Dental health experts are calling for radical plans to be implemented to halt rising rates of child tooth decay. Dr Gill Davies and Dr Collete Bridgman, dental public health specialists who work for Manchester’s NHS primary care trust, want a new approach to tackle the growing number of children, some as young as three, who have to undergo painful extractions.

Writing in the British Dental Journal, they demanded that parents play the key role in getting their offspring into good dental hygiene habits from soon after they are born by not giving them high-sugar foods and drinks, ensuring they have regular check-ups and cleaning their teeth regularly.

They also want schools to stop rewarding students who do well with chocolate; child-minders and nursery staff to ensure that toddlers brush their teeth twice a day; and a big increase in the number of children receiving fluoride varnish.

To halt the rising rates of child tooth decay, dentists are saying that not only should families receive free toothpaste and toothbrushes and parents told not to sweeten babies’ feeding bottles, but pupils should also be banned from sharing birthday cakes with friends at school.

“It is the parents who have influence over food and diet choices, purchasing and use of toothpaste and the making of appointments for dental care,” they write. “How many children are likely to insist that no more biscuits or sugary drinks be bought for a household?”

Given that only 10 per cent of the UK has fluoridated water, the authors want other steps taken, such as:

- Children using family fluoride toothpaste, not children’s toothpaste, which is low in fluoride.
- Schools and nurseries to stop giving children fruit squash at snack times.
- Every schoolchild to have fluoride varnish painted on their teeth at least twice a year. Currently less than 13 per cent do so.
- “Meet the dentist” sessions at primary schools.
- An end to the practice of sharing birthday cakes at schools.

Training centre opens at Portsmouth University

A new £9 million purpose-designed facility to train dental care professionals and final-year undergraduate dentists was officially opened by Health Minister, Earl Howe at the University of Portsmouth’s Dental Academy.

Supervised by tutors, dental students will work with hygiene therapists and dental nurses, as they would in practice and provide free treatment for 2,000 local people every year.

The new centre has 20 additional dental chairs, radiography facilities, a state-of-the-art instrument decontamination centre as well as seminar rooms.

Each year, 80 final year students from King’s College London Dental Institute will be trained alongside dental nursing students from Portsmouth.

Development of the new building has been enabled by capital funding support from the Department of Health, the local NHS and the Higher Education Funding Council for England (HEFCE).

Earl Howe, who is the Minister with lead responsibility for Dentistry, said: “I was delighted to see the high quality hands-on training provided at Portsmouth Dental Academy today.

“As set out in the NHS White Paper, we are committed to improving oral health for adults and children as well as increasing access to NHS dental services across the country. The University of Portsmouth Dental Academy has an important role to play in delivering on this agenda. They are providing first-class training and education for our future dentists and dental care professionals and excellent services to patients in the area.”

Director of the Dental Academy, Sara Holmes MBE, said: “Today marks the culmination of over two years of planning and represents a unique partnership between the University and the NHS. The entire staff and student body are thrilled to be working and studying, alongside colleagues from Kings, in such a dynamic and progressive institution right the heart of Portsmouth.”

Nairs Wilson, Dean and head of KCLDI, said: “King’s College London Dental Institute is delighted to have joined forces with the University of Portsmouth to create the Dental Academy, with a focus on innovation in the education of the dental team and the student experience.

The event was attended by over a hundred members of the local dental community, representatives from the local NHS and from KCLDI who was joined by University Chancellor, actor Sheila Hancock.
Editorial comment

Here at Dental Tribune UK, we are committed to providing our readers with insightful articles, practical help from specialists in their fields and a mix of news and opinion which helps to keep all members of the dental team up to date.

As part of this commitment we have been looking to see how we can provide more to UK dental professionals with regards to specialised material related to a particular interest.

Now, to the point – in March we are bringing to the UK three titles of international renown tailored to the UK dental profession: roots, implants, and cosmetic dentistry. Although the international versions are published by our colleagues at Dental Tribune International, the UK versions will be published by the same team that brings you Dental Tribune UK. The three titles cover the following issues:

All under one roof

Thirty members of the dental press gathered at London’s World famous department store for this year’s Showcase press launch.

The launch was held in Harrods’s Georgian Restaurant and gave the gathering of dental editors and reporters the opportunity to hear what’s in store at this year’s event.

BDTA Dental Showcase provides members of the dental team with the chance to see, hear, learn and buy everything they need to do their job, all under one roof. From the latest products and most appealing special offers to the highest quality services, Showcase is really “four one stop dental shop”!

The dental press were also informed that the Dental Lab @ Showcase would be returning by popular demand in 2011. A programme of lectures and seminars would also take place at the event supported by other learning opportunities in the Show Guide and in the exhibition hall.

BDTA Dental Showcase 2011 takes place at the NEC, Birmingham from 20-22 October 2011. For further information, visit www.dentalshowcase.com
The price of dental tourism

Throughout the UK, Europe and America, people are heading abroad to receive dental care, having been lured by the cheap prices of dental treatments and cosmetic dentistry. Dental tourism is rapidly becoming a very attractive option for those people who need cosmetic dentistry procedures, restorative dentistry and routine dental treatment but believe the treatments carried out in the UK are too expensive.

However, the current trend is giving patients more problems than it is solving and there are more and more high profile cases of treatments going wrong overseas. Recently, Sherree Rolf, 49, travelled to Hungary and had a full set of crowns, veneers and bridgework done for half the cost of UK dental work at just $5,765. However, she claims the Hungarian company DentArt-Klinik left her jaw broken halfway through the five days of treatment in Győr.

Thousands of Britons travel abroad every year for cheap dental work and many issues can begin as soon the patients return home. Once Sherree was back in the UK she visited her dentist, who upon inspection found that her jaw was broken. They also found that two veneers were also cracked.

Commenting on the issue, a spokesman for Dental Protec tion said: “Prevention is better than cure. Patients travelling abroad for dental treatment should enquire what arrangements are in place and what costs might be involved if the treatment is unsatisfactory. Patients should also ensure that the dentist providing the treatment is properly indemnified against claims in negligence, and that the dentist and patient can communicate effectively when seeking and giving consent for treatment.”

With regards to where the blame would lie if the treat ment fails in spite of additional work carried out by a UK dentist, the spokesman added; “It is standard practice for dentists to examine all new and existing patients carefully, particularly noting any changes that might have occurred since the patient was last examined. It is important that dentists re- carried out in another practice (or indeed another country) that a new baseline chart is documented. It is also critical that any concerns identified are described to the patient, without bias and in a factual way, noting the conversation in the records and any specific issues that the patient wanted to discuss.

“These records are very important if concerns are later raised by the patient in the light of any remedial treatment undertaken in the UK or with regard to the original work done outside the UK. All the costs might be involved if the treatment is unsatisfactory. Patients should also ensure that they are given the time and items of service. BDA also welcomes the Health and Social Care Board’s acknowledgement that it will be important to pilot revised patient charges prior to the implementation of the definitive new contracts.

Whilst the BDA response also signals its agreement with the proposal to have separate contracts for primary dental care, orthodontics and oral surgery, it highlights that changes in one area of dentistry will impact on another. The ability of practitioners with enhanced training and skills to deliver treatments that might otherwise be unavailable to patients in certain areas is particularly important, the BDA argues.

Peter Crooks, Chair of the BDA’s Northern Ireland Dental Practice Committee, said: “It’s nearly five years since reform was louted. Progress is well overdue. These pilots will take place against a backdrop of financial pressures and will need to take account of the difficult circumstances facing practitioners. “Nonetheless, Northern Ireland Dental Practice Committee endorses the proposed scheme and looks forward to continuing constructive and meaningful engagement as pilots progress. It is important that these pilots are given the time and resources they need so that their effects can be properly understood and a better future delivered for health service dentistry in Northern Ireland.”

BDA calls for piloting overdue NI contracts

Piloting of new contractual dental arrangements for Northern Ireland is overdue and must begin promptly, the British Association (BDA) argued.

Submitting its response to the Health and Social Care Board’s consultation on piloting new dental contracts, the BDA said it believed the proposed personal dental service scheme would meet the objective of testing the proposed arrangements for dentistry and pressed for progress. The BDA response also stresses the importance of pilots being allowed to produce a clear picture of both positive and negative implications of the new arrangements against a difficult financial position, and emphasises the need to understand the effect of elements of the contract including payments for patient care and items of service. BDA also welcomes the Health and Social Care Board’s acknowledgement that it will be important to pilot revised patient charges prior to the implementation of the definitive new contracts.

Whilst the BDA response also signals its agreement with the proposal to have separate contracts for primary dental care, orthodontics and oral surgery, it highlights that changes in one area of dentistry will impact on another. The ability of practitioners with enhanced training and skills to deliver treatments that might otherwise be unavailable to patients in certain areas is particularly important, the BDA argues.

Peter Crooks, Chair of the BDA’s Northern Ireland Dental Practice Committee, said: “It’s nearly five years since reform was louted. Progress is well overdue. These pilots will take place against a backdrop of financial pressures and will need to take account of the difficult circumstances facing practitioners. “Nonetheless, Northern Ireland Dental Practice Committee endorses the proposed scheme and looks forward to continuing constructive and meaningful engagement as pilots progress. It is important that these pilots are given the time and resources they need so that their effects can be properly understood and a better future delivered for health service dentistry in Northern Ireland.”

Time running out for ‘early bird’ discount

AOG and Smile-On, in conjunction with the Dental Directory and the Faculty of General Dental Practice (UK), will again be hosting the 2011 Clinical Innovations Conference (CIC). Now in its eighth year, the CIC promises to be bigger and better than ever, with a wealth of top speakers, including the AOG’s President, Pomi Datta, who said: “Last year’s conference and the dinner brought together innova tors and thinkers of this millennium. We are going to build on that with this year’s programme. We want to make this the most exciting annual event in Europe.”

Taking place on the 6th and 7th of May 2011 in the iconic setting of the Royal College of Phys icians, (picturess), situated in the heart of London, the CIC promises to offer all members of the dental team some unmissable learning opportunities and the chance to gain up to 14 hours of verifiable CPD.

With innovation once again the main theme, dental professionals can expect to learn more about the latest developments within the field of endodontics from the likes of Julian Webber, and the occlusion from Raj Rayan OBE and an opportunity to discover the benefits of practising minimally invasive orthodontics with speakers such as Yil Bureshi and James Russell.

Confirmed speakers include: The internationally acclaimed Nasser Barghi, Joe Omar, Peet van der Vyver, Eddie Lynch, Bob McLeland and Wyman Chan, amongst many others. On the Friday, attendees will also have the opportunity of attending the Conference Charity Ball, which will be held at the fashionable Millennium Mayfair Hotel. Last year’s proceeds went to the AOG-sponsored project in Chitrakoot to repair cleft lips and palates and provide dental treatment for 500 villages in one of the most rural parts of India.

Secretary of the AOG, Dr Nishan Dixit, is thrilled to once again be involved with this dynamic gathering: “As one of the UK’s leading charities, Dental Practice Committee are a body that not only values professional standards but also understands the need for innovation within dentistry, as well as the vital role that continuing education plays within the profession. We also hope that CIC delegates will join us in striving towards ‘the greater good’, our organisation’s motto, at the Conference Charity Ball, which promises to be a really fun and glamorous occasion, all in aid of a good cause.”

Given the record attendance rates at the 2010 event, delegates are advised to book early to avoid disappointment. The deadline for early bird registration, which entitles those who book before 7th March 2011 to a 15 per cent concession, is fast approaching! Members and clients of affiliated sponsors and organisers may also be entitled to special rates, so get in touch with the organisers to find out more.

Why not use this opportunity to keep in touch with innovations in this dynamic and fast-growing area of dentistry and help your practice reach its most profitable potential?

For more information, visit www.aoguk.org. For early bird offers, or to book, please visit: http://www.clinicalinnovations.co.uk or call 0207 400 8950.
SM Implant System

SM-Submerged / Extra Wide
SM Advanced 3rd-generation grade-4 titanium dental implants from DIO. RBM (resorbable blast media) roughened surface 1.2-1.5 Ra for enhanced osseointegration.

Fixture diameters 3.8, 4.1, 4.5, 5.0, 5.3mm

“Standard for the most advanced wide implants”

**SM Extra Wide**

DIO Implant Systems
Maintain surface area when length is limited.
Threads designed for immediate loading.
Compatible abutments with SM system.
5.9 - 6.9mm diameter fixtures.

NARROW fix

DIO Implant Systems
Narrow implants are ideal for small osteotemy sites.
Strong Morse Taper connection for narrow implants.
Permanent solution for narrow 3.3 - 3.6mm diameter.
Excellent primary stability achievable.

PROTEM

I M P L A N T S Y S T E M
Semi-permanent solution for post and ball.
Self-tapping body design for ease of placement.
Available from 2.5 to 3.0mm implant diameters.
BDTA surveys raise B2A cash

The British Dental Trade Association (BDTA) is pleased to announce the donation of nearly £1000 to Bridge2Aid following the submission of completed membership questionnaires and technology surveys sent out last year.

In order to assess how well the Association is meeting the needs of its members, questionnaires were sent out to each member company, and the BDTA offered to donate £5 to the Bridge2Aid charity for every questionnaire returned. 47 member surveys were filled in and submitted which represented an exceptionally high response rate.

The BDTA also conducted research amongst dentists to investigate their attitudes towards new technologies and training courses. Again, an excellent response rate was received and £25.50 was donated to Bridge2Aid for each of the 285 surveys completed and returned.

Executive Director of the BDTA, Tony Reed, stated; “It is important for us to understand the needs of our members in order to continue to serve them effectively and introduce new benefits. It is vital for our members to understand how members of the dental team respond to new technologies and the mix of training preferred. We were extremely pleased with the response achieved from the questionnaires and to be able to donate funds to Bridge2Aid made the research worthwhile on a number of levels. Thank you to all those who participated.”

Mark Topley, Chief Executive at Bridge2Aid, commented; “The BDTA has been a great support to us over the past six years and helped us to achieve so much – restoring tens of thousands of smiles and changing many lives in Tanzania. This donation will go a long way to helping us relieve the pain of thousands more people in the coming year and extend our work to new areas desperate for basic dental services and training. Our thanks go to the BDTA for thinking of us in this way, and to all the members of the dental industry for completing their questionnaires.”

For further information on the BDTA visit www.bdt.org.uk

The clear choice for straighter teeth!

In-Line®, the favourably priced alternative from Germany!

» In-Line® splints correct the position of the teeth without compromising the appearance of the patient.

» In-Line® splints have a continuous effect on the teeth ensuring a smooth movement to the required position.

Osseointegrated Implantology Courses

If you are interested in implantology then the Osseointegrated Implantology Courses, which are being held on Sunday 27th March – Friday 1st April 2011 could be the right choice.

Delivering 56 hours of CPD accreditation, the fee for the course is £2,200 and is ideal for delegates who wish to participate in a course over six consecutive days.

Topics covered include:
• examination and treatment planning • dealing with the patient within the practice • anatomy, physiology • biomaterials • sterility • surgical templates • surgical techniques (to include bone augmentation and advanced surgical techniques) • implant impression techniques • jaw registration • articulation • peridontal consideration (to include maintenance protocol and guided tissue regeneration) • connecting teeth to implants • detailed literature review.

There will be guest speakers on the following subjects:
• Dr Joe Omar on “Medical Emergencies”
• Dr Alan Cohen on “Medico – Legal Aspects”
• Mr Sean Goldner on “CT Scan imaging”
• Mr Keith Rowe on “Laboratory Techniques”

There will also be hands-on session on the surgical, prosthetic and laboratory phases and delegates will attend a CT scan appointment with one of the patients on the course.

This course is suitable for the application of all different osseointegrated implant systems and delegates who complete the course are eligible for the ICOI Fellowship, without further examination.

For more details or to book your place please call 020 7584 9855 / 020 7584 7740 or email reception@polestreetdental.co.uk.

V+B scheme ‘to be scrapped’

According to reports, the government is preparing to announce that a scheme for vetting people who work with children is to be scrapped.

Set up by the Independent Safeguarding Authority (ISA), the original Vetting and Barring Scheme system was designed to prevent unsuitable people working with children and vulnerable adults, with employers facing prosecution for breaches. Approximately nine million adults who came into contact with children once a week or more had been subject to checks.

Home Secretary Theresa May suspended it last June so a review could be held. A Home Office spokesman said an official announcement – which affects England, Wales and Northern Ireland – would be made shortly.

It has also been reported that the government will also announce that criminal record checks are to be sent to individuals first to allow them to challenge any mistakes.
