The Dental Plan understands what it takes to make a dental practice successful. It offers principals the opportunity to sell their practice, freedom to choose their own pay structure, and peace of mind knowing that their time is used effectively and that they can enjoy their personal and professional lives. The Dental Plan helps new dental practices and established practices.

The Dental Plan: The Complete Practice Solution

Decapinol® from Septodont is the new toothpaste designed especially for people who suffer from sensitive teeth.

Dash was developed with the clinician in mind as it offers maximum visibility and can be used in one or two applications. The unique 30 per cent hydrogen peroxide whitens in a single appointment and can be repeated as needed. The distinctive orange colour is easy to see and allows patients to rinse and spit away from the clinician.

Dash is now available exclusively at The Dental Plan. Call 0800 975 7530. For more information, visit 01372 451 461 or email info@thedentalplan.co.uk www.thebusinessplan.co.uk

The Dental Plan can help your practice achieve the best client outcomes, the most profitable cases and to deliver the most successful cases. The Dental Plan offers more flexible pricing plans, helping to attract more patients and improve your confidence – two of the most important things for dentists.

Dash Whitening Gel is available in a 30 per cent HP whitening system. DentalAir offers a new range of systems to meet your needs: the latest oil-free piston and scroll compressors. DentalAir offers expert non-obligation advice and full on-site surveys and maintenance sessions for the whole dental team, held either during the lunch break or at the end of the working day at the dental practice.

Why not find out what The Dental Plan can do to expand and develop your practice.

The Dental Plan has also proved to be keen to move our practice forward and The Dental Plan's help with producing leaflets is invaluable really, for advice, backup and business help. We were very happy with the outcome.

To pay for patient safety and your peace of mind.

Dash Whitening Gel requires no syringe to syringe mixing and can be used by the clinician or a dental nurse. The gel is easy to place, won’t run or drip and its distinctive orange colour makes it easy to visualise and control.

BioHorizons join forces with Dr Paul A Tipton for his One Year Implant Course. Dr Tipton, who has directed the course since its inception, is dedicated to first class dental education and is an excellent and enthusiastic teacher and a testament to establishing strong relationships with all referring clinicians.

A broad-based course of implant dentistry technology allows the Kent Implant Studio team to attend to the needs of clients and referring practitioners with efficiency and effectiveness. They are currently situated in the heart of Kent and seeing patients throughout London and the South East, you can be sure that Dr Dattatreya Dattatreya will be able to give you advice and to your patients throughout every stage of their treatment.

Dr Dattatreya welcomes referrals for all types of cases including complex procedures, surgery only prosthetics assistance and a full implant service. Referring clinicians will benefit at every stage of the treatment and are invited to attend the clinic with their patients at any time.

A referral to Dr Dattatreya ensures a professional, experienced service and treatment of the highest quality. With Kent Implant Studio, your patients are in safe hands.

For further information on the Kent Implant Studio or to obtain a referral pack please call: 01622 671 265 www.kentimplantstudio.com

Gingival preparation procedures are easier and more comfortable with RaceGP

New Dash 30 per cent HP Whitening System Exclusively Available from The Dental Directory

For more information or to order speak to your local Dental Directory Representative, call 0800 585 586 or visit www.dental-directory.co.uk

Plaque control. It’s the key to keeping your patients happy – and your income up. RaceGP is a brand new gel specifically designed to make gingival preparation procedures easier and more comfortable for patients, while ensuring the best possible outcome.

With thermo-setting properties, the product is liquid at room temperature (1°C-2°C) and turns into a firm gel when placed in contact with oral tissues (35°C). This effectively creates a space in the gingival sulcus without applying any pressure, keeping the gingival papilla in place. The gel is easy to place, won’t run or drip and its distinctive orange colour makes it easy to visualise and control.

For more information or to book your place contact The Dental Plan on 0800 975 7530.
