personal, efficient, professional and honest to 3M ESPE's practice management tool for dental co-operatives and networks. "As a result the tablet contains a module that highlights the aspects of management tool for dental co-operatives and networks, it offers a very useful management tool for dental co-operatives and networks.

For more information on 3M ESPE, please call 01647 478145 or email phillippa.goodwin@7connections.com.

"It seemed like a perfect marriage – our CIC understanding and IT skills combined with the 3M Touch Team's dental experience and expertise," he says.

As a result the tablet contains a module that highlights the aspects of CIC relevant to dental practices, helping them implement effective audits and action plans to work with and evidence their compliance. It's making a complicated job much easier.

"The module is also very scalable, so information is provided at group, regional and national level and as a collaborative platform, it offers a very useful management tool for dental co-operatives and networks."

Para.com has launched a new online service to help dental professionals to consistently & accurately assess their patients’ gum health. The Dental Quality & Outcomes Framework comes into force in the revised dental profession to help practitioners with the use of the Basic Periodontal Examination code (BPE). The app provides information on:

• Description and clinical image of each BPE code
• The BPE code background

A click on a QR code on the show stand will generate a visit to the new website – www.philips.co.uk

For those hungry to learn about the latest innovations in tooth whitening, members of the Philips team will be at the show to take them through the intricacies of the Zoom range. Also on show will be the upgraded Philips AirFloss – an award winning interdental cleaning device with far-reaching implications. The hand held device fires micro-droplets of air and water (mouthwash) between the teeth giving the whole mouth a thorough clean in 30 seconds. Show visitors will also be able to take home a travel-sized sample of the latest Ultrablend.
