SIROInspect has been presented by Sirona, technology leader in the dental industry. Castellini ensures that the customer is put firmly first. Teams of specialist engineers are at your disposal should any technical support be required at any stage after installation. Castellini’s wide-ranging and flexible working times, you can also rely on the team at Tavom UK to make sure your new practice meets all your specifications, and a range of colours and finishes are available to help you create a design totally unique to you.

Tavom: Quality cabinetry with the customer service you deserve. For over 35 years, Tavom has distinguished itself as one of the leading providers of bespoke dental and medical cabinetry in the industry. The team at Tavom understand that every room within a dental practice has a well-defined purpose, and it is important that each of these areas function with optimal efficacy. They also appreciate the need for flexibility and the ability to change areas as required.

Providing Effective Aftercare
Tandex provide quality Orthodontic Kits to help aid your patients’ aftercare following treatment. An effective way to ensure that patients maintain a high oral health care after a dental procedure is complete is to offer a fully prepared kit that contains all of the necessary tools.

Exciting cases: check-ups are good, SIRDontic is better. In May Sirona, technology leader in the dental industry, is bringing a detection system to market that enables dentists to identify caries, quickly and simply where does caries and where does not exist? SIRDontic is based on Fluorescence-Added Caries Detection technology, known as FAC2, which exploits the fluorescence characteristics of teeth. If teeth are illuminated with violet light, the tissue spectrum of around 405 nm, it doesn’t only stimulate de-proteinisation of caries bacteria but also healthy dentine to fluoresce. Healthy dental tissue light up green whereas carious areas are vividly red. The attending dentist can therefore see at first glance – and very clearly – which areas are carious and which areas are not.

Simple, aesthetic, stable: Structur 3 Composite material for the fabrication of provisional crowns and bridges. Structur 3 is the new, self-curing crown and bridge material from VOCO. It is the result of the leading company’s innovation in the fabrication of high-quality provisional crowns and bridges, as well as inlays, onlays, partial crowns, veneers and resin-laminates. Long-term thermocycling can also be conducted using Structur 3. An additional indication is the intrinsic function of pre-fabricated provisional crowns and bridges. The composite material polyacrylic acid or metal. Structur 3 possesses extraordinary stability and highly aesthetic properties and is as such a versatile and reliable product.

Visualisation solutions for all situations. Delegates at the BDA Conference and Exhibition 2014 were given the opportunity to view for themselves the Carl Zeiss visualisation systems provided exclusively in the UK by Nuvene. They were particularly impressed by the incredible image quality and ergonomics sophistication on display.

With a selection of loupes and dental microscopes ranging from the TTL Teleloupe and the GTX, to the top-of-the-range OPMI Pico dental microscope, the team from Nuvene were happy to explain the many advantages of these fantastic dental tools.

Delegates were endodontic specialists looking for the perfect microscope to see deep down into the root of a pulp and G/DPO looking for a set of loupe to accompany their everyday dentistry, Nuvene exhibited an effective solution for every scenario.

Discover the benefits that employing a Carl Zeiss visualisation system can bring to your daily practice and the team at Nuvene today.

For more information please call Nuvene on 01435 872266, email info@nuvene-ltd.com or visit www.nuvene.co.uk

A service you can trust. Sparkle Dental Labs, we understand how important quality customer service is for your practice, and so we are dedicated to providing a quick and reliable service every-time.

You will be kept informed every step of the way so that you'll know which technician is looking after your order and when your product is ready for dispatch and free delivery. We have also added new restorations with patient statement certificates both for your peace of mind and to ensure compliance with ODC regulations.

Serving as an extension to your professional team, we work hard to create the products you need, when you need them. Now working with more and more practices, we have recently welcomed two new members of staff within our customer services team. We are also soon to be joined by ten new dental technicians, ensuring that we can meet the growing demand for our expert craftsmanship and quality service.

So if you are looking for a British dental laboratory that you can trust, contact Sparkle dental labs today.

For more information please call 0800 138 6255 or email customerservice@sparkledentallabs.com or visit www.sparkledentallabs.co.uk

SIROInspect is better – in a nutshell, and very clearly – which areas are carious and which ones are not. SIROInspect is based on Fluorescence-Aided Caries Excavation technology, which allows caries to be seen and very clearly – which areas are carious and which ones are not.

Our philosophy is simple: we aim to provide high-quality EndoCare treatments in a warm and caring environment where patient’s needs are always our number one concern.

If so you have a difficult diagnosis, or need help with any aspect of root canal treatment, give our expert team a call today. We welcome contact from all referring practices and are ready and willing to assist you in any way we can. We particularly excel at treating anxious patients and other challenging issues such as hot pulpas, microsurgery and re-treatments.

To find out more, contact EndoCare today. For further information please call EndoCare on 020 7224 0999 Or visit www.endocare.co.uk

For more information, please call Nuview on 01453 872266.

Allied with the British Dental Health Foundation AlignTech is supporting the British Dental Health Foundation's 2014 National Smile Month campaign. Orthodontic treatment has the potential to help some patients malocclusion, back and neck problems a lot less likely. Dr Umit Mouz, Dental Associate at All Saints Green Dental Practice reports: ‘With the loupe I can see everything I need to do and it helps in diagnostics. I can add fluoro to a greater degree, which was not achievable with naked eye, especially when I am doing cosmetic work and a higher level of finish is expected. I don’t have to adjust the light if I want to see in the corner of the mouth as the light follows my direction of the head. I would absolutely recommend these to every dentist!’

Available exclusively in the UK from Nuview, Carl Zeiss loupes offer comfort, sophisticated technology and unparalleled visualisation.

For more information please call Nuview on 01453 872266.

The Cel Zior QMFI Pico microscope – “I remain as impressed now as I was when I purchased it.” The Cel Zior QMFI Pico microscope is a unique innovation for dental professionals. It is designed to help dentists to improve their skills in the areas of orthodontic treatment, implant work and complex multi-disciplinary cases.

In those cases, offering the widest range of treatment options by referring to the award-winning London Smile Clinic. The practice is open for referrals for orthodontic treatment, implant work and multi-disciplinary cases. The expert team includes implantologist Dr Zaki Kanav and Specialist Orthodontist Dr Prat Bhogal, two highly experienced and qualified professionals dedicated to ensuring the success of your patient’s treatment. At the referring dentist, you will be involved in the treatment planning, have regular updates, and be required to approve each stage of the treatment. Every case is documented in the treatment planning, and welfare or orthodontic referrals are viewed with the utmost care to ensure each patient’s needs are met.
