Do not hallucinate.
Phelps extends support programme for young dentists

Young dentists are the focus of the Phelps exhibition presence at the BDA Conference and Exhibition in Manchester this April, and trainee and TD dentists are particularly encouraged to visit stand number B05.

To further their on-going thirst for knowledge both novice and experienced dental professionals are being offered training opportunities. The expanded Phelps website, giving them access to free CDP material, mentoring tutorials and other information to smooth their path into effective professionalism. A click on a QR code on the show stand which will guide visitors a direct route to the new website – www.phelps.co.uk.

For those hungry to learn about the latest innovations in tooth whitening, members of the Phelps team will be at the show to take them through the intricacies of the Zoom range.

Also on show will be the upgraded Philips AirFloss – an award winning interdental cleaning device within reachingigmals. The hand-held device features micro-droplets of air and water (mouthwash) between the tooth giving the whole mouth a thorough clean in 30 seconds.

Show visitors will also be able to get a handle on the newest Sorriso – its Philips Sonicare for Kids which targets young brushers aged 4-10.

For more information please visit the new website www.sorriso.com or call 0203 287 5416 for more details.

The University of Buckingham and LDSA agreement

The University of Buckingham and the Leicester Dental Teaching Academy (LDSA) signed a joint venture agreement on April 27th 2012 to establish a Dental School in Leicester which would initially provide a five year BDS degree course. This was to complement a new Medical School which the University was also pursuing at the time.

In October 2012 the University and the LDSA hosted a launch in Leicester to an invited audience of 150 delegates drawn from Leicester’s dental professionals to present the project alone has left the University with no choice but to delay the Dental School to 2016. As the University is unable to commit to a start date this has made it impossible for the LDSA to complete contracts for the provision and construction of facilities as required in the joint venture. Both parties therefore reached an amicable agreement to end the joint venture in June 2014.

The University of Buckingham will support, as far as it is able, the efforts by the LDSA to attract an alternative venture partner.

Invisalign university programme for post graduate orthodontic training

Align Technology has reached an agreement with a further four dental schools to join its orthodontic training programme, bringing the number at which it teaches to seven. The Invisalign University Programme starts with an introduction to the Invisalign Doctor Site; treatment options and treatment selection and submission; the use of the ClinCheck® software and aligner delivery, through to monitoring and finishing. Each university is provided with a University Kit which includes Invisalign materials and access to the ClinCheck® courseware programme. Ideally, students will need to get started. The participating university is also issued with a username and password for student access to the ClinCheck® website which is a website portal for submitting cases. In addition to this, the site includes an educational sub-site which is continuously updated with clinical tips, hints, clinical presentations and publications. Other benefits include additional Invisalign treatments and discounts once the first student intake has submitted their first cases. Every student who participates is also entitled to an Invisalign account which is activated after their graduation, which allows them to care for patients using the Invisalign system once they start in practice.

An authorised member of the Faculty of universities interested in adding Invisalign® to its orthodontic training curriculum is requested to email: eu-universities@aligntech.com.

The London Smile Clinic

Enhance Your Patient Service With The Experts All The London Smile Clinic

Regardless of your dedication to training and education, at some point you will come across a patient that requires treatment outside of your skill set.

In those cases, offer your patients the widest range of treatment options by referring to the award-winning London Smile Clinic. The practice is open for referrals for orthodontic treatment, implant work and complex multi-disciplinary cases.

The expert team includes implantologist Dr Zaki Kanaan and Specialist Orthodontic Practitioner Paul Pande. The team are qualified professionals dedicated to ensuring the success of your patient’s treatment.

As the referring dentist, you will be involved in the treatment planning, have regular progress updates, and be required to accept each stage of the treatment. Each case is documented with before and after photographs, while orthodontic referrals receive treatment planning models to send to their cosmetic.

Offer your patients more – contact the London Smile Clinic and see how we can partner with you to provide optimal care.

For more information, please call 020 7235 2559 or visit www.thelondonsmile.co.uk/rep – your patients will be glad you did!
