For all-day freshness and confidence, patients can also use CB12 boost. This is better than 18 other leading mouthwash brands.

You can greatly help by recommending CB12, which has been proven to:

- In a seven-year Swiss study, halitosis has been found to bring about inhibition, inaccuracy, withdrawal and reduced social contact to chronic sufferers.
- For all-dentiness and confidence, patients can also use CB12 boost. This new product is a scientifically formulated two-layer, sugar-free gum that contains zinc, fluorate and xylitol – three ingredients that prevent bad breath, strengthen teeth and prevent cavities, and reduce plaque.
- For relief from halitosis that can help to set your patient’s minds at ease, you can confidently recommend these two products from CB12.

The power of information from Christie + Co

Whatever questions you may have about buying or selling a practice, Christie + Co can help provide you with the right answers.

From the best strategy to sell your practice to the best specialist dental finance to suit your needs, Christie + Co shows you proven path to success – your business or retirement goals, met with ease.

The Carl Zeiss OMPI Pico microscope is available exclusively from Nuview – “The field of vision is brilliant.”

Carl Zeiss Loupes from Nuview – “The field of vision is brilliant.”

Many dentists are discovering the numerous advantages that a set of loupes can bring to their clinical work. The name Carl Zeiss is recognised for creating visualisation systems of the very highest standards and Carl Zeiss’ range of loupes is no exception.

However, using a set of Carl Zeiss loupes doesn’t just guarantee enhanced visualisation, it also ensures comfort. Carl Zeiss loupes allow the user to sit at an optimum position, this improved posture makes looking back and working up a lot less likely. Dr Umi Mouat, Dental Associate at All Saints Green Dental Practice says: “I have worked with many different loupes to suit various needs. The Carl Zeiss range is one of the best because of the ergonomic design and helps in diagnostics. I can add these to a greater degree, which was not achievable with naked eye, especially when I am doing cosmetic work and a higher level of finesse is expected. I don’t have to adjust the light if I want to see in cold corners of the mouth as the light follows my direction of the head. I would absolutely recommend these to every dentist!”

Available exclusively in the UK from Nuview, Carl Zeiss loupes offer comfort, sophisticated technology and unparalleled visualisation.

The Carl Zeiss QMPi Pico microscope – “I remain as impressed now as I was when I purchased it.”
