	For any additional information please call 0800 138 6255 or email customerservice@sparkledentallabs.com or visit: Sparkle Dental Labs today.

Providing Effective Aftercare
Tandex provides quality Orthodontic Kits to help aid your patients’ aftercare following treatment.

An effective way to ensure that patients maintain efficient oral care after a dental procedure is complete is to offer a fully prepared kit that contains all of the necessary tools.

The Tandex Orthodontic Kit has a selection of adjuncts ranging from an Advance Medium toothbrush to eliminate bacteria from around the oral cavity, to the SOLO Medium brush for precise interdental cleaning. It also comprises with 4 FLIX Lime interdental brushes with non-slip flexible grip for pleasant and comfortable maintenance.

The kit includes a detailed user guide that comprehensively instructs patients on optimum cleaning protocols. Produced in cooperation with dentists and hygienists the in-depth information assists patients to use the products as they were intended, for easily achievable and excellent results.

Tandex Orthodontic Kits offer your patients the highest quality tools and direction for effective aftercare. Contact the team at Tandex today to find out more.

For more information on Tandex’s range of products, visit www.tandex.co.uk or email martin@tandex.co.uk

Exciting caries: check-ups are good, SIR destruct is better
In May Siro, technology leader in the dental industry, is bringing a detection system onto the market that enables dentists to identify rapidly, quickly and simply where caries does or does not exist: SIR destruct.

SIR destruct is based on Fluorescence-Aided Caries Detection technology, known as FAC², which exploits the fluorescence characteristics of teeth. If teeth are illuminated with violet light in a spectrum of around 405 nm, it doesn’t only stimulate deproteinisation products of caries bacteria but also healthy dentine to fluorescence. Healthy dental tissue light up whereas cavernous areas are visibly red. The attending dentist can therefore see at first glance – and very clearly – which areas are healthy and which ones are not.

With a selection of buccal and dental microscopes ranging from the fantastic TTI Telescopio and the GTS, to the top-of-the-range OPMI Pro dental microscope, the team from Nuineo were happy to explain the many advantages of these fantastic dental tools.

Whether delegates were endodontic specialists looking for the perfect microscope to see deep down into the root of a patient, or GDP’s looking for a set of loupes to accompany their everyday dentistry, Nuineo exhibited an effective solution for every scenario.

Discover the benefits that employing a Carl Zeiss visualisation system can bring to your daily practice with the team at Nuineo today.

For more information please call Nuineo on 01453 872356, email info@nuineo-ltd.com or visit www.nuineo.co.uk

Difficult diagnosis? Refer to EndoCare
EndoCare we excel at diagnosing and treating dental pain in all its forms. Our team of highly trained Endodontists are on call and absolutely committed to relieving pain and saving teeth. In fact, over the last 10 years, we’ve saved over 1,000 tooth from extraction!

Our philosophy is simple: we aim to provide high-quality Endodontic treatments in a warm and caring environment where patients’ needs are always our number one concern.

So if you have a difficult diagnosis, or need help with any aspect of root canal treatment, give our expert team a call today! We welcome contact from all referring practices and are ready and willing to assist you in any way we can. Simple, aesthetic, stable - Structur 3
Composite material for the fabrication of provisional crowns and bridges
Structur 3 is our new, self-curing crown and bridge material from VOCO. It is ideal for the fabrication of high-quality provisional crowns and bridges, as well as inlays, onlays, partial crowns, veneers, and short-term provisional restorations. Long-term temporaries can also be constructed using Structur 3. An additional indication is the layering of pre-fabricated provisional crowns and bridges. This is possible with the composite material polyacrylate or metal. Structur 3 possesses extraordinary stability and high aesthetic properties and is as easy to handle as a wax build-up.

Manufacturer: VOCO GmbH, P. Box 767, 24357 Cuxhaven, Germany, www.voco.com

For more information please contact info@voco.com

Visualisation solutions for all situations

Improve implant success with Water Flossers from Waterpik International, Inc.
To ensure the success and longevity of dental implants, good oral hygiene is essential. Indeed, studies have shown that bacterial plaque build up can lead to mucositis and peri-implantitis which are amongst the very best indicators of implant failure.

When compared with dental floss and Water Flossers to remove plaque, water flossing is a proven to be up to 50% more effective than thinning strips for removing gingivitis. Water Flossers also use up to 29% more effective at removing plaque from the interproximal tooth surfaces.

With such a strong scientific backing for Water Flossers, there are now more options than ever for clinicians to recommend to their implant patients to maintain and indeed improve the standard of their oral health.

For more information on Waterpik® Water Flossers please speak to your wholesaler or visit www.waterpik.co.uk. Waterpik® products are widely available in Boots stores and selected LloydsPharmacies.

The Pentaxi E1 automatic unit is compact and fits neatly into your cabinet, housing all the components necessary to the production of high-quality images.

The Pentaxi E1 automatic unit is compact and can be used almost immediately after delivery- just plug it in and start using.
