Help your patients – ask about their medication

Were you aware that your patients’ medication could be impacting on their oral health? Research shows that taking three or more drugs means there is a 50 per cent chance of suffering from dry mouth.

Dental Hygienist Rhianon Jones tackled the subject of ‘Dry mouth and its impact’ in a lecture sponsored by GliclazeSmith & Nephew Consumer Healthcare at the recent British Society of Dental Hygiene & Therapy (BSDHT) Conference and Exhibition in Liverpool.

The Biotène range of products has been specifically developed for patients with dry mouth and can be recommended for daily use. Biotène Oralbalance Saliva Replacement Gel offers long lasting drying mouth relief, soothes and provides lubrication and moisture for dry mouth sufferers.

For further information about GSK products and to request samples visit www.gsk-dentalprofessionals.co.uk

Satisfaction Guaranteed

Wearing high quality loupes and lights is one of the best ways to gain a greater degree of precision and provide patients with a superior level of treatment. Immediately procedures will become easier and less stressful to perform.

Evident, the leading supplier of loupes and lighting in the UK, supply high quality Exaform® loupes and lights, backed by their highly trained and experienced team, including qualified optometrists. The OKE® mask provides the prestigious ‘red dot’ design Award, Exaform® loupes come in a range of styles and magnifications. The Exaform® design is a combination of snow-white and comfortable and stylish, with short well-balanced oculars even in higher magnifications.

A loupes-mounted light is the perfect partner and can make a huge difference in achieving the best possible view of the mouth. Perfectly positioned between the eyes, such a system provides light in exactly the correct position and direction, allowing the dentist to focus without the need to constantly correct your position, change the angle of your mirror, or move your operating loupes.

This offer is running until the end of February 2013.

For further information on Grahame Gardner, their products and services take a look at the website or call 0121 256 6366.

100 Capsules for the price of 50

Buy 60 Diamond Rapid Set Capsules before the end of February and get 40 Diamond Rapid Set Capsules Free of Charge

Diamond Rapid Set Capsules are used to perform non- loading bearing class I and II restorations, together with procedures for deciduous teeth, both for temporary and core build-ups. These Capsules are often used for a long term temporary or partial dentures. The Diamond Rapid Set system is non-toxic, non-combustible and easy to use. After six months it develops a compressive strength of 350MPa. It also has a high resistance to physiological fluids.

Diamond Rapid Set Capsules are “waterproof” with a chemical set up that adheres to both enamel and dentine without the need for any preparation of the tooth surface or light curing. The chemical set renders the material resistant to saliva almost immediately. The possibility of any contamination from moisture is eliminated ensuring that the strength and durability of the restoration are never compromised.
