Dental Saver PERFECTION IN PROVEN EQUIPMENT DENTAL SAVIOR has a special “before the radio” niche in the UK dental market; over the last 25 years it has grown to be the largest UK dealer in pre-owned dental equipment.

All equipment is sold with warranties, fully serviced, tested and refurbished to an extremely high, often “as new” showroom standard. Dental Saver, a company run by dentists, has a very simple and straightforward maximum predictable function and aesthetics for all clients needing dental equipment (including) at affordable prices, often saving clients up to 30% on new prices.

Dental Saver’s buyers are extremely selective in what they accept for refurbishment, all equipment is serviced in-house, and exhaustively bench tested in their Bristol workshops. All worn or malfunctioning parts, and all consumable items are usually replaced with new, refurbishment may include new panheads and handpieces.

DentalSaver offers six months warranty on all pre-owned equipment, with longer periods negotiable subject to additional costs (excluding consumables and misuse contrary to manufacturer’s advice). Business terms and conditions available on request.

For more information call: 01278 853323 or 01278 725792 e-mail: info@dentalsaver.co.uk web: www.dentalsaver.co.uk

Impressive service and support from Clark Dental Over 30 years' experience in dentistry, the team at Clark Dental offer a complete surgery design service, and can work with you to guide and support you through every stage of your practice. Dr Paulu McNicoll of Post Dental Practice Design, says: “We decided to work with Clark Dental as they came highly recommended to us and they were able to meet our design and equipment needs. The whole process was very smooth. The Clark Dental team installed two surgeries, one for each specialist, along with a sterilisation room as well as all the necessary fittings to prepare a third surgery for use in a later date. As well as our specialist business and our December events unit, Clark Dental also provided us with other equipment including the Schick Digital Imaging System and the Normal portable x-ray.

“Overall I’ve been very impressed with the service and support we’ve received from Clark Dental. I am now very much looking forward to opening our third surgery in the coming year!”

For more information call: 01284 773146, email info@clarkdental.co.uk or visit www.clarkdental.co.uk

Essential inspections – as easy as one, two, three, FREE! All dbg know how important equipment is to the running of your practice. That’s why we offer essential equipment inspections at a special discounted rate to all our members.

Apolline – holds the answers to your unanswered questions In current economic times dental practices need strong business support to survive and thrive. Apolline offers tailored, practical business support to dental practices in all the areas you need to know about. By visiting our stand at The Dentistry Show 2013 you can learn more about the benefits of implant restoration, ask about the advantages of EAP DF, or Eothic: Albacore is a proven program run by surgeons and supported by Nobel Biocare. Step-by-step, GDPs are taught the necessary knowledge while stronger referral networks are forged between the referring dentists, surgeons, and labs. Whether you are a seasoned implantologist or just thinking of moving into restorative dentistry, come to see Nobel Biocare at stand G40 and discover more about the opportunities that await you.

For more information contact Nobel Biocare on 0208 765 3305 or visit www.nobelbiocare.com

All On Board the All-on-4TM at The Dentistry Show 2013 Allow Nobel Biocare to introduce you to the new business growth area of the revolutionary All-on-4TM and the new Eothic Albacore Program (EAP) on stand G40 at The Dentistry Show 2013 from 2nd – 3rd March at 2013 at the NEC Birmingham. With an ageing population and the advent of new dental technology, look no further – the All-on-4™ concept is a significant additional implant toplete implant dentistry. Dentists can fit a fixed bridge on just four implants with no need for invasive bone grafting or tissue manipulation. To achieve this Nobel Biocare extraction can have an immediate bridge within the same surgical procedure – there’s no need for a removable implant bridge. Talk to us about Nobel Biocare’s skilled and knowledgeable staff to find out more. For dentists who do not want to place implants but would like to learn about the benefits of implant restorations ask about the advantages of EAP DF, or Eothic: Albacore is the proven program run by surgeons and supported by Nobel Biocare. Step-by-step, GDPs are taught the necessary knowledge while stronger referral networks are forged between the referring dentists, surgeons, and labs. Whether you are a seasoned implantologist or just thinking of moving into restorative dentistry, come to see Nobel Biocare at stand G40 and discover more about the opportunities that await you.

The Waterpik® Water Flosser - ideal for patients under...orthodontic treatment

Available with a specially designed Orthodontic Tip, the Waterpik® Water Flosser is the ideal oral hygiene solution for patients undergoing treatment and wanting to improve their oral health during orthodontic therapy. The soft, angled water spray is supported by a wealth of scientific evidence to support its use.

In a study conducted by Sharma et al. at patients who used a Waterpik® Water Flosser after brushing, removing up to three times more plaque than those who brushed and used floss, and up to five times more than those who only used manual brushing alone.

Waterpik International, Inc. supplies a range of oral hygiene devices designed to meet all your patients’ needs. These include models such as the easy-to-use Jet Tip, a high-velocity, powerful pressure washer which showcases state-of-the-art Water Flosser technology and provides the ultimate in oral hygiene performance.

For more information on Waterpik® Water Flossers please speak to your wholesaler or visit www.waterpik.co.uk. Waterpik® products are widely available in Boots stores.

Kavo’s Estetica® E10 - A truly unique dental unit

The Estetica E10 is an accessible, affordable and antibacterial dental unit which showcases Kavo’s attention to providing dental excellence.

The Estetica E10 features a unique foot control which presents a smooth and hygienic approach to treatment. A simple left or right foot movement allows in user to operate both the handpiece and the Estetica E10 range of instruments, leaving its user’s hands free to focus on the patient.

The soft curvature of the Estetica E10 means that patient comfort is assured throughout treatment. The adaptable chair height (550mm-850mm) means that the clinicians will be able to maintain a comfortable and effective working position through any treatment. Keeping the Estetica E10 safe and clean is easy as many of the components are removable, such as the spout hose, handpiece handles and the swing arm. This ensures that it is not wasted on cumbersome cleaning procedures. Available from The Dental Directory, the Estetica E10 offers a simple and flexible approach to care at an affordable cost. For further information, contact The Dental Directory on 0800 585 596, or visit www.dentaldirectory.co.uk.

The Dental Directory - “They have everything that we need and at a very cost effective price.”

The Dental Directory stocks over 27,000 different products ranging from sundries to surgery equipment. Whatever you are after, The Dental Directory is on hand to help. With a team of knowledgeable and committed staff available to solve your questions and purchase products, The Dental Directory guarantee the highest customer satisfaction on every order. Wayne Wade, Dental Nurse at Pembroke Dental and Implant Centre in Wessex says: “One of the many reasons we have stayed with The Dental Directory for so long is not rep Louisa, she is really good. She comes out to us at all the time to deal with any queries that we have so the ongoing relationship and the customer information and the sales team has always matched, which is great. The Dental Directory’s range of products in its catalogue are great. Having fast and reliable fulfilment products available, they have everything that we need and at a very cost effective price.”

Sirona’s Sovereign is a truly unique dental unit

Sovereign combines the latest technology with a sleek design to create the most comprehensive dental unit on the market. Sovereign’s state-of-the-art design is tailored to your individual needs and requirements. Effective ergonomics, ease-of-use and characteristics that allow the dentist to work efficiently and save time is indicative of Sovereign.

The streamlined profile of Planmeca’s Sovereign is the most sophisticated dental unit incorporating many revolutionary features. Planmeca Sovereign from Planmeca is the new, fast and easy composite bulk fill system for posterior restorations. The first of its kind, Sovereign enables clinicians to perform posterior restorations with an easy-to-use, single-step technology that combines the advantages of a flowable composite with a universal composite. Sovereign reduces the time needed for placing, packing and sculpturing restorations by an impressive 30%. The Sovereign system combines the expertise of two leading dental companies, comprising a KaVo handset that enables sonic activation of a specially designed and conventionally delivered composite from KaVo.

Sovereign’s proprietary sonic activation significantly reduces the composite’s viscosity, which provides effortless placement and superior adaptation. Sovereign’s unique return to a monomer-rinse-free method eliminates the need for the practitioner to rinse the tooth with a universal base. The composite’s superior strength results in low shrinkage and high depth of cure up to 5mm with no need for any material to cap.

Furthermore, a specially designed ergonomic, small nozzle Ust line enhances access to the cavity and precise placement of the composite.

For more information or to arrange a free-in-office-demonstration please call 01733 802321, or email kum@planme.com or visit www.com. For more information on the new, fast and easy composite bulk fill system for posterior restorations, please visit www.planme.com.

Peldon Repairs Limited offer a reliable, efficient and extremely competitively priced handpiece repair service with 24-hour turnaround in most cases. They are confident that they are the best value repair centre in the UK. Manufacturer trained, their team of Repair Technicians have experience of repairing handpieces, motors, scalers and couplings from all the major manufacturers and other manufacturers too. MC Repairs offer a Freepost Service and free no obligation quotations on all their repairs. All repairs are quoted the day they are received and the vast majority are completed within 24 hours of acceptance. MC Repairs use only the highest quality components, including original manufacturer’s components with the exception of surgery handpieces which are sourced from independently verified ISO 134852008 standards. As well as complete overhauls, MC Repairs also offer the choice of very competitive Bearing Nosecones for all handpieces and also for most manufacturers, Services starting from just £ 25 plus vat.

All work carried out by MC Repairs carry a warranty ranging from 1 to 2 months and they guarantee all materials and workmanship for the full warranty period.

For further information telephone 0125 4474747 or visit www.mcrepairs.co.uk where you can download a Freepost label and also see the various equipment items they offer for sale.

Design your new practice with Zoom UK

Zoom UK has been recognized as a leading international expert in the field of Dental, Veterinary and Medical cabinetry, and now new products can be viewed from the brand new website www.tazow.com.

The experts at Zoom UK will help you plan your new practice layout, ensuring that the design is tailored to your individual needs and requirements. Effective ergonomics, ease-of-use and characteristics that allow the dentist to work efficiently and save time is indicative of Zoom UK.

You are then able to choose which cabinetry style and colour you prefer from the complete product range in action. Finally Zoom will undertake a complete Project Management Service, including installation and post installation service support, to enable these dreams to become reality.

Creating the perfect environment for your patients

The Sonitus treatment centre from Sirona is one of the top 50 design objects of 2012. At the red dot gala in Essen (Germany) at the start of July, representatives of Sirona and the Prekuls Design design agency received the red dot trophy of the prestigious design award for the Sirona product. Together with another 59 “best of the best” Sirona prevailed over more than 4,500 products, and now claims the title of The Red Dot. Not only does the striking design and high comfort level of the treatment centre attract the attention of experts: “We also receive feedback on SIRONA from our patients – I have not experienced this with any other treatment centre. They notice that the patient chair is comfortable and comment on its modern appearance.” says Dr. Gunther Landstricker from Bennheim. SIRONA’s unique functions and characteristics that allow the dentists to work efficiently and save time.
