8-10 years, 40,000 hours or around 25 years for the average user. The ten shadow-less beams emit excellent light quality immediately making it ideal for colour-critical work as well as reducing eye-fatigue. As individual requirements and preferences vary the light can also be adjusted between 4000K and 5500K.

Environmental considerations come on all, and the 90W emulates less heat and consumes less power, offering an estimated 80% power saving over a traditional halogen bulb. Cross infection matters have also been covered; the unit has a touchless sensor to turn the light on/off as well as allowing the user to switch to a composite mode setting so that you can work untethered with your hands (no more autoclave-up-country). As the 30 LED lights are exposed in a one-piece cover there is no risk of dust or mist build-up and the unit is easily cleaned.

The Belmont 900 Series is available in an either an unit, ceiling or track mounted option. Having developed operating lights for over 40 years the company is confident in the quality of their equipment and therefore all units carry a 5 year warranty. For more information call 020 7515 0333.

**It Doesn’t Have To Be a Nigh-Handed World**

Patients don’t need any assistance navigating their way into the vain Compass Treatment Centre from Takara Belmont; with a delivery unit that can rotate behind the chair, it provides an easy and unobtrusive welcome.

The unique centrally mounted positioning mechanism allows the Compass to convert easily from right to left handed use in less than 10 seconds, without the need for any tools! An ambidextrous unit is great for practices where a non-sensitive surfaces and equipment is necessary.

Flexible options are also available on the Compass, it can be supplied as either K or E static configuration and can be ordered with or without the optional autoclave. Features include a removable spool nose with 180° rotation and independent arm-mounted pack.

The Compass also benefits from Takara Belmont’s five year extended warranty, offering additional peace of mind when purchasing capital equipment.

To find out more about the Compass Treatment Centre from Takara Belmont please call, without obligation, 020 7515 0333.

**Pouch Sealing machine that seals pouches on a roll.**

Sealing an empty pouch, the Zhermack® Zeta Roll® provides a market-leading 42,000 sonic waves per minute for a brilliant and easy clean.

• Hydrosonic Electric Toothbrush: provides a market-leading 42,000 sonic waves per minute for a brilliant and easy clean.

• Optima is a major jump forward in performance compared with other leading autoclaves on the market. Prestige Medical has now added a new hand-piece style which comes with 2 Jude-AIDS®. The Chlorhexidine range of products, with a unique non-staining formula, includes alcohol-free mouthwash and SLS-free toothpaste.

For more information please call 01480 862084 or email sales@prestigemedical.co.uk.

**Handling autoclaves is a major jump forward in performance compared with other leading autoclaves on the market. Prestige Medical has now added a new hand-piece style which comes with 2 Jude-AIDS®.**

**Cure Plus Clean-Up at the BSDH Conference 2012**

For more information please contact your local representative or dental dealer. The BSDH annual Conference each year’s poster competition and takes place in the exhibition hall floor was CTS, where some of the more innovative teeth whitening products were demonstrated.

A brand new feature for this year’s BSDH Conference 2012 is the Intensive Whitening Strips. The Intensive Whitening Strips have a patented slow-release formulation, which is specifically designed to react sensitively while also delivering the exact amount of mand flavoured whitening gel to evenly and effectively whiten the entire tooth surface.

**© BSDHT**

WhiteWash Laboratories demonstrates some of its whitening products at the BSDH Conference 2012.

This year’s BSDH conference was another great success. Amongst the most popular stands on the exhibition hall floor was CTS, where the innovators at WhiteWash Laboratories gave talk on their range of innovative teeth whitening products. WhiteWash Laboratories Professional Whitening Strips use a patented slow-release formula which is specifically designed to react sensitively while also delivering the exact amount of mand flavoured whitening gel to evenly and effectively whiten the entire tooth surface. Not only are they comfortable to wear, but they are also completely safe as per new European legislation, and can be taken away by patients on the very same day. As well as Professional Whitening Strips, the WhiteWash laboratories team also demonstrated their Nano-Silver Whitening Toothbrush and Professional Whitening Toothpaste with Silver Technology - both of which make perfect partner products to enhance your practice’s income streams.

Sponsored by WaterPik International, Inc, the poster competition provides a platform to showcase the latest scientific studies by dental professionals.

WaterPik International, Inc. is dedicated to performing clinical research that offers dental professionals the opportunity to make informed treatment choices and recommendations.

Delegates at the BSDH Oral Health Conference were able to visit the WaterPik International, Inc. stand and find out more about clinically proven products such as the WaterPik® Water Flosser, the Sensonic® Professional Plus sonic toothbrush and WaterFloss® Complete Care.

For more information please phone to your wholesale or visit www.waterpik.co.uk. WaterPik® products are widely available in Boots stores and selected LloydsPharmacies.

**Prestige Medical announces even more hygiene in Optima with a super-fast hand-piece cycle.**

The popular Optima autoclave is currently capable of processing up to five times as many instruments as other leading autoclaves on the market. Prestige Medical has now added a new hand-piece cycle which can sterilize 12 hand pieces in just 15 minutes.

Study shows that the outsourcing of hand pieces creates a bottleneck in the practice. Buying additional instruments is expensive and dentists are looking for a solution of increasing throughput while keeping the same or lower number of hand pieces. The New LED operating light from Takara Belmont provides excellent light output over their projected lifetime, which is 8-10 years, 40,000 hours or around 25 years for the average user. The ten shadow-less beams emit excellent light quality immediately making it ideal for colour-critical work as well as reducing eye-fatigue. As individual requirements and preferences vary the light can also be adjusted between 4000K and 5500K.

The CSP offers a major jump forward in performance compared with other leading autoclaves on the market. Prestige Medical has now added a new hand-piece style which comes with 2 Jude-AIDS®. The Chlorhexidine range of products, with a unique non-staining formula, includes alcohol-free mouthwash and SLS-free toothpaste.

For more information please call 01480 862084 or email sales@prestigemedical.co.uk.

The London Smile Clinic: Orthodontists Experts

End of an era draws near for historic dental practices

Growing legislative pressure will soon see one an end to period houses being used as dental practices, predicts Roger Gullidge of Roger Gullidge Design.

The demands of legislation including HTM 01-05 and the Disability Discrimination Act are incompatible with the challenges of seeking Listed Building Consent, Conservation Area Consent and Planning Permission, he says.

‘If you apply for Listed Building Consent to divide up rooms in a classic Georgian or Victorian Terrace to fit in a Local Demolitation Unit, you are not likely to succeed’ says Roger. The whole process becomes unviable and you will essentially be compelled to move. The ability to extend and modify newer buildings, and the reduced complexity involved in connecting them to modern communications networks, makes them far more practical locations for dental practices. The wider availability of parking spaces and improved disabled access can also make them more appealing to patients.

Roger Gullidge Design is a specialist design and project management consultancy specializing in the dental sector. Call 01278 744442 for more details or visit www.rogergullidge-design.com

The London Smiley Smile: Orthodontics Experts

Ensure your patients receive award-winning treatment by referring them to the London Smile Clinic. The practice’s Orthodontists Team is led by Dr Pran Bhat, who is listed in the GDC’s Specialist Register and has followed the highest possible standard of training in orthodontics in the UK.

The London Smile Clinic offers bespoke one-to-one smile design and uses the highest rated, tried and tested technology, materials and techniques available anywhere in the world today.

Orthodontics options include the Inman Aligner, Invisalign, and Incognito. ‘The need for cosmetic solutions is clearly seen by beauty and predictable results with minimal impact on the patient’s lifestyle. A highly skilled team of cosmetic dentists, all of whom have considerable experience in the field, offer a first class service to every patient. With an ethos of minimal invasive dentistry that achieves outstanding results, the London Smile Clinic offers peace of mind to dentists and the greatest care and attention for your patient.

For more information, please contact 020 7235 2509 or visit www.londonsmile.co.uk/smile - you will be glad you did!

The Helsinki Dental: Helsinki Dental

Get it right and feel the difference!

There was only one decision when Sean Sommerson and Mads Nyborg from The Clinic Dental referral implant and cosmetic practice, Haywards Heath, decided to implement their practice’s Orthodontics URCine or URCine X. ‘But we’re looking forward to it being an exciting addition to our practice’ says Dr Sommerson.

Heka Dental’s bespoke Treatment Centres are available in two options, URCine and URCine X.

The URCine option combines aesthetic beauty with state-of-the-art ergonomic efficiency. Available in a small form, the Imperial column, it is the ultimate embodiment of feedback from patients, dentists and service engineers, its existing apparatus – the URCine – has now been further developed through functionality creating the perfect environment for a patient-friendly dental visit.

Heka Dental call it ‘innovative design and functionality’ because everything is exactly where you would expect it to be, making even complex clinical procedures easy, more efficient and comfortable for the patient and dental team.

With their bespoke unique design capability, Helsinki Dental Treatment Centres can be built to individual specifications with a fully comprehensive 3-year warranty.

For further information on the complete range of Helsinki Dental equipment contact URB Dental on 01484 460155 or visit www.hkedental.com

The Needle free cosmetic treatment that improves patients smile and your “bottom-line” too!

OXYjet’s NEW OXYjet LED Luxe is the state of the art cosmetic therapy which will delight your patients and Accountant. It is the entirely painless, safe, needle-free alternative to Botox and similarly invasive cosmetic treatment options.

Spry Toothgel with xylitol – the perfect way to keep childhood cavities at bay

We all know it’s important parents introduce their children to good oral hygiene and come in a number of child-friendly flavours to help give children the best start possible, recommend Spry Toothgel with Xylitol for the perfect way to keep dental cavities at bay.

Spry Toothgel with Xylitol for the perfect way to keep dental cavities at bay.

Waterpik® Complete Care – more effective brushing and flossing in one device!

Waterpik® Complete Care combines two exceptional products into one single device, for the ultimate brushing and flossing solution.

The first part of Waterpik® Complete Care comprises the brand new Sensonic® Professional Plus toothbrush, incorporating high performance technology for more effective cleaning. Featuring a 360-degree toothbrush head and a 2-minute timer to ensure thorough cleaning is achieved, the Sensonic® Professional Plus can be recharged conveniently in the Complete Care stand and is the perfect tool for a comprehensive oral hygiene regime.

Also featured in the new Waterpik® Complete Care package is the innovative Waterpik® Water Flosser. Utilising a unique combination of water pressure and pulsation, the Waterpik® Water Flosser cleans the deep between teeth and below the gumline, removing harmful bacteria that traditional flossing can’t reach. Indeed the product is so effective, the Waterpik® Water Flosser has been scientifically proven to remove 99.9% of plaque biofilm after only a 3-second treatment. For complete convenience in a streamlined, single unit, Waterpik® Complete Care offers easy and more effective brushing and flossing, all in one device.

For more information please speak to your wholesaler or visit www.waterpik.co.uk Waterpik® products are widely available in Boots stores, Argos and selected Chemists.

New Apex Locator from Qudent

Qudent have introduced a new apex locator to their range. The new Qudent Apex Locator offers a highly precise measuring device for accurately locating the working length of the root canal.

The Apex Locator features a clear colour LCD display with a 3-dimensional display and audible signals. The measurement is not affected by the environment i.e. wet or dry canals, which is a real bonus to the user.

The unit comes complete with two tip hooks, four mauer holders and is competitively priced at £2800 + VAT

For more information please visit www.qudent.co.uk or contact Qudent on 0191 211737, or email Sales@qudent.co.uk
